NEW RAILROAD TO DALLAS.

First Train Will Be Run Over It About December 1.

The Wilkes-Barre and Northern railroad between Luzerne borough and Dallas, is about completed and will be opened for traffic on the 1st of December. The road will be run in the spring and the line put through to Harvey's lake. It was at first intended that it should be an electric road, but the promoters were unable to secure the right of way through several tracts of land and after several futile efforts to secure the route desired the idea of an electric road was abandoned. The road was then reorganized and named the Wilkes-Barre and Northern railroad, instead of the Wilkes-Barre and Harvey's Lake Electric road.

A charter for building the road was applied for and granted last February. The contract for grading the road was awarded to Contractor Robert Mitchell of Plainville, and as soon as spring opened work was begun. The time schedule will be arranged so as to connect with the Luzerne and Wyoming Traction company on the Luzerne borough line. The company will also build a station at Dallas for the accommodation of passengers. It is believed that the road will ultimately be operated by electricity.
