TROUBLESOME ELECTION BETS Light Shed on Some Dark Points in Connection with Recent Election.

From the Philadelphia Press. Though the presidential election is settled beyond controversy and per-adventure, McKinley having had the rare good fortune to secure a majority rare good fortune to secure a majority in the electoral college, a majority of the states and a majority of the popular vote, the gentlemen who bet on the election have some difficulty in determining who should have the stakes. At least we infer so from the large number of letters received here, and apparently at other newspaper offices, asking for a decision on the disputes which have arisen as to the proper disposition of the stakes.

osition of the stakes.
The terms plurality and majority give a good deal of trouble in some ouar-ters. This is not to be wondered at, since the word majority is often used where plurality is meant, and we have seen newspaper decisions to the effect that a bet that a candidate would win by a certain majority is rained if the by a certain majority is gained if the candidate has a plurality of that num-ber of votes. A cournity of votes in elections is the excess which the highest candidate has over the next high-est. A majority is the excess which the highest candidate has over all the the highest candidate has over all the other candidates combined. Major McKinley's apparent popular plurality over Bryan with a few states still to hear from officially is 725.448. His apparent popular majority over the votes of all the other presidential candidates combined is 273.448. He carried twenty-three out of forty-live states and his majority in the electoral college is \$77.

Those who bet that McKinley would have 300,000 majority or durality in Pennsylvania have lost their bet. Mc-Kinley's plurality in this state is 255, 670. His majority over all is 262,243. The tables of the election returns in Pennsylvania give McKinley and Hobart 728,300: Bryan and Sewall, 427, 427; Bryan and Watson, 6,103. This and Watson, 6,003. This makes McKinley and Hobart's plurality over Bryan and Sewal 201.173. But Bryan is catified to have the Bryan and Watson vote placed to his credit. The electors on the Bryan and Watson the Bryan and Watson the Bryan and Watson the Bryan and Sewall ticket. Though they occupy separate columns on the bliot the distinction was intended only to catch Populist votes for the service of the control of the service of the columns of the ballot the distinction was intended only to catch Populist votes for the service of the columns of the ballot the distinction was intended only to catch Populist votes for the service of the columns of the ballot the distinction was intended only to catch Populist votes for the columns of the ballot the distinction was intended only to catch Populist votes for the columns of the ballot the distinction was intended at Bath. The other two gunboats of similar displacement authorized by congress are the Wheeling and Marion the ballot the distinction was intended only to catch Populist votes for
Bryan and does not operate in the
counting, since the scattered votes for
the same electors must be bunched together, and if they are Bryan electors
their total vote should be placed to
Bryan's credit.

as in Pennsylvania. The Acts like and Hobart ticket has a plurality of 51,199 over the Bryan and Sewall ticket. But the Bryan and Watson ticket polled 2,615, and as it had, as we understand, exactly the same electors as the Bryan and Sewall ticket, they will be added together to determine the total vote of the Bryan electors, reducing McKin-ley's plurality over Bryan in Ohio to 48,494. McKinley carried Kentucky by a small plurality—258. Even though through blunders in marking the bal-lots Bryan did secure one of the thir-teen electors, the state must be cred-tical to McKinley store. ited to McKinley, since he has a plurality by comparing either the vote for the highest electors or the average vote

for all the electors on both tickers, Election betting is contrary to good morals and it operates to disfranchise the betters in some sates. Nevertheless, so far as such bets beget a thirst for accurate information and close definitions, they may not be without a certain educational value.

There being a fight be-tween that organization and the can-vassers' union of Cincinnati, the appli-cation was referred back to the grievance committee with instructions to give the conversers a bearing.

LATHE UNION CONTEST. The grievance committee reported on the contest between the Lathe union and the machinists of Toledo without recommendation on the question of seprecommendation on the question of sep-arate organization for the lathe men. It is claimed that the lathe men are naccinists, and should belong to the Machinists union, and that the charter of the lathe men should be revoked. The Lathe union of Toledo had a char-ter from the American Federation of Labor trior to the machinists. After a long discussion on the subject, the a long discussion on the subject, the matter was referred, for a report, to the delegates in the convention from the

Tours to California.

California has been most fittingly termed the "Lialy of America." All the delicious baim, the cloudless sky, and the rich verdure of the great European pointsula are duplicated in this rope an peninsula are duplicated in this suncy land of the Pacific. Here nature basks in the sunzhine of her own beauty; and here she has established her own sanitarium, where sternal spring inspires everlasting youth. With the snow-mantled peaks of the Sierras upon the one hand, the calm Pacific with its soft breezes upon the other and a veritable paradise of flowers, fruits, and plants between, man can find and needs no lovelier land. To visit such a country is a privilege, a blessing.
