The charge against H. T. McKay was that of being the "Keystone Milling company, of Scranton," which fraud it will be remembered was exposed through the postoffice inspectors last winter. The scheme was this. Advertisements were placed in various papers at a distance offering for sale a new brand of flour at \$2.50 a barrel 'just to introduce it." If a victim an-

swered the advertisement he was urged to send on \$25 and secure ten barrels which he would be informed he could sell at a good profit and in time work up a nice flour trade. If he didn't come up with the \$25 the Keystone Milling

ompany would have to content itself with the \$2.50 and the dupe would have to be content with some very valuable experience. The indictment in the case on which
