COMMITTEE ON CAPITOL REPORTS

Does Not Recommend Strict Economy in Erection of the Edifice.

AN -ESTIMATE OF SUM REQUIRED

The Committee Thinks That One Million Dollars is Not Too Much to Spend for a Capitol Building in a Great State Like Pennsylvania.

Harrisburg, Pa., March 30.—The position of the building and ground commiliter on the new capitel project is outlined in a report presented to the house today by Representative Mc-Clain, of Lancaster. The report is ne-companied by Governor Hastings' message advocating a capitol to be erected at a cost not to exceed \$550,000. The committee's findings follow:

We have given to the subject presented in this message careful and dolbernt consideration. The matter to which I relates has been the subject of our serirelates has been the subject of our serious cancern not only since the reference of this message, but since the destination by tire of the capitol on Feb. 25. The result of our deliberations is a concurrence in the views expressed by the executive as to the recessity for prompt legislative action. We are of the opinion that no plan should be adopted and no contract made that will not provide for and secure the completion of the proposed capitol building in time for the meeting of the general assembly in 1892. We believe it entirely practicable to creet a structure commensurate with the
