Indeed, for the very finest cider their solicitude is so great that none but the second or third year's fruit of the trees is used, and when the process of fermentation is reached nothing is left to chance. Chemists of great experience watch the changes in the lquor, and the skill with which the process is regulated is based on the knowledge gathered from long practice. The result is that some Normandy cider is equal in delicacy and flavor to fine campagne, and many cheap champagnes are simply sophisticated cider. This deception is very general. The great bulk of the cider made in Nornandy goes to the champagne districts and is used to make cheap champagne and to form the body of other vines, too. Port, it seems, can be made, and often is made, of cider, the color being imparted by logwood or redbeet juice and the flavor by the addition in very nice proportions of the root of the rhatany. This, it is said, is an imitation so excellent that the flavor would deceive a good judge of port
