CONFLAGRATION AT WILKES-BARRE

St. Stephen's Protestant Episcopal **Church Totally Destroyed.**

THE FIRE SMOULDERED ALL NIGHT

One of the Most Beautiful Churches in the Valley Burned to Ashes. Some of the Valuable Furniture Saved -- Loss \$50,000 -- The Westmoreland Cinb House Also Scorched.

Wilkes-Barre, Pa., Dec. 25 .- St. Ste phen's Protestant Episcopal church, the most fashionable church, situated on South Franklin street, was destroyed by iire early this morning. The fire having caught from the heating apparatus in the basement. It must have smouldered all night,

as when discovered the whole interior was ablaze. The interior was very beautiful. Only the brick walls remain standing. The church was valued at \$90,000 and was four years ago re-modeled at a cost of \$20,000. The loss is \$50,000. There is an insurance of \$30,-000. The great pipe organ and a dozen memorial windows and tablets were also destroyed. Only the silver com-munion service was saved. The fire shipped one building and then caught the building occupied by the aristocratic Westmoreland club,

Some of the most expensive furniture was saved but the loss to the building and furniture will be \$20,000.

AY HAVE BEEN THE RUBBER MAN

Serious Charge Made Against a Clergyman at Rochester.

Rochester, N. Y., Dec. 25.-The case of Rev. David Kirkpatrick, pastor of the Second Universalist church of this who was arrested on the charge of impersonating an officer of the law continues to be the topic of conversa-tion. According to the police, how ever, a much more serious accusation will probably be made against the reverend gentleman, whom they suspect being no other than the so-called "rubber man" who for some months has been a terror to unescorted women after nightfall in the northwestern part of the city.

It was the habit of this person to roam the streets clad in a long rubber coat, slippers and slouch hat, and ac-cost and in many cases follow as far as their doors any woman he met. Though frequently pursued by indig-nant husbands and brothers, the fellow invariably managed to elude pursuit. Policemen in plain clothes were detailed to catch him, but so cautious were his movements that he never appeared except when assured that he could approach his victims without

fear of interference. Mr. Kirkpatrick was arrested on the complaint of Mrs. Annie Adwen, who complained that he had on numerous occasions accosted her on the street after dark. The clergyman admitted the accusation, but made the extraordinary excuse that he had similarly accosted about twenty-five other women for the purpose of obtaining matter for a course of sermons which he proposed to preach upon the subject of violation of the seventh commandment. He indignantly denied that he was guilty of any of the offenses charged against the "rubber man."

The police, however, declare that they are in possession of information which justifies them in supecting that he is indeed the night prowler who for so many months has been a terror to the women of Rochester. They scout the idea that the preacher was honestly influenced by the desire to glean ma-terial for his sermons.

1860, with a crew of men, he explored the copper regions of Lake Superior, and sunk a shaft which became worth \$100,000. Mr. Bennett retired to his farm about fifteen years ago and has lived there since. He is nearly 90 years old, rugged and healthy. Mrs. Townsend, like her brother, left home when 7 years of age, and suc-ceeded in getting through the world to womanhood, when she married and came with her husband to Clayton, Mich., and resided there in ignorance of her brother's presence only a few miles away. 1869, with a crew of men, he explored

miles away. The meeting resulted from reminis cences by William Darken, of New York, to Mrs. Townsend's son, which caused Mr. Townsend to call on Mr. Bennett, when it was learned that he was his uncle, and the long lost sister and brother were again united.

New York, Dec. 25 .- It took Peter Maher just one minute and a half in he drst round to send Steve O'Donaell from Australia down and out this afternoon at the Greater New York Athletic club, at Coney Island, former-ly the Seaside Athletic club. The men were matched to go twenty rounds or more, which practically meant a finish fight, but Maher saved the manage-ment from infringing on the Horton law by giving the Australian his quietus with three left hand punches. Maher also sent a right hander to the head, but it was too high to do any damage, O'Donnell's solitary contribution was a very short left which opened the battle and barely grazed

Peter's breast. The last time the pair met in the Empire Athletic club, at The tests take only a few moments, and the matter has been so simplified that it is now possible for a doctor to send down a drop of dried blood on a card and have it examined. SURE TEST FOR TYPHOID There is No Longer Need for takes a fee, and gives away his whole

the Long Delays in Determining the Dread Disease. From the New York Herald.

Little is now spoken of in the realm

of bacteriology as being impossible or beyond the reach of science, but the latest discovery in that branch of medicine has aroused the whole profession and set every important laboratory in the country at work. It is of far more interest to the world at large than most scientific discoveries seem, for it is of immediate benefit to the public,

is of immediate benefit to the public, and the new knowledge can at once be put to practical uses. What has been found, in brief, is a test for the early diagnosing of typhold fever, the dis-case that so frequently baffles physi-cians and is often not recognized as ty-phoid until it is well advanced. The new test, known as the blood test, has never once tailed in the hundreds

has never once failed in the hundreds of experiments made in this country and abroad, and now is an accepted scientific fact. Within the last few days the bacteriological laboratory of the board of health of this city has set the that region. scal of confirmation on this new sys-tem of typhoid diagnosis by announcing that they have made this fall more than

160 tests, and all with success. ACCOMPLISHED IN NEW YORK.

In all of these experiments typhold, if there be typhold, shows out clearly and unmistakably. So far as this city is concerned, the practical advantages of the discovery are that the blood of any suspected typhoid case will be ex-amined by bacteriologists of the health board and a report on it made at once.

"Doctors, for years past, have talked about "typhoid symptoms," and many treatises have been written explaining and expounding them. Many of these symptoms are so marked and so important that they have been called "characteristic." But the entire medical pro-tession has always found that these symptoms were only of value when a great number of them were present at once. One, two or three might occur, and yet another and totally different

"SYMPTOMS" ALMOST USELESS. For example, "rose spots" is one of the most important symptoms, but it is absent in fully thirty per cent of ty-phoid cases, and seldom appears in any event until the eighth or the tenth day

DUNKARDS TRY TO BUY A COUNTY.

Plan to Establish a Government Their Own in Indiana.

Ligonier, Ind., Dec. 25 .- The religlous society known as Dunkards, is endeavoring to purchase the entire region comprised within Brown county, in this state, to which its members will emigrate to establish a government of their own according to their peculiar notions.

C. E. Everett, of Albion, is the projector of the scheme. He has already purchased 41,000 acres of land in that county, to which 100 families will remove in a few days.

The projectors say that neither jail nor court house will be needed and that the election of local officers will be held only to comply with the law, as all property will be held in common.

Negotiations are also reported to be in progress for the purchase of an immense tract of land in northern Wisconsin, where it is proposed to establish an Indiana Mennonite colony.

value, and thus diagnosis and treat-ment have frequently had to be delay-ed day after day. The new test in detail is beautifully simple. From a complicated scientific shook hands, as O'Donnell's seconds insisted on having one of the windows, through which the sun was streaming on their corner, darkened, and then the first set of gloves was found to be too small for the Austrahan, and they had to be changed. O'Donnell was process it is reduced to a few move-ments of the hand of an expert bacteriologist, and all is done. The drop of dried blood taken from the lobe of the ear or the tip of the finger of a suslooked after by Billy Madden, Sam Fitzpatrick, Gus Ruhling and Mike pected typhoid patient and sent to the laboratory on a card is mixed with sterilized water and a fraction of it put on a microscopic slide. To this a drop, or a portion of a drop, of pure typhoid culture is added. This typhoid Maher's alds were John Quinn, Peter Lowry and Pete Burns. Round 1.—The men sparred for about five seconds. Maher's face wore a de-termined expression at which O'Donnell

appeared nervous and shifted uneasily on his feet. The Australian thought culture is part and portion of a inbora-tory's outfit nowadays, and has been on his feet. The Australian thought he saw an opening, he put out his left in a half-hearted manner and just reached Maher's breast. Maher swung his left to the head and they clinched. ever since this discovery was made. The slide is then put under the microscope.

SEEN IN THE LENS. Now, as all these experiments have

his left to the head and they clinched. While they were locked together they exchanged lefts, but the blows were harmless. The referee broke them and then Maher shot his right to the top of O'Donnell's head. The Australian looked astonished and dropped his proved, one of two things will happen. Either the typhoid germ existed in that portion of the drop of blood mixed with the typhoid culture or it did not. No guard. The Irishman came in like a tiger and sent his left hand on the jaw. the typhold culture of it did hot. No ordinary microscopic investigation can tell anything conclusive about that drop of blood uamized. But—and this is one of the mysteries of science—as soon as the mixture on the slide is brought within the field of vision and the bacteriologist can distinctly see it, The Australian stayed down about four seconds. When he got on his feet Maher came at him again and with a left hander that was a combination of hook and swing caught the unfortunate Austhe bacteriologist can distinctly see it, the bacilli of typhoid already existing in the typhoid culture either move tralian on the left check just under the eye. O'Donnell went to the floor with a bang, turned over on his back and was about as before or there is accessation of the rush to and fro of these mincounted out. His seconds helped him to his corner and he walked out of the ute bodies and an agglutination or conring all right after a few seconds. When Maher landed the final blow he did not wait to see what O'Donnell would do centration of the organisms into large insters. If the bacilli move and keep separate

but went quickly to his corner. Then he went over and shook hands heartily there is no typhoid in the blood of the person under examination. If the bacilli cluster and stay quiet typhold ex-ists, or else has existed in the system with Billy Madden.

It was announced that a challenge had ben sent on behalf of Maher to Tom within six years, a matter which can se very easily learned from the patient Sharkey to fight in the Greater New York Athletic club, and that also if himself No febrile diseases, no malaria or any Maher was successful in the contest, he would challenge the winner of the Cor-bett-Fitzsimmons fight. The disgusted
