He said the board was conservative but very much in earnest and thought that in consequence of its work the sanitary condition of the city is constantly improving Its water supply was never as good as it is at present. He described the manner in which the Scranton board of health proceeds to abate certain classes. of nulsance that had been brought to the attention of the meet

ing by the previous reports. James O'Hara, president of the Throop borough board, said his board was moving quietly along, doing what it can to improve sanitary conditions, and Dr. T. W. Dr. Bentley thanked the members of the association for the courtesies extended to him during the period he had been in the chair and then introduced the new president, Dr. Van Sickle, In accepting the duties of his office Dr. Van Sickle made a very neat and appropriate address, and closed by thanking the members for the honor con-

Professor George Howell was to have spoke on "Eyesight," but on account of the teachers' institute, was unable to be present, and sent his regrets.

Leonard D. Hosford, of New York city, was to have talked on "Sanitary Plumbing," but was unable to come to Scranton, and named Thomas Thompson, of the International Correspondence School of this city, as his substitute. Mr. Thompson's talk was of a very practical nature and proved that he is a thorough master of the many phases of his intricate subject.

The talk of Mr. Thompson was afterwards discussed by Mr. Parsons and Dr. Bentley asked several questions bearing on the subject matter of Mr. Thompson's dissertation. On motion of Dr. Paine a vote of thanks was tendered to Mr. Thompson. The report of the treasurer, M. C.

Judge, of Taylor, showed that during the year he had paid out \$5,508 and received \$40.

EVENING SESSION. The evening session opened with a paper by ex-Representative C. P. O'Malley on the subject, "Are the Present Sanitary Laws Sufficient." The subject matter showed careful and competent research and cited that while some new and improved sanitary laws might be needed, the present ones were adequate in certain directions if enforced, Mr. O'Malley's

fort was highly appreciated. "Anti-toxine and its Relation to Work of Boards of Health" was the subject of a paper by Dr. P. C. Manley, of Jer-myn, who did not approve of the new remedy for diphtheria because "in a mild case it is superfluous and in a malignant case powerless." A contrary view was held by Drs. Paine, Murphy and Van Sickle, but Dr. Bentley disagreed with the others in his opinion that the remedy might be used with success on children over 10 years of age if used in the first stages of disease. The discussion was of a medico nature and but little atten-tion was paid to the question of whether anti-toxine should be furnished by boards of health to their physicians for charity use.

Dr. J. W. Houser, of Taylor, was not present to discuss the "Apathy of Physicians Towards Boards of Health' and the subject was skipped.

Question box topics were opened as follows: "Should Physicians be Required to Post Notices of Contagious Disease," Dr. W. A. Paine, Scranton; "Cess Pools in Towns Without Sewers," C. W. Parsons, Scranton; "Neces-
