Investigation prove to you that what we claim is is a grand, educational treat. true.

KILLS HIS FRIEND IN A DISPUTE.

Jacksonville, Fla., July 21.-In a moment of passion, caused by a dispute over a game of cards, W. W. Haralson, auditor of the Jacksonville, Tampa and Key West railroad, dealt a death blow to Francis M. Ector, assistant auditor of the same road. The tragedy took place last night in the reading room of the Arlington hotel, where the two men Ector and Haralson were warm friends, and nearly every evening played cards in the reading room of their hotel. Last night they were playing cribbage when a difference arose over some point. Ector in anger scattered the cards over the floor. "Le me explain," said Haralson, "I don't want to hear a word from you," replied Ector. "The man who won't hear an explanation is a d-d fool," exclaimed Haralson. Ector sprang at Haralson, grasping him by the throat. Haralson struck his opponent in the face, but Ector came again, and as he did so Haralson struck his friend over the head with a heavy chair. Ector fell unconscious and died at 5 o'clock this

Ector was a native of Atlanta, Ga., and well known in railroad circles, having been auditor of the Richmond and Danville road for a long time. He owned property in Atlanta worth \$100 -000. Haralson is a son of Chief Justice Haralson, of Alabama. It is said that he will not be prosecuted.

LIVE LIZZARDS IN THE ROCK. .

Little Copper Colored Animals Eutombed in the Stone for Ages.

Anderson, Ind., July 21.-Live lizards were found in the rock of the Lux & Talbott limestone quarries north of this city yesterday. While the men were cutting out the solid rock they hit a series of pockets. In each one of these was found a live lizard. They were taken out, but died a few minutes after being exposed to the air. They were of a peucliar copper color. Although there were places for eyes, there were no orbs. Zoologists state, and it is an evident fact, that the lizards were living thousands and thousands of years ago, and that they were entombed

when the rocks were formed. There were no air passages into their strange homes, and no way in which they could get any nourishment. One or two were taken out of the Lux & Talbott quarries last week.
