M'KINLEY IS NERVOUS.

The Strain of Suspense Is Manifested in His Eyes. Canton, Ohio, June 17 .- An animated and enthusiastic gathering of newspaper people and friends, mostly ladies who came in to sit with Mrs. McKinley, received and discussed the convention bulletins received today at Major Mc-Kinley's residence. The major was outwardly calm and gracious as usual, but the natural strain upon him, inci-

dent to the situation at times manifested itself in his eyes, the only expression he gave of the nervous tension of which he was strung. The question of most interest was as to the time the nomination would be made, today or tomorrow, and opinions pro and con, were freely given by all present. But all that the one most interested would say was that St. Louis ought to have the convention at least three days. The popular sentiment of the people of the town was for a daylight nomination.

New York, June 17 .- Miss Caroline S. Chudoba, an assistant teacher in gram-mar school No. 52, at Courtlandt ave+ nue and One Hundred and Fifty-seventh street, will send her resignation to the board of education tomorrow be-

cause her religion will not permit her to teach temperance physiology. The teacher is a Christian Scientist, and was satisfied with her work until

CHINA'S LATEST SCOURGE.

Terrible Famine in Tonkin Owing to Bad Harvests.

San Francisco, June 17.--A terrible famine which threatens to plunge the most prosperous portion of Tonkin, China, into the direst misery for many years is desolating the country. The harvest has been a failure and the natives throughout the whole of the country are in a most miserable condition. In Hanoi, the other day, a mother offered her three infants for eight cents, preferring to hand them over to a European, rather than see them perish from hunger in her arms. Inhabitants emigrate from the country en masse to the cities to beg for sustenance, while many others are going about pillaging and perpetrating acts of the grossest vioence. Several cases of cholera are reported from the provinces where the

famine has been felt most severely. FIRE IN A MINE.

tion of the tariff law of 1890, which had been popularly credited to Mr. McKin-ley, and said that while the members of the committee discharged the duties entrusted to them faithfully, it was not true that any one man on earth had prepared as much of the measure as Mr. McKinley, but that his ideas and spirit dominated everything in connection with the bill when the sub-committees were preparing the schedules and be-fore they were submitted to Mr. McKinley, who led in all the discussion with the same rare ability which enabled him also, when it was taken into the house, to pass it through that body without amendment. Such statements as Senator Teller made, Mr. Lafollette continued, were an injustice to Mr. Mc-Rinley. They had been continually repeated and it was time now that the country should be acquainted with the real facts connected with the formation of the bill which bore Major McKinley's name.

MR. LAFOLLETTE'S AMENDMENT. Mr. Lafollette then, addressing himself specifically to the money plank, moved to amend the last section by striking out the words "now in circulation." so that it should read that "all our silver and paper currency must be maintained at a parity with gold." Mr. Lafollete argued in support of his amendment that a wrong construction might be placed upon the plank as it stood. He feared that it might be construed as a pledge to contract the circulating mediums so that no more silver should be coined or paper currency be issued. It would hurt the Republican party in states where it would be hard pressed, although it would make no difference in his own state of Wis-

consin. Mr. Lodge, of Massachusetts, opposed the amendment. He did not wished to be placed in the position of encouraging any further coinage of silver by the government. Arguments in a similar strain were made by Mr. Merriam, of Minnesota, and Mr. Patterson, of Illinois.

Mr. Gear, of Iowa, and Mr. Brewer of Michigan, supported the amendment. The chairman, Mr. Foraker, of Ohio, agreed with Mr. Lafollette that the words should be stricken out and this was accordingly done. The vote on the adoption of the gold plank as amended was then ordered and it passed-yeas, 40; nays, 11. The negative vote was cast by the foregoing silver men, who favored the Teller substitute, with the addition of the member from Oklahoma. The discussion on the remainder of the platform was general, but of no special interest, and it was adopted without division. a number of the silver

men having already absented themselves from the meeting.

SENATOR CARTER WILL STAY. Senator Carter, of Montana, is no longer one of the five insurgent senators. His associates, Senators Teller, Dubois and Cannon, made plain their positions before the resolutions committee, and what course Senators Carter and Mantle would pursue has been a matter of general interest. The former this afternoon notified the silver men that he could not go with them and that if they bolted and left the convention and the Repblican party they must do so without him. Mr. Mantle has not yet notified his colleagues to the same effect, but will probably do so tomorrow.

of agriculture will establish a department on July 1 to be called the biological survey. The result is expected to be a tremendous economic advantage. Agriculturists, horticulturists and stock raisers are to be given charts showing the exact position of each state and territory where certain animals and vegetables can be advantageously raised. Those will be supplemented by large catalogue containing every land animal and vegetable of the world, and indicating the areas in which they may be raised or cultivated by Americans.

Millions of dollars are thrown away each year by farmers and other producers who plant seed in the wrong soil or climate, or who undertake to breed animals where the atmosphere and food resource is uncongenial. An efficient corps of naturalists connected with the biological sarvey will make a detailed survey of the whole country, counting and classifying the living species found in each county of each state and territory. They will also note the conditions of climate, altitude and soll, will note how far each condition influences the distribution of the species. The chief of the new survey will be Dr. C. Hart Merriam. A survey of the entire country will be made and charts will then be published showing the exact

location of the various species. No other country in the world has ever instituted a survey of this kind.

Nebraska Woman Asks \$10,000 for Alleged Inhuman Treatment.

Council Bluffs, Iowa, June 17 .-- Mrs. Mary Smith Haywood, of Chadron, Neb., began suit in the United States circuit court yesterday against the Sisters of Mercy, who are in charge of St. Bernard's hospital, asking \$10,000 damages for wrongful detention, cruel treatment and resulting physical injurles and damage to her business. The plaintiff alleges she attempted to escape and was thrown into a cell.

Soon after she attempted to attract the attention of passers-by, believing her life in danger. Five or six attendants, she states, rushed into her cell, threw her upon the bed and placed a strait jacket upon her, and she was kept pinioned for sixty hours without food or attention.
