Brief Mention of What Is Doing in the Pleasure Way.

SUMMER EXODUS IN FULL SWING

Outpouring to Seashore and Mountains Has Been Quite General and There Is Little to Talk About. Country Club Meeting This Morning--The September Tennis Tour- Kelcur of this city. ney--Social Events of the Week.

- In a social way Scranon humanity is having as little to do these hot days as it has in other directions, in business, in church matters, in everything in fac. Anyhow, there are really so few in town who enjoy the social side of life, that possibly not more than a few baker's dozens could be gathered together for any sort of pleasantry. The few who are left are the paternal heads of families and the young business men. The mothers and girls have flown to the seashore or hills.

. . .

This morning takes place the formal meeting of the country club ardents at 11 o'clock in the board of trade rooms. A board of directors, which is to choose from among its own number the club's officers, is to be elected; the constitution and by-laws are to be adopted, and the unofficial agreements between the provisional committee and Architect Holden and the Pennsylvania Coal company are to be ratified. While the club house is being crectedthe plans are now completed-and the grounds leveled and arranged the small proportion of members in the city will have something to talk about and the directors will be kept busy. When the others return home early in September they will find the building well under way and the tennis courts ready for the annual tourney, which has heretofore been wondacted by the Lawn atives. club.

MUSICAL NOTES.

In speaking of the recent performanc f the "Mikado" in this city by amateurs from Wilkes-Barre, the Elmira Telegram very properly suggests that with the talent in Scranton an opera company could be easily organized that would eclipse in excellence the best offorts of our Wilkes-Barre friends. The

Telegram also names Professor Richard Lindsay as the director best fitted by natural ability and experience to conduct rehearsals of such an organization. Much time has been spent in bringing out heavy productions by various musical societies of the city, and it seems a though something in a lighter vein would meet with approval from the today for Atlantic City. Miss S. Louise Hardenbergh, of this city, public. An amateur opera company the guest of her brother, Hon. E. B. under direction of Professor Lindsay ought to meet with success musically

Ariel ... Tomorrow's Services. This is truly the season of church inactivity. Pastors are absent on their acations; church and Sabbath school fficers are either out of town for the

summer or are journeying between city and country so often that they get but little opportunity for official work, and there is practically none of the social

and church organization pleasure and work that really has so much to do with religious activity in the cooler and winter months. To the Christian Endeavorers, it seems, has been left all there vice and weekly prayer meetings; and just now the Endeavorers' work in preparing for the mammoth October state convention necessarily smacks more strongly of business than religion.

Professor J. Franklin Crowell, one of America's greatest zither players, has located at Carbondale, and it is prob able that he will be heard in this city efore the winter is over. The zithe is a common instrument in Germany and Austria, where many excellent per

formers may be found, but is little known in America. Being one of the most difficult of stringed instruments to play upon, few American musicians possess the patience required to gain perfection as performers. PROF. COLES FOR AUGUST.

From Storms and Signs. The outlook for the month of August (1896) is discouraging in the extreme. The Planets Venus, Mercury and Jupiter, our financial stimulator, are all lost behind the sun. Saturn is in the far southwest, and Mars, the old red warrior, will rise at midnight to play his cunning tricks on old Mother Earth, who stands all alone and opposed by King Leo, the lion-the king of the "low ebb" forces-who will send epidemics, drought, microbes, strange new bugs and parasites, etc., to afflict Earth. Dissatisfaction in political and money circles will cause much alarm and may be blood-shed. Never before to our recollection, have the Planets been in the same position as they are now; and we predict that nothing but sober thoughtful, steady actions on the part of us all, will save America from the blasting effects of a destructive finanial hurricane. From the 1st to the 15th of the month we may experience some very strange weather; for, if Mars turns his cruel attention to Earth, then the heavens will weep as easily as a child. If he turns his attention to other planets, then the vital forces of the atmosphere will disperse the rain clouds and make old Mother Earth quake and thirst. The Susquehanna, Juniata, Alleghany, Schuylkill and Lackawana valleys in the state of Pennsylvania, will be in the pathway of a strong electrical current, moving castward; and cities, situated like Scranton, without sufficient river frontage to arrest the electrical current, will make a shining mark. Wind storms and hall storms, tornadoes and cyclones, earthquakes and floods will cause great loss of life and property. Terrible gales will sweep along the sea casts and do great damage to shipping. Cool waves bordering on to frost. and perhaps snow, will visit some sections; while in other sections people will be dying from the heat. Fearful denis among the savages will be reported this month and awful deeds and riots among the civilized. The unexported is liable to happen at any time and at any place. Several beautiful sunset scenes will appear this month; also a strange phenomena. Venus, Earth and Mercury will combine their forces against Mars on and after the 15th inst. Therefore we may expect some very great disturbances during the latter part of the month. During this month almost unprecedented electrical storms will take place in the states of Pennsylvania, New York and New Jersey as well as in the North-

ern, Southern and Western states. We have warned you, now beware! Professor C. Coles.
