You may open our mints to the free and unlimited coinage of silver until the mine owners of the of the United States shall be done by the people of the United States under the Stars and Stripes. "If there is a benefit in free coinage me on the street, saying "Sir, can you tell me where I can find a job?" I re-plied: "My friend, have you seen a job running loose in the United States since the repeal of the McKinley act?" who will receive it? Is there a man in the State of New York who has a piece of silver bullion as large as my fist to present at our mint to have coined at twice its real value? Not a man, Who are the men to benefit by free coinage? First the silver mina owners of the are the men to benefit by free coinage? "I can take the dollars of my country, gold or silver or paper, and go into the four corners of the habitable globe. I can transact business with all peoples, civilized, semi-civilized, and barbaric, without fear of discount, depreciation, discredit. I want the dollars of the United States to go around the world as the flag goes, honored and respected by all mankind. I can take the dollars of my country into every gold-standard nation of the earth, and I can buy as much in any home store of those countries as the most privileged citizen of the community can buy with the dollar his government gives him for use. I can take the dollars of my country into every free-silver coinage nation of the world, Mexico, China, Japan, South America, wherever you please, and I can buy with the best dollar his government gives him for use. I do not care to exchange any privilege with any man who is ready to give me two of his dollars for one of mine. I do not care to go across the line into Canada, as the Mexican comes across the line into the United States with an apology for his fifty-cent dollar. I do not wish to see the Goddess of Liberty placed upon the depreciated coin. When we put the American eagle on a piece of metal we ought to put him there with every tail feather spread, rampant for the glory of his country. We cannot afford to Mexicanize American man-hood, American muscle, or American money

CHEAP DOLLARS GO WITH POOR PEOPLES.

"It is contended by the advocates of ree silver that this is an issue between he gold standard and bimetallism. Sothing could be further from the States. The value of our egg output is he gold standard and bimetallism. Nothing could be further from the ruth. It is an issue between a moneary system which will give us sliver me and the existing monetary system, which gives us a practical binnet-allism. Every gold-standard country of the world has in circulation, side by ide, gold and silver and paper. The United States, Great Britain, Germany, France, and all of the great commercial, industrial, and progressive na-tions make gold the standard, and un-der it give to their people for daily use gold and silver and paper, all equal in and every dollar interchaneable with of rumors of war and threatened forvery other dollar.

"In every free-silver-coinage country gold has been driven out. It is not in use as money, and the only money in a those countries is silver money, at its buillon value and paper redeem-able in silver. The poorest dollar of any gold-standard country can be ex-changed for two of the best dollars of any free-silver country. I prefer to live in a country which can do business on count terms with the second balances on equal terms with the great nations of the world, rather than to live in a country whose standard of money has already gone down to the half-way point, with the prospect of still further depreciation.

"In the gold-standard countries of the world, with their joint use of gold and silver, there is more than five times as much money in circulation per capita as there is in the free-silver countries of the world. The United States, under the existing standard, has in circulation more than \$22 per capita, while Mexico, the most advanced free-silver nation, has in circulation but \$4.50 per capits, all in sliver worth at the pres-ent time about fifty-three cents on the ollar-no, not fifty-three cents, for its silver agitation has done more to with-lue has fallen two cents since the draw capital, to dwarf investments, to value has fallen two cents since the Chicago convention was held, and the people of Mexico are preparing for a
