124-126 Wyoming Ava.

A week of unparalleled bargains. We have purchased within the past ten days thousands of dollars' worth of desirable Dry Goods, Cloaks, Millinery, Etc., at less than cost of manufacture on account of an over-stocked market, Manufacturers had to muload at any price for cash unload at any price for eash to meet their obligations. We will give the public the benefit of our great purchase. Befit of our great purchase. Below we mention a few of our great values.

15 pieces black figured Dress Goods; would be cheap at 25c. Leader's price, 19c.

5 pieces 50-inch Serge, in black, only 25c, grade. Leader's price, 14c. 75 pieces assorted Plaid Dress Goods;

25 pieces assorted Fancy Dress Goods; none in the lot worth less than 40c. Choice of any, 29c.

25 pieces Extra Fine Quality Scotch Cheviot and Fancy Dress Goods; those goods were bought to retail at 75c. Lender's price, 49c. pieces plain and brocaded Black Silks, loc. grade. Leader's price,

12 pieces plain and brocaded Black Siiks, 65c. grade. Leader's price, 49c.

5 pieces Black Failte. 24-inch silk, 65c. grade. Leader's price, 46c. One lot of Fancy Silks in printed warps and colored striped; price has been 75c. Lender's price now

26 Ladies' Beaver Jackets, box fronts,

75 Children's Reefers, sailor collars, braid trimmed, sizes, 4 to 14; worth \$3.00. Leader's price, \$1.99. 10 dozen Ladies' Flannel Waists, red, blue and black; worth \$1.50. Leader's price, 94c.

30 dozen Ladies' Fleece Lined Com-bination Suits, in all sizes worth \$1.00. Leader's price, 49c.

48 Cozen Ladies' Jersey Ribbed Vests and Pants, fleece lined, worth 25c. Leader's price, 15c. One case Men's Natural Wool Shirts

and Drawers; superior quality; cheap at \$1.00. Leader's price, 69c. 5 gross Daisy Buttermilk Soap. Lead-er's price, 5c, for a box of 3 cakes. 25 dozen Ladies' fine quality Black Cashmere Glaves, sizes, 514 to worth 25c, Leader's price, 14c, to 814:

ORB OF DAY.

The following notes are compiled from a lecture delivered at the Drexel institute recently by Professor Charles A. Young, of Princeton university:
The earth derives 59 per cent, of its energy from the sun.

Althoric showers give rise to the greater proportion of the remaining 1 per cent. The stars also feelily help.
Our sun is but one of thousands of others of equal or greater magnitude. Wind power is derived from the unsqueit heating of various portions of the sarris to your heating of various portions of the sarris rays.

Water power is derived from the evanguation of water by the sun's heat and its deposition on highlands in the form of snow or rain.

He spoke of the grass and flowers trees;

Of twenty-mile runs and centuries;

And Maud forgot that no trailing got was over her bloomers hanging down. snow or rain.

Plant life is directly dependent on the sun for light and heat.

Muncular power is derived from the consumption of food, either animal or vegerable, the energy of which is directly traceable to the sun.

Steam power is the stored-up energy of the sun's rays in past ages in the form of coal-bottled sunshine, as it has been suich leads to be sunshine.

Steam power is the stored-up energy of the sun's rays in past ages in the form of coal-bottled sunshine, as it has been suich leads and the finest steam of the sun sign.

So that she'd cease to borrow mine."

the sun's rays in past ages in the form of coal-bottled sunshine, as it has been called.

The distance of the sun from the earth is \$3,000,000 million miles.

The earth and moon could be placed inside the sun if it was hollowed out, without disturbing the present relations, and the moon would revolve at a distance about half way to the surface.

The determination of the distance of the sun is known to be accurate within one-quarter of 1 per cent.

The sun's distance is equal to about 12,000 times the diameter of the earth.

A train running at 65 miles an hour would reach the sun in 175 years.

At the rate of two cents a mile, the fare to the sun would be about \$1,500,000.

The light-year is the astronomical unit of stellar distances.

The apparent diameter of the sun is about one-half degree.

Suns to the number of 710 could be arranged around the circle of the horizon. If the energy of the sun is only radiated from it in the direction of other material bodies, and not in all directions, the shrinkare theory affords a satisfactory explanation of all known phenomena.

A base ball compared to a sphere 27 feet in diameter gives the relative size of the earth and sun.

The sun's buik is 1,300 times that of the earth.

The mass of the sun is 330,000 times that of the earth.

The mass of the sun is 330,000 times that of the earth.

The force of gravity at the sun's surface is 21 lines is 21 lines and locally and the hill.

And saw Maud Muller standing still.

And saw Maud Muller standing still.

"An prettier face and a form more fair live seldom gazed at, I declare!

"Would she were mine, and I today could make her put those bloomers ways!"

But he thought of his sisters, proud and cold, and he shuddered to think how they would receive a will only the feet of the sun is an local may and the clerk of the sun is an local may and the clear of the sun is an local may and the clear of the sun is an local may and the clear of the hill.

The magnetic feet and more relations, and the health had a sun of the hill had the hill

The mass of the sun is 330,000 times that of the earth.

The force of gravity at the sun's surface is 27 times greater than the force of gravity on the earth.

An average sized person would weigh a ton on the sun's surface.

The average density of the sun is only a quarter of that of the earth.

The present accepted theory was advanced by Helmholtz in 1853. The shrinkage of the sun's surface gives rise to heat in the same manner as any falling body does, as, for instance, when a heavy weight is dropped from a great height.

The average density of the sun may be compared to the density of water.

We cannot see the sun itself, we see only the cloud or vapor shell that covers it, like the mantle of a Weisbach burner. We never get nearer than a hundred miles optically of the moon, even with the most powerful telescopes.

The temperature of the sun's surface has been measured and determined to be between 12,000 and 20,000 degrees Fahrenheit.

The most accurate determinations of the

heit.

The most accurate determinations of the sun's temperature, made by Wilson and Gray, in Ireland, place it as 14,000 degrees

Tabrenheit.
This termination is correct within 1,000 This termination is correct within 1,000 degrees.

At very small distances within the sun's surface the temperature rises just as it does in the earth.

The high temperature of the sun is not maintained by combustion; of this astronomers are sure. If the temperature was maintained in this way the sun would have burnt out long ago. Shrinkage in size is the now accepted theory of the source of the sun's heat and light.

The rotation of the sun in a magnetic field has been advanced as a possible cause of the sun's heat. This is disproved by the fact that if it were so the sun's rotation would have been so impeded as to have completely stopped within 500 years.

The theory of meteors colliding with the sun, an old and once popular idea advanced in accounting for the sun's heat, is now rejected.

If the sun contracts 200 feet in diameter each year it would take something like 700 years to detect it with our largest it lescopes.

heat for every square metre of surface, or about 24 horse power of energy for each square metre.

The radiation of the heat from the sun is not eternal; it had its beginning and will have its end.

If the sun radiates light and heat in all directions it cannot be more than locations of the sun radiates. At the present rate the sun will continue from seven to tifteen millions of years, but the end will surely come.

The actinometer is one instrument by which the sun's heat is measured. It balances the radiation from a body at a known temperature against a beam of sunshine. An allowance has to be made for the absorption by the earth's atmosphere.

The meldometer and radio-micrometer

tropical countries where fuel is scarce, the Ericsson engine might be commercially useful.

The sun consists of three parts, the central portion, or nucleus, which is gaseous, but rendered viscous under the enormous pressure and high temperature; the photosphere of incandescent metallic vapors, and the corona, which is only observable during the time of total eclipse. Among the elements most characteristic of the sun are hydrogen, the recently discovered helium and fron.

The corona consists of a gas as yet undiscovered on the earth, but known to exist in other stars. It is characterized by a line in the gree spectrum.

Sun spots are comparatively dark patches upon the sun's surface.

It is believed that the sun spots are cavities in the surface rendered dark by some cooling action.

The san's surface is so intensely bright that an electric light held against it would look black.

Sun spots travel across the sun's surface in traight band. During other definite seasons of the year sun spots travel across the sun's surface in traight band. During other definite seasons of the year they travel across the surface in traight band. During cher definite seasons of the year they travel across the surface in traight band, During other definite seasons of the year they travel across the surface in curves.

Sun spots occur in greater or less numbers, new ones forming and old ones disappearing constantly. There is a maximum number at periods about eleven years apart, according to observations made continuously during the presen century.

Attempts have been made to connect the

egular price, 1212c, Leader's price,

made continuously during the presencen-tury.

Attempts have been made to connect the outbreak of sun spots with almost every-thing from financial crisis and the price of wheat to outbreaks of cholera.

The only real concordance between sun spots and terrestrial happenings is the fact that magnetic storms are more nu-merous and vary in intensity in a re-markable manner with the size and num-ber of sun spots. ber of sun spots.

These magnetic storms and sun spots may be related to each other, in that they may both be caused by the same agency, and not by each other's agency.

MAUD MULLER.

Maud Muller, on a summer's day, Mounted her wheel and rode away. Singing, she rode, and her merry glee Frightened the sparrow from his tree. But when she was several miles from Upon the hill-slope, coasting down. The sweet song died, and a vague unrest And a sort of terror filled her breast-A fear that she hardly dared to own, For what if her wheel should strike a stone!

The Judge scorched swiftly down the Just then she heard his tire explode! He carired his wheel into the shade Of the apple trees, to await the maid. And he asked her if she would kindly loan Her pump to him, as he'd lost his own.

She left her wheel with a sprightly jump, And in less than a jiffy produced her pump. And she blushed as she gave it, looking

At her feet, once hid by a trailing gown. Then said the Judge, as he pumped away, ""Tis very line weather we're having to-day,"

He spoke of the grass and flowers and And Maud forgot that no trailing gown Was over her bloomers hanging down.

"My father should have a brand-new

Of the costliest make and the finest steel. "And I'd give one to ma of the same de-

And then her bloomer brought her joy! She cut them down for her oldest boy. But still of the Judge she often thought, And sighed o'er the loss that her bloom-ers wrought,

Or wondered if wearing them was a sin, And then confessed: "It might have been,"

Alas for the Judge! Alas for maid! Dreams were their only stock in trade. For of all wise words of tongue or pen. The wisest are these: "Leave pants for men!"

Ah, well! For us all hope still remains— For the bloomer girl and the man of brains,

And, in the hereafter, bloomers may Be not allowed to block the way! —Buffalo Commercial.

A LITTLE BOOK.

I picked it out among the lot Of scattered books upon the stand; Half-worn, untreasured and forgot-Something impelled, I knew not what, As I their the dusty titles scanned To pick it out among the lot Of books for sale at second-hand.

"Love Poems" were the only words,
In faded gilt upon the cover:
The same sweet songs our mothers read
Of skies and flowers and lilting birds—
It was a nice discover
To read the lyrics that had stirred
The real old-fashioned lover.

"Old-fashioned!"-that had slipped my pen; Forgive the word I've written, Lovers today are much as then.
Maidens are maidens, men are men,
And girls' hearts will be smitten
While love shall last; and, again,
Why-lovers get the mitten.

anced in accounting for the sun's heat, now rejected.

If the sun contracts 200 feet in diameter sch year it would take something like to years to detect it with our largest lescopes.

It he sun was enclosed in a mass of the sun was enclosed in

MARKETS AND STOCKS

Wall Street Review.

New York, Nov. 5.—Today's stock market was a comparatively tame affair when contrasted with the exceptional activity and wide fluctations of yesterday. The transactions aggregated only 353,277 shares. Taken altogether the tendency was toward a lower range of values: \$\int 1\$ the fact that several stocks displayed great strength at inof values of the fact that several stocks dispiayed great strength at intervals they did not prevent almost the entire list from closing under last night's final quotations. The most formidable attack of the day was made soon after delivery hour when rumors gained currency in the stock exchange that there was some doubt about the electoral vote of Indiana and Kentucky and that Consul General Lee had made a report to the president concerning. and that Consul General Lee had made a report to the president concerning the Cuban situation which would be followed by a warlike policy on the part of the administration. Whether true or false these stories exercised an adverse influence and the market yielded under pressure to sell for both long and short accounts. Sugar broke over five points to 116%. It finally rallied to 117%. In the earlier trading Tebacco had jumped from 79% to \$4 on the announcement that the directors had declared a cash dividend of 4 per cent. on the common stock. The stock afterwards broke to 78. Chicago Cas for a time was another strong feature. It rose from 75 to 77% on statements which were believed to emanate from trustworthy sources that emanate from trustworthy sources that the directors would resume dividends either this week or next. The stock finally receded to 75% 676. In the afternoon prices showed declines from last night's closing of ½ to 3 per cent, in the general run of stocks. Manhattan was an exception, rising to 97%. The market closed weak at a recovery from the lowest of % to 1 per cent. The net changes show losses of 164 per cent.

SHERIFF'S SALE

Valuable Real Estate

SATURDAY, NOVEMBER 14th, 1896.

By virtue of sundry writs of Fieri Facias, Levari Facias and Venditioni Exponas, issued out of the court of common pleas of Lackawanna county, to me directed, I will expose to public sale by vendue or outery, to the highest and best bidders, for eash, at the court house, in the city of Scranton, Lackawanna county, on SATURDAY, the FOURTEENTH DAY OF NOVEMBER, A. D., 1886 at 10 o'clock in the forenoon of said day, all the right, title and interest of the defendants in and to the following described lots, pieces or parcels of land, viz:

scribed lots, pieces or parcels of land, viz:

No. 1.—All the right title and interest of the defendant, Mrs. S. W. Edgar, in and to all the following described lots, pieces and parcels of land situate in the city of Scranton, county of Lackawanna, and state of Pennsylvania:

First—All that piece, parcel, or lot of land situate, lying and being in the city of Scranton, county of Lackawanna and state of Pennsylvania, described as follows, to wit: Beginning at a stake at the southwest corner of lot No. II in block "D" of Von Storch's village plot as laid out by H. J. Phillips and on the northeast side of Breeker (formerly Center) street, thence running north lifty-one (al) degrees lifteen (15) minutes west along the northeast side of said street lifty (50) feet to a corner; thence south lifty-one (61) degree fifteen (15) minutes east along line of lot No. seven (7) in said plot, ninety (90) feet to a corner, to line of said lot number eleven (II); thence south thirty-eight (38) degree forty-five (45) minutes east lifty (50) feet to a corner, to line of said lot number eleven (II); thence south thirty-eight (38) degree forty-five (45) minutes east sifty (50) feet to a corner, to line of said lot number eleven (II); thence south thirty-eight (38) degree forty-five (45) minutes west along the line of said lot ninety (90) feet to the place of beginning; being lot No. nine (9) in the block and plot aforesaid; improved with one two-story frame dwelling house and outbuilding thereon.

ALSO,

All that certain lot, piece or parcel of land situate in the city of Scranton, county of Lackawanna, state of Pennsylvania, described as follows, to wit: On the northeast forty-five (45) feet more or less in width by Deacon street; on the northwest one hundred and thirty-nine (139) feet more or less in depth by the middle garden lot; on the southwest forty-five (45) feet more or less in whith by the transverse line; and on the southcast one hundred and thirty-nine (139) feet more or less in depth by the southcast one hundred and thirty-nine (139) feet more or less in depth by the southcast one hundred and thirty-nine (139) feet more or less in depth by the southcast rily line of the "Homestead," being the same lots of land described as "purpart F" in the return of the jury of inquisition in the proceedings in partition had in the orphans court of Lackawanna county of the estate of Euphemia Wint, deceased, No. 240 Series A, which said purpart was awarded to Cornelia B. Edgar.

Seized and taken in execution at the suit of Cleland, Simpson & Taylor vs. Mrs. S. W. Edgar, Debt \$22,15, Judgment No. 105, May Term, 1895. Vend ex to November term, 1896.

ALSO,

ALSO,

ALSO,

No. 2.—All the defendant's right, title to, and interest in the following described piece or parcel of real estate situate, lying and being in the Borough of Dummore, county of Lackawanna and state of Fennsylvania, bounded and described as follows, to wit: Beginning at a stake on a street in line of A. E. Silkman's land, thence southeast along said A. B. Silkman's land, thence southeast along said alley thence northeast along said alley the feet to a stake; thence northeast 157 feet to the aforesaid street; thence southwest 167 feet to the aforesaid street to feet to the place of beginning. Containing about one-half (19) of an acre of land, more or less, coal and minerals reserved. Being same premises conveyed to Albert Butterman by deed dated August 30th, 188, fecorded in Lackawanna county in D. B. No. 35, page 426, etc. All improved with a two-story and basement single dwelling house, a double house arranged for two families and out-buildings thereon.

Second—All the right, title and interest of the defendant in and to all the surface or right of soil of that certain lot of land situate in the Fifth ward of the city of Scranton, county of Lackawanna, and state of Pennsylvania, described as follows, to wit: Being 50 feet in front on the southeasterly side of Sherman avenue, and 25 feet in depth, and known as lots Numbers 19 and 20 in block No. 26, according to a plot, or map, entitled Price & Panconst's addition to the city of Scranton, coal and minerals reserved. All improved with a two-story frame dwelling house and outbuildings thereon.

Seized and taken in execution at the suit of John S. Bortree vs. Albert Butterman, Debt 31.795, Judgment No. 63, January term, 1896, B. fa. to Nov. term, 1896.

HULSLANDER & VOSBURG, Attys.

HULSLANDER & VOSBURG, Attys.

No. 2.—All the right, title and interest of the defendant, Grace Franey, administratrix of the estate of Michael Franey, deceased, in and to all those certain lots of land situate in Scranton, Lackawanna county, Pennsylvania, bounded and described as follows: No. 1—Commencing at a corner of an alley on the south side of Brick avenue being forty-two (42) feet front on said avenue, and forty-two (42) feet in rear, and being one hundred and fity (50) feet in depth and including all the land and no more lying between the alley and the lot owned by the estate of A. P. O'Donnell, familiarly known as "Happy Jerry," coal and minerals reserved. All improved with a two-story frame dwelling, barn and outbuildings thereon. No. 2—All the surface or right of soil of all that lot of land situate in city of Scranton, county of Lackawanna, Pennsylvania, situate on Nicholson street in the Second ward of said city. Said lot is on the southerly side of street known on Pierce's map as Nicholson street in the Second ward of said city. Said lot is on the southerly side of street known on Pierce's map as Nicholson street on map made under direction of the city of Scranton is called Thompson street, said lot is designated in said Pierce's map as lot No. twenty-two (22) and is fifty (50) feet front and rear and one hundred and fifty (50) feet deep. No. 3—All the surface and right of soil of and to all that lot of land situate in said city of Scranton, county of Lackawanna, Pennsylvania, viz: two lots on southerly side of Nicholson street and known as lots Nos, seventeen (17) and cighteen (8) each lot being lifty (50) feet front and rear and one hundred and fifty feet deep.

Scized and taken in execution at the suit of William Dunn vs. Grace Francy, administratrix of the estate of Michael Francy, deceased, Debt \$1,600, Judgment 134. Nov. term. 1891. Fi. fa. to Nov. term, 1898.

ALSO

ALSO

No. 4.—All the right, title and interest of the defendant, M. O. Webster, in and to all that certain lot of iand lying in the Borough of Dunmore, county of Lackawanna and state of Pennsylvania: Beginning at a corner of lot on Mill street, number lifty-live, as appears on map of Pennsylvania Coal company's lands, running in a northerly direction one hundred ad forty-four feet to an alley; thence in a westerly direction along said alley fifty feet; thence in a southerly direction one hundred and forty-four feet to a corner on Mill street; thence in an easterly direction along Mill street to the place of beginning. Being fifty feet in front and one hundred and forty-four feet deep, and being lot No. is on map of Pennsylvania Coal company's lands, excepting and reserving all coal and minerals beneath the surface. All improved with a two-story frame dwelling house, with an "L" attached on the front and a two-story frame house and a shanty on the rear and outbuildings thereon.

Seized and taken in execution at the suit

Buffalo, Nov. 5.—Cattle—Market steady to strong: choice veals stronger; others steady. How—Market active: Yorkers, 82.7003.75: mixed packing, \$2.5003.70: medium, \$2.603.70: pigs, \$3.75: roughs, \$3.10a 3.25. Sheep and Lambs—Native lambs easy; best lambs, \$4.50: best sheep, \$2.50: Canada lambs, dull, 5a10c. lower; best lambs, \$4.50:

Oil Market.

Oil City, Nov. 5.—Option oil was not quoted today; credit balances, 117.

"I was afflicted with pains in my head and back. I had a tired feeling and general languor. I decided to try Hood's Sarsaparilla, which was highly recommended, and it proved of great benefit." H. C. Robinson, 72d and Binst Aves., Sta. W., Philadelphia, Pa.

Hood's Pills cure all liver ills,

No. 6.—All the right, title and interest of the detendant, Henry Doyle, in and to all the surface or right of soll of all that certain lot of lind situate in the township of old Forge (now borough of Taylor), county of Lackawanna and state of Pennsylvania, bounded and described as follows: Reginning at a point on northerly side of Sampson street at intersection of said street with Center avenue, thence easterly along Sampson street 50 feet to corner of lot No. 2; thence along line of said lot in northerly direction 150 feet to a corner; thence in a westerly direction at a right angle to said last mentioned line 50 feet to Center avenue; thence in a southerly direction along said avenue 150 feet to Said Sampson street, place of beginning. Being lot No. 1 in block C of a plot of lots of New York, Susquehanna and Western Coal company, in village of Rendham, Lackawanna county, Pennsylvania.

What Sarah Bernhard says

produces the above results in 30 days. It acts powerfully and quickly. Cures when all others fail. Young men will regain their lost manhood, and old men will recover their youthful vigor by using REVIVO. It quickly and surely restores Nervousness, Lost Power, Failing Memory, Wasting Diseases, and all effects of self-abuse or excess and indiscretion, which unfits one for study, business or marriage. It not only cures by starting at the seat of disease, but is a great nerve toole and blood builder, bringing back the pink glow to pale checks and restoring the fire of youth. It wards off Insants and Consumption. Insist on having REVIVO, nother. It can be carried in vest pocket. By poster, it can be carried in vest pocket. By poster, it can be carried in vest pocket.
