Admiral Pottier also says that before the firing of the foreign warships began yesterday the admirals made repeated protests to the insurgents against their attacking the town of Canca. The inurgents paying no heed to the protests advanced upon the town, whereupon the British, German, Austrian and Russian warships opened fire and con-tinued the bombardment of the insurgent position until the Greek flag was

When hey saw the masters of the colossal irmles of Furope moved with the deepest anxiety lest war should be declared, surely it was not for authorities upon international affairs like Mr. Labou-chere and Dillon to say that such fears were illusory. Sir William Harcourt, leader of the opposition, said that the country ought to know whether the government were acting upon their old formula, the integrity of the Ottoman empire, and if they were doing so, he protested against it. To detach Crete from the rule of the Turk was the only policy worthy of Great Britain, and he hoped that such a policy would be pursued. Lord Roseberry, asked that the house be furnished with a copy of the in-structions which had been given to the admiral commanding the British warships at Canea and said that the house would be glad to know whether his instructions bound him to do anything directed.

Mr. Balfour said he would inquire the British admiral could be produced He would say, however, that the admiral was not bound to act with the other powers against his own judgment.

Sir Charles Dilke, Liberal, said that the Greeks had reason to believe that Great Britain had twice led the conert of Europe to prevent them from getting what they otherwise would ha contained. #### RUIZ HAS NO PAPERS.

His Long Imprisonment Is Accounted For.

Washington, Feb. 22.-Secretary Olney spent an hour in his office this morning assorting his private papers which were being boxed for transportation to Boston. Senator Sherman, his successor expectant, interrupted him for a few minutes to inquire whether anything unusually aggravating has occurred in regard to our relations with Spain, and learned "nothing abso-

lutely. After the routine method of the deorrespondence has been had with Minister Taylor in the past few days concerning the Rulz and Scott cases it being the invariable custom for all inquiries of the Spanish authorities originating here or in Havana, to be formally presented in Madrid. During General Weyler's absence from Havaing General Lee's reforms had been unusually full and complete. In regard to the Rulz case, it is said at the department that his naturalization was not wholly incontestible; that his naturalization papers, as a matter of fact, have not yet been found, and to this circumstance is attributed his long imprisonment without trial.

New York, Feb. 22.-The afternoon papers publish denials of the alleged interview in which Senator Sherman is discussing the situation in Crete and the motion was seconded by Mr. John vocating war with Spain. Mr. Sher-Dillon, the leader of the Irish national man has pronounced the story a false hood from beginning to end, but has Right Hon. A. J. took at Canea yesterday was forced upon them in the interests of peace. In the Journal interview Senator self as follows, regarding the murder

> "I have no information concerning the facts are true, as reported, and American citizens are being murdered in Cuba in cold blood, the only way to put an end to the atrocities is to declare war on Spain. I know not what course Secretary Olney may pursue, but this is no longer a question of beiligerency, but of the foul murder of an American citizen held as a suspect. We have, already recognized Cuba's bell'zerency by an act of congress Cuba's belligerency by an act of congress passed last session, but we have not recognized independence

"We have a right to interfere if either Spain or Cuba ..... to carry on civilized warfare, though the death of Ruiz i quite another matter. I suppose that, Sec retary Olney having requested a full in vestigation, Consul-General Lee will again promptly call upon the Spanish authori-les for the facts in Ruiz's case. Then if the investigation shows that an American has been murdered, Spain will be asked to make reparation. If she refuses to de so the United States ought to force her by H. Campbell-Banterman, secretary declaring war. We cannot stand idly by of the state for war in the ministry of and permit the Spaniards to butche Americans as they please. We are bound icans in Cuba will be protected even if we have to resort to arms."

> Coroner Higgins and Medical Examiner Skiff today found evidence that and murdered the woman. There was one thing that showed that Mead had used force. The bedroom door was forced in. The bolt that sinks in the hinges was broken and

> some of the hinges were out. Joseph, Mrs. Chapin's son, said the door was all right when his mother went to bed, and she had locked it. It is possible that the woman had let Mead into her house and went to her room and locked the door. It seems strange that the door could have been forced without awakening the There are some who believe that Mead had tried to get money from the wo man and became enraged when she would not give him any. It is known that he was without funds, for the

night before he attempted to borrow

money from Medical Examiner Skir If he was after money he was prob ably in the house for some time, as it does not seem likely that he would call on a woman to borrow late at night. An act of Mead's points very strongto the shooting being premeditated. He spoke to Dr. Skiff about life insurance a few days ago and mentioned a company that would pay, no matter how a person died or how soon after the policy was taken out, even if sul-cide was committed. He wanted to borrow money of Dr. Skin to take out

such a policy. There was one report that Mead at tended a country dance at Lakeville on Friday night, where there was plenty of cider brandy and a riotous time among the country people. Dr. Skiff was unable to verify this statement, Mend's body he found indications that

MEAD SHOT MRS. CHAPIN. head. One entered between her cheek and left temple and the other at her right temple. Either shot would have killed her, which shows that she could not have fired the revolver. Mead shot himself in the right temple, the bullet coming out on the left side of the head. The bullet lodged in the hall door. The firing was done at close range, for there were powder stains on the faces of both. Recent experiments have shown that powder stains will be made when the object is eighteen inches from a revolver. Mead must have turned his back upon the woman when he shot himself. The bodies were warm when found.

The revolver was owned by Mrs Chapin, and it was given to her by her brother Chauncey of Torrington at the time when there were several postoffice burglaries in this state. He told her that she might have to use it some time. Mrs. Chapin kept the revolver at the postoffice. She had a smaller one that she kept in her bedroom, and this was found. How Mead obtained the revolver is a mystery. Some think that he asked Mrs. Chap-

in for it and that she gave it to him temporarily, while others believe that he took it from the postoffice without her knowledge. When found on the floor, Mrs. Chapin wore nothing but a gauze vest, a nightrobe, and a wrapper of soft, figured cloth. She had en neither shoes nor stockings. Mead was fully dressed, and his hat and overcoat were in the sitting room. All the doors by which the house can be entered

were locked. It is not known how Mead entered the house. Whether the woman let him in, thinking it was her husband, who occasionally came in on a late train, or whether she opened the door of her own free will, will probably never be known. Some think that h obtained a key to the front door, but no key was found upon him, or anything for that matter that could throw

any light upon the case. The Rev.
