WITHOUT PRECEDENT.

From the Philadelphia Record. For examples of the proceedings at Chiengo the history of our own and of all other civilized nations will be ransacked in vain. In the frenzy and madness of the French revolution the Jacobing were the preuch revolution the Jacobing were too prudent to threaten the nation with bankruptcy and with a violation of the abligation of contracts. When Babeuf and his associates were detected in their con-spiracy against the rights of property they had the grace to anticipate the ver-geance of the law and hang themselves; but the Atigelds, Tillmana, Bryans, Blands and their misguided and infatuated ad-herents have the daring to openly pro-claim depreciated currency, repudiation Mr. Bryan and Mr. Bland should and confiscation to the people of the United States as the esential features of a comprehasive political programme.

NOT FIT TO BE TRESIDENT.

a great deal less risky than trying to From the Wilkes-Barre Record. The Scranton Tribune yesterday apologized for having on Saturday referred to candidate Bryan as a "blatherskite." That is right. Whatever criticism Republican papers may properly pass on the candidate of the Democratic-Populist-An-arcist-Free Silver Coinage party, it is only fair to recognize the fact that Wil-tam Jennings Bryan is personally a clean and honorable young man; that he is bright, brainy and elequent it would be worse than foolish not to admit. What he is sorely deficient in is experience, dis-cretion, sound judgment and statesman-ship. The qualities that have given him manufactor of the state of the state of the statest prominence do not alone fit a man for the great office of president.

THE QUESTION OF AGE.

wants steady work at good wages, but ne wants those wages paid, when earned, in full-value dollars. Hence he will vote for McKinley, Protection and sound money.

Into Our Rivals' Hands.

A point that is generally overlooked in connection with the unlimited free coinage movement is opportunely set forth by Director Preston, of the mint. He calls attention to the fact that unless congress should enact some special provision preventing it, the nations of the world, in case a free coinage law shall be placed on the statute books, could ship all their bullion to the United States for coinage. Here it would receive the government stamp, and would be used to buy American goods for shipment abroad. The result would be that foreigners would get all American goods at half price, while Americans would have to pay the full rate for them.

This would truly be a fine situation for the American farmer, who now favors free silver because he thinks it would give him better prices for his grain and cotton. Instead of the high prices-the dollar wheat and the twenty-cent cotton that are so seductively pictured by imaginative silver campaigners-he would under this obviously logical arrangement of affairs have to dispose of his-exports at practically the present price, whereas the only ones who would have to pay more for these articles than is now being paid for them would be the American consumers whose money under free coin age would be depreciated fifty per cent. Instead, therefore, of strengthening ourselves for increased competition against our gold-standard European rivals we would, under the Bryan plan, simply throw ourselves into their hands and become, as it were, commercial prison ers of war.

Add to this the Bryan idea of a revenue tariff, with its inestimable menace to domestic industry and home labor and you have a combination of policies about as dangerous to American progress and prosperity as could well be devised. And yet the men who advocate these twin measures of commercial and financial ruin have the hardthood to declare that they do so in the interest of the American producer, whose market they would give away and whose wages they would vitiate to the extent of almost one-half of its face value. Can the producers of America be fooled by such a transparent skin game?

Dr. Eaton, treasurer of the Methodist Episcopal Missionary society. makes the point against free silver that it would sacrifice one-half of that soclety's usefulness. Last year the society sent \$624,977.99 abroad. If free silver had prevailed in this country, half of

Jibes at McKinleyism are risky experiments, now that the people are fresh from the disasters which followed Mc-Kinleyism's overthrow four years ago. It will be remembered that it was by the use of just such jibes that the Democracy fooled the people into making the incalculably costly change of 1892. The same bunco game cannot be successfully worked twice in succes-

ing to do with the Democratic ticket. He will not be lonesome

From the Wilkes-Barre Record. The Scranton board of trade fund for the relief of the families of the Pitiston Twin shaft victims has reached \$7,000. and is growing daily. A number of the more wealthy men have made contribu-tions of \$500 each. Scranton has a way of responding very liberally to every worthy appeal for aid.
