#### WEST SIDE EVENTS.

Louis Deinfelt Fell from New No. 16 School---Robert McAndrew Has \* An Arm løjured.

Louis Deinfelt, a hod carrier, fell fifteen feet at 8 o'clock yesterday morning from the new No. 16 school on Fairview avenue. He was picked up while in an unconscious condition and was carried into the structure. The Lackawanna ambulance afterward carried the injured man to the hospital. Deinfelt is suffering from the shock. No bones are broken, but there may be internal injuries. Last night he was resting quietly. His home is on Hickory street.

Shortly before the quitting hour yesterday afternoon, Robert McAndrew, a 17-year mule driver in the Central mine. was injured while at work. A loaded coal car passed over his left arm crushing the member and making amputation necessary. McAndrews' home is on Hampton street.

#### BUSINESS CHANGES HANDS.

A. S. Cleveland, a lower Lackawanna avenue produce merchant, sold his business interests Saturday night and on the night following left the city. Mr. Cleve-land's departure was the chief topic of talk in business circles in that part of the city yesterday. It is not now evident why Mr. Cleveland made this sudden move. Mrs. Cleveland was seen yesterday at her home on Rock street and stated that Mr. Cleveland had merely left town on a visit; that he would return in a few weeks and that his present abiding place is at Elmira. Cleveland is the man who gained some notoriety a few months ago when a young woman who had been employed by him, died under sad circumstances in New York.

#### HOME FROM THE CAMP.

The Ivy lodge club, composed of young ladies, yesterday returned from a two-weeks' outing at Lake Winola. The party consists of Misses May Belle Sweetzer, Margaret Hatton, Mary Harris, Edith Jones, Ethel Porter, Lela Porter, Pearl Porter, Gertrude Lloyd, Laura Neibell, Elsie Keller. Bertha Whettling, Ethel Rinker, Mattie Davis and Jennie Davis,

#### AN IMPROVEMENT.

With a lunch wagon on Jackson street and a promised peanut stand on Fellows' corners there seems to be no more present use for the West Side board of trade. The peanut stand is being erected on the Luzerne street side of the old brick building on South Main avenue. It is a wooden concern and the proprietor will be a brand new importation from Italy.

#### AGAIN THE BROWNS WIN.

The West Side Brown added another victory to their long string yesterday on the Central gronds when thee rack Reserves were defeated by a score of 18 to 12. The Browns' battery was Allen and Wallace. Both players border closely on "phenoms,

#### SOUTH SIDE NEWS.

Petition to Contest the Election of Alderman John J. Ruddy Quashed by Judge Archbald.

The Twentieth ward election contest is at an end and John J. Ruddy will continue to dispense justice for several years to come. The proceedings to oust Mr. Ruddy were brought by Prof. John E. O'Malley. Judge Archbald yesterday handed down an opinion quashing the petition for a contest on the ground that Michael E. Kelly, James M. Lavelle, John Wallace, John J. Bailey and Martin H. Lavelle, signers of the contest petition, had in reality not been sworn by Justice of the Peace P. F. O'Hera as might be inferred from reading the petition. JudgeArchbald's opinion in part is as

The certificate of the magistrate is prima facie evidence that the five petitioners required by the statute were sworn to the petition, but that is the full effect of it, and the testimony which has been taken dispels even this. This evidence overthrows beyond ugestion the certificate of the justice and that is all we have to meet

It is true there is some evidence which would go to show that the parties were before the magistrate, and had he been called to testify about the transaction, it might have put on a different appearance from what it now bears. But he was not called, and we must dispose of the case without such further possible enlighten-ment as he might be able to give. Taxing the case as it stands, we are forced to conclude that the parties were not sworn to the petition and that it does not therefore meet the requirements of the statute. The evidence convinces us that an essential statutory requirement has been omitted and the proceedings must therefore fall.

## TO REDUCE FLESH

In the large cities middle-aged wome throng the gymnasium and physical culture schools to learn how to reduce the too abundant flesh and keep off the rheu-matism which is often an accompaniment. The woman who does her own housework has most of her muscles called into exer-cise every day, and the danger with her is Barre, is visiting friends in this section. that they are over-exercised, still much relief can be received by sponging every
night after hard labor with the following inexpesive lotion: Two ounces spirits am-monia, two ounces spirits camphor, one and one-half cups sea sait, one cup alcohol, one quart rain water. The woman whose face and throat are too thin can remedy the thinness by frequent bathing in cold vater, and before retiring rubbing in some good cream. In rubbing, the wrinkles should be rubbed against, so as to rub them out, and it is as much in the rubbing as in the cream. A nice bit of soft white flannel, rubbed several times daily over the face, will be beneficial, and she whose double chin detracts her from her good looks can, by judiciously rubbing downward, get rid of the superfluity. Above all things, let the woman who desires to keep her youth and her beauty, cultivate a sweet disposition and her intellect at the same time.-Womankind.

## MALARIA AND WATER.

The most recent scientific authorities are of the opinion that malaria is a water-born disease. In vast malarial districts, it is not the air which the inhabitants breathe, but the water they drink which brings on the much-dreaded malanial fever. That this is the case in some sections of the land has been clearly proved by the immunity from fever of such fam-illes as depended on filtered rain water, and not on the wells of the country. It has also been noted that horses and other animals, brought into certain sections of the country, thrived well so log as they were housed and drank from the cistern supply of the barns, but sickened and died when left to wander in the fields, and drink from brooks and pools. If this should be clearly proven, it might be possible to stamp out one of the greatest evils of life, in some sections of the country. It is not a difficult matter to collect the rain water, in a clean cistern. It should be passed through a filtering medium, that is frequently renewed, as it is now known that a filter too long in use becomes one of the most effective means of contaminating the water it is intended to purify. The filter that is clogged up with impurities is far worse than none at all, and this that a filter too long in use becomes one is the condition of a great many eistern filters. As an extra precaution, even the cistern water eight to be boiled, poured in a clean earthen jar, and cooled in a pure atmosphere. The ice formed from contaminated water is almost as ob jectionable as the unclean water itself, as a large number of bacteria are undisturbed hy frost. Such a jar of boiled water should be daily renewed, as if it is left standing any length of time it will soon take on the same objectionable features as the water of the country.—New York Trib
