Paine's Celery Compound.

There is one true specific for diseases arising from impure blood and a debilitated nervous system, and that is Paine's celery compound, so generally prescribed by physicians. It is probably the most remarkable remedy that the scietific research of this country has produced. Prof. Edward E. Phelps, M. D., LL. D., of Dartmouth college, first prescribed what is now known the world over as Paine's celery compound, a positive cure for dyspepsia, biliousness, liver complaint, neuralgia, rheumatism, all nervous diseases and kidney troubles. For the latter Paine's celery compound has succeeded again and again where everything else has failed.
