

### CARBONDALE.

Readers will please note that advertisements for job work, and items for publication left at the establishment of Shannon & Co., newsmen, North Main street, will receive prompt attention; office open from 8 a. m. to 10 p. m.

### DEFECTIVE PAVEMENT.

The residents of Belmont street are not satisfied with some of the work done by the Park paving company.

The work was accomplished under very unfavorable circumstances, for at times the mud was very deep and the ground frozen. The contractors had a difficult undertaking, yet the city cannot be expected to suffer loss through these unfavorable conditions.

Messrs. McDonough, Baker and Dilts, of the street committee, with Engineer Priek, have carefully examined the pavement, and find it in many places defective. In places where dry cement was used many bricks were found to be loose. Where the bricks were laid upon the frozen ground the passing of the street cars has broken the bricks near the rails. The curbing has in places settled or been broken and in places where it is evident that considerable expense will be necessary to make the street as required by the contract. The city councils withheld from payment \$2,300, so that there need be no difficulty in securing a payment which will meet the requirements.

### UNIQUE ENTERTAINMENT.

The Children's Doll Show at the Presbyterian Lecture Room.

The children connected with the Sunday school of the First Presbyterian church gave their second entertainment at the lecture room on Wednesday evening. Eight tables had been arranged, displaying a vast number of dolls arranged in a very pleasing manner. On one table a May-pole dance was represented, on another was arranged a nursery scene where the nurse, Jessie Wallace, had gathered the little ones, ranging in age from one year to five around her. One very attractive scene showed a school with all the arrangements in complete order.

Among the interesting features of the exhibition was an ancient doll in a glass case. It is made entirely of wood. It is about fifty years old, and was loaned by the owner, Mrs. Mary Phillips. Another aged doll of the same age belonged to the late Mrs. George Moore. It is said that this doll's hair may gray with age was originally of a very beautiful brown color. A large crowd enjoyed the interesting program of instrumental and vocal music, recitations, and the Japanese drill.

Notices have been posted advertising the sale of Winbold Scott's property in connection with the Tax collector, Rev. of Mayfield. This is the property claimed both by Mayfield and Jermyrn boroughs, and if they do not settle the dispute, one or the other of the boroughs will have some costs to settle. If the affair could be settled without going into any expense to each borough, Mayfield council are willing to abide by the first proposition made by the committee in connection with the sale of the property from the Jermyrn council, and have already a committee appointed to look in connection with the council of this town, in selecting a surveyor to make a dividing line between the two towns. Mr. Scott has held taxes in this borough for the past three years, and inasmuch as his deed calls for the property in Jermyrn borough, he does not think it right to tax in Mayfield, and it is this council that should defend his claim as it undoubtedly will.

The lecture given in Windsor hall on Wednesday evening was not as much a success as was anticipated. Quite a large crowd was present, but it was an audience of restless nature, and the speaker was repeatedly compelled to keep silent while some were noisily leaving the hall. Mrs. M. Harris, the Main street milliner, spent yesterday in Scranton. Mr. L. B. Grounau made a business trip to Scranton yesterday. The people are well aware of the character of his entertainment, and Professor Howe was here in January under the auspices of the fire company and he always has a larger audience the second engagement.

The Delaware and Hudson colliery will work today. Miss Julia Madden, of Green Ridge, spent yesterday with friends in town. Miss Edith Moon entertained a number of her friends at her home in Carbondale on Tuesday afternoon. Those present from Jermyrn were: Miss Thos. Solomon, Miss Polly Solomon, Bertha Coon and Kate Simpson.

### IN CANAAN GOLD FIELDS.

The Chase After the Yellow Metal Will Be Resumed Ere the Robins Nest Again.

The approaching spring brings the time near for the resumption of out-of-door work, and speculation is again being indulged in as to the outcome of the prospecting for mineral at South Canaan, which it is said will be resumed with the open weather. Mr. Burrows, the mineralogist and engineer who has charge of the work is a voluble talker on the tariff, financial or social questions, but when it comes to his own business, he is a man of few words. He has been prospecting for mineral at South Canaan, which it is said will be resumed with the open weather. Mr. Burrows, the mineralogist and engineer who has charge of the work is a voluble talker on the tariff, financial or social questions, but when it comes to his own business, he is a man of few words.

Who these locators are is another interesting puzzle. Somebody is applying for a lease with money and land, and has been prospecting in Wayne county for two or three years before the general public "got onto" him. He takes frequent trips to New York, and has all the appearance of a man who does not worry about his daily bread. Mrs. M. Harris, of Scranton, has suggested that a big syndicate is providing the money for a thorough search for mineral veins, and the theory is not a very wild one.

That there is mineral in the mountains around South Canaan is not to be doubted. A good deal of prospecting indicates more or less, and there has been enough smoke over there to base a hypothesis on, at least. Samples of the earth have been sent from time to time to competent assayers and they have invariably reported mineral deposits, though not in large quantities. There was a New Yorker in Carbonade a few days ago who told a story that, if true, shows that expert Burrows, not expecting him to appear in this section, so far departed from his usual easy-going, retiring attitude, and he is alleged to have declared that the prospects were more than bright for a rich find of underground wealth at South Canaan; that the geological formation of the hills and their contents have been found to be almost identical with the South African gold fields, which are the second richest in the world, and that no one need be surprised at some startling news one of these bright mornings.

The New Yorker is quoted as having said to a Carbonade merchant: "This man Burrows is a big fool, or a big knave, or he has something great in store for this section. He is no fool for I have known him some time, and he's a shrewd prospector. I have never seen him do a dishonest act, and so I conclude that you can look for good news unless his calculations are all wrong in this instance." Why are they waiting so long before beginning active mining operations? Is there some deal or something of the kind? Several explanations might be made to the query. The matter of leases may have a good deal to do with it. Or it may be that like wise men the prospector and his backers prefer to go slow. As a rule, they are content with having a large sum on a venture, for gold mining is generally a gigantic plunge, bringing gigantic failure or enormous returns, according to its outcome.

What is known of the geology of the hills that throw their great shadow over the peaceful village of Canaan has been learned from two bore holes which have been put down to the depth of 1,300 feet each, a quarter of a mile apart. That these must have shown something of the nature of the strata, and that they are to be continued. Kanor has it that not only traces of gold have been discovered, but silver and platinum deposits are in evidence.

Among those who have been selected by conflicting governments as arbitrators of their differences have been the late Emperor William of Germany, the late King of Holland, the late Marshal McMahon (while president of the French republic), the present pope, who arbitrated the quarrel between Germany and Spain on the subject of the Caroline Islands, and the president of the Swiss confederation, whose services were invoked only a few months ago by the English government to determine the merits of its dispute with the American Republic of Colombia. ### WOMAN'S STRUGGLE.

All women work. Some in the homes. Some in church, and some in the whirl of society.

Many in the stores and shops, and tens of thousands are on the never-ending treadmill earning their daily food. All are subject to the same physical laws; all suffer alike from the same physical disturbances; there is serious derangement in the womb.

Lydia E. Pinkham's "Vegetable Compound" is the unfailing cure for this trouble. It strengthens the proper muscles, and displacement with all its horrors will no more crush you.

Backache, dizziness, fainting, "bearing-down," disordered stomach, moodiness, dislike of friends and society—all symptoms of the one cause—will be quickly dispelled, and you will again be free.
