Our streets require a great deal of at tention and the repairs in the effort to keep them in good condition have become very expensive. It would be advisa-ble to make an appropriation each year which should be expended in macadamizing sections of the principal thorough ares. If this initiative course were pur sued and continued, good roads would re sult therefrom in a few years. The method would be commendable and ob ivate the vast expenditure of publi-moneys of which there is no lasting bene fit. It is expedient to enact a law com-pelling property owners to have snow, te, promptly removed from their side walks and gutters fronting on their prop crty cleaned at least once a week.

Too much liberality has been shown by the borough in the granting of fran-

chises to street railways and other com-panies. It would be wise to profit by the methods adopted by many municipalities who demand a stipulated per cent, of the yearly revenue of all corporations to whom privileges have been granted The remuneration derived from this source might be applied to the sustainance of the police and fire departments or upon the streets which these compames try to monopolize. All poles of the electric light and traction companies should be taxed in return for many fa-

orable and munificent concessions. The many borough orders which ar etained by banks and individuals for speculative purposes should be recalled It is inconsistent with business principle to permit outstanding warrants there are no funds available for redemption. Povision should be made t make all borough orders non-interest bearing at a specified time from the date

In conclusion, I desire to enlist the hearty co-operation of the council in all matters pertaining to the improvement of the borough. Let the work be done so that it will meet the approbation of the public and the future advancement of Dunmore is assured.
