DANGER IN SODA.

Serious Results Sometimes Follow Its Excossive Use.

Common soda is all right in its place and indispensable in the kitchen and for cooking and washing purposes, but It was never intended for a medicine, and people who use it as such will

some day regret it. We refer to the common use of soda to relieve heartburn or sour stomach, a habit which thousands of people practice almost daily, and one which is fraught with danger, moreover the soda only gives temporary relief and in the end the stomach trouble gets worse and worse.

The soda acts as a mechanical irritant to the walls of the stomach and bowels and cases are on record where it accumulated in the intestines, causing death by inflammation or periton-

Dr. Harlandson recommends as the safest and surest cure for sour stomach (acid dyspepsia) an excellent preparation sold by druggists under the name of Stuart's Dyspepsia Tablets. These tablets are large 20 grains lozenges, very pleasant to taste and contain the natural acids, peptones and digestion and when taken after meals they digest the food perfectly and promptly before it has time to ferment, sour and poison the blood and nervous

Dr. Wuerth states that he invariably uses Stuart's Dyspepsia Tablets in all cases of stomach derangements and finds them a certain cure not only for stomach, but by promptly digesting the food they create a healthy appetite, inrease flesh and strengthen the action of the heart and liver. They are not a cathartic, but intended only for stomach diseases and weaknesses and will be found reliable in any stomach trouble except cancer of the stomach. All druggists sell Stuart's Dyspepsia Tablets at 50 cents per package. A little book describing all forms of stomach weakness and their cure

#### THE SUNFLOWER STATE.

Keep Your Eye on Kansas and See What It Can Do in the Future. From the Washington Star.

If you want to make the blood of a true Kansan boil just say to him that the Sunflower has dropped back a peg ir, the march of civilization, Tom Mc-Neal, an ex-state senator and humorist of more than state fame, is particularly jealous of the state's fair name. "You can just say to the jays who are poking fun at Kansas," he said to a reporter of the Star, "that whatever they may think of her political conduct, whether they wear the sack cloth of the defeated or snort with the exultant voice of the victor, the unalterable fact remains that Kansas is still the geographical centre of the world-the linch pin of the universe. Even the fact that half the people of the world are at this time engaged in abusing or defending her shows that she is built to attract attention and invite contention. The ordinary commonplace things of the world do not attract attention, only the little things of value invite contention.

"Kansas will in the future, as she has in the past, overcome more difficulties, create more surprises and

furnish bread for more than a week for every man, woman and child on the face of the globe, from Orient to Occident and from Greenland's icy nountains to India's coral strand. She is the only state that within twentyfour hours can furnish a climate suited to the taste of the ice man from Iceland, the Pole from Poland, the Hol from Holland or the tropical savage from Borneo in his untrammeling suit of sunshine

"Kansas is the only state that can mix in the commerce of every clime and where a hot wind will affect the markets of Christendom. Within the inst ten years the state has raised sufficient corn to fatten enough cattle to drink up the waters of Lake Superior and enough hogs to furnish ham gravy sufficient to float the United States navy. She has enough natural gas to supply the furnaces of civilzation and enough salt to make pickling brine out of all the fresh waters of the globe. "Keep your eye on Kansas and don't be discouraged. She will profit by the agricultural mistakes of the past and

Wall Street Review. New York, June 10.-Today showed the largest volume of trading on the stock exchange for the year thus far, dealings were well distributed throughout the list. A heavy realizing movement in the final hour wiped ut a number. The heavy liquidation in sugar was the main factor on break-

ing the market.

Sugar's fall from the high point was 2%, but a final rally left its net loss fractional. The coalers were also notably active and strong. Lackawanna held the gain but the others reacted, New Jersey Central and Delaware and Hudson gaining 2 points net and the Reading stocks a fraction. The close was weak but slight net gains were the rule.

THE STEAM WHISTLE. The Useful Tooter Was Invented in the Interest of the Egg Trade. It is told that the locomotive whistle

was invented because of the destruction of a load of eggs. When locomotives were first built the country roads were for the most part crossed at grade and the engine driver had no way of giving warning of his approach except by blowing a tin horn. The horn, it may be imagined, was far from being sufficient warning. One day in the year 1833 a farmer was crossing the railroad track on one of the country roads with a great load of eggs and butter. Just as he came out upon the track a train approached. The engine man blew his horn lustily, but the farmer did not hear it. Eighty dozen of eggs and fifty pounds of butter were smashed into an indistinguishable, unpleasant mass and mingled with the kindling wood to which the wagon was reduced. The railway company had to pay the farmer the value of his wagon. It was considered a very serious matter, and straightway a director of the company, Ashlen Baxter by name, went to Alton Grange, where George Stephenson lived, to see if he could not invent something that would give a warning more likely to be heard. Stephenson went to work, and the next day had a contrivance which, when attached to the engine boller and the steam turned on, gave out a shrill, discordant sound. railroad directors, greatly delighted, ordered similar contrivances attached to all the locomotives, and from that day to this the voice of the locomo

EXAMINE CAREFULLY.

EXAMINE CAREFULLY the garments made by us. See the style, the fit, the finish. Have you ever got anything half as good at as low a price? Have you ever got anything better at a much higher price? We think not.

# SMYRNA RUG AND CARPET SALE.

It is with a good deal of hesitancy that we've at last brought forward those Fine Smyrna Rugs and Carpets for the slaughter. We know that such expensive goods, in the face of the trade depression, that has hung over this valley, was no easy matter. We have been notified, however, to bring this sale to a close, and before it can be wound up these goods have got to be disposed of. WILL YOU BUY THEM AT HALF PRICE?
