NOT RIGHT TO SURRENDER. F. W. Zizleman, however, was of another mind and in a stirring speech turned the tide in favor of continuing the tight. After all the trouble that the union has gone to, he said, it was not right to surrender. Circulars had been sent aut asking other companies to help Scranton, delegates had been instructed in many parts of the state to vote for Scranton, the '37 convention had been virtually promised to Scran-ton at the last session in Reading. All ton at the last session in Reading. All these things taken into consideration, he could not see how Scranton could he could not see how Scranton could gracefully give up the fight now. The handicap of a chief being against them should not discourage them, he said. Chief Hickey was not omnipotent and maybe if the truth was known was not a better fireman than many of themselves. The firemen had gotten along without him on former oc-casions and could, he belleved, do very nicely without him now.

The dissensions had hurt the move-ment, he admitted, but not to the ex-tent some were led to believe. Phila-delphia is not with Scranton, but that may possibly be a good thing for Scranton, as the rest of the state is generally opposed to anything Phila-delphia favors, because there is a feel-ing that Philadelphia wants to run the deiphia tayors, declase there is a feet-ing that Philadelphia wants to run the conventions and that the other cities should combine against it. Mr. Sea-mans and other prominent members who had refused to affiliate themselves any longor with the union were no

a man reaches the disease. There are two conditions, alcoholism and dipsomania. Alcoholism is that state where one has an uncontrolled desire to in-dulge without any restraint whatso-ever in liquor. A dipsomaniac is one who may be sober for a year, and at the end of that period find himself driv-or by some int orbit. the end of that period find himself driv-en by some intangible, uneasy and rest-less feeling to get drunk. He stays drunk for a few days or a week, and then quits for another year. He goes on periodical drunks, and it becomes true that after a few years the intervals between sprees grow shorter, until at last he sinks into a condition of inebriety or alcoholism. This is where the disease exists in its full sweep, and where it requires be

It was only in the matter of asphalt that there was any misunderstanding. The specifications called for "Trinidad Pitch Lake asphalt or asphalt proven equally as good."
