HIGH SCHOOL '94 WINS.

An Exciting Football Contest at Alumni Park.

The football season of '94 was opened yesterday at Alumni park with an exciting contest between the original high school football team and the Alumni team of '94.

The game was a good one, considering the short practice the teams have had and despite the warm weather there was a spirit of enthusiasm and dash which is often lacking on days more favorable to the game.

The '94 team had all their old backs, while the line was composed chiefly of outside men and was much lighter than the opposing team. On the other hand the Alumni team was weaker back of the line.

The first half started with '94 kicking the ball. The Alumni team lost it on downs and from that time they did not have the ball in their possession during the half.

By long end runs the ball was rapidly pushed down the field and Murray carried it over the line for a touchdown. No goal was kicked. After the Alumni kicked off it was the same story and the ball was again carried over, this time by Brennan. Murray kicked a goal and after a few minutes more play time was called.

The second half was quite different from the first. The Alumni team had found their only hope of making any gain was by bucking the line and this they did repeatedly.

Both teams played a scrappy game, for the Alumni team a splendid bucking the line hard and the secondary tackling in good form. Brennan, Murray and Nealon, '94's backs, played a magnificent game, never failing to make long gains when given the ball.

PROF. COLES FOR SEPTEMBER. From Storms and Signs.

The vital forces of all human, animal and vegetable life will be a "high flood" nearly one-half of the whole month, for the first time in three years.

Jupiter, our financial stimulator, has come from behind the sun, and old red warrior Mars is side-tracked in sign Taurus.

The Bull. Therefore we may look for some very great changes in the weather, in politics and in business.

September may prove a phenomenal month. A sea of vaporous matter is now approaching the sun which will cause intense heat in some sections, followed by a cool wave, resulting in frost, hail and snow.

The planets are in a position this month to produce yellow lightning, which will be the greatest phenomenon ever witnessed, and will prove a great stimulant to mankind, animal kind and vegetable kind, for a short time only; for when the reaction sets in, it will affect vegetation, trees, etc., the same as the frost microbes do, and will cause the leaves to turn yellow long before their appointed time.

The meteor that we predicted would fall to the earth in a solid body, came on time and now stands mountain high, covering three acres of land down in Arizona. There will be another meteor fall this month.

Great political changes will take place and great preparations for the renewal of business matter will be begun. Several beautiful sunsets will take place—watch them all! The electrical currents are still moving eastward; should they make a sudden turn—as they are liable to do at any time—a terrible cyclone will sweep the Atlantic coast and extend far inland.

The Atlantic coast is in imminent danger of a miniature tidal wave. Earthquakes and strange phenomena, tidal waves and floods, riots and wars, accidents and terrible deaths among the savages, deadly heat and fatal epidemics, storms, etc., will carry thousands away to death.

Our Storm and Sign calendar shows when the storms are due this month, but the seasons matter over the renewal of business matter will be begun.
