APPEAL BY PHONOGRAPH.

Attorney Ward Will Take the Cylinder to Harrisburg, Where the Governor Will Hear Terrible Pete Plend His Own Case.

Wilkes-Barre, July 19 .- Says the Times: Edison's phonograph was today utilized the second time as a last resort to save a condemned prisoner from the gallows. The prisoner in this case is Pete Wassel, better known as "Terrible Pete," who was convicted of the murder of Joseph Kupersavage. Pete is billed to hang at the county prison next Thursday morning.

The condemned man's attorney, Eugene Ward, intended going to Harrisburg this morning to take the condemned man's confession to Governor Hastings and make a final appeal in his client's behalf, and thus secure a respite, if possible. All at once the idea of having Terrible Pete repeat his confession in a phonograph struck Ward as being a good one, as it would add strength to the confession and novelty to his concluding effort. With this object in view Attorney Ward this afternoon had a complete phonographic apparatus set up in Pete's cell and the old fellow repeated the confession into it. It was serious business for him, but in spite of the fact he showed some amusement while talking at the

revolving cylinder. Mr. Ward will leave later for Harrisburg and carry the cylinder on which the condemned man's confession is recorded to the capital city in his pocket alongside the written document. Governor Hastings will listen to the novel confession tomorrow between the hours

of 9 and 12 o'clock. This is not the first time such a method has been used as a short time sum will be awarded a handsome biago similar means were employed in cycle. the case of a man in Michigan who

WORKED WITH BROKEN RIBS.

wanted to plead his case before the

Fractured, but He Didn't Know It. Stroudsburg, July 19.-John Albert son, of Bartonsville, is lying at his home seriously ill, the result of an accident, says the Times. A few weeks ago Albertson attended a festival given in Custard's church, driving there in a horse and buggy. On his way home he was run into by a horse and buggy, driven by an unknown party. The force of the collision was so strong that Albertson was thrown out of his carriage.

his injury, however. Feeling no pain from the injury and finding that he was not incapacitated from working, Albertson continued right on with his daily toll as if nothing had happened. A few days ago while running a wagen out of the shed the pole struck him in the injured side. A pricking sensation was felt which continued in so painful a man-

ner that a physician was called in. Dr. Miller, of Tannersville, made an examination and found that Albertson had been working with two of his ribs broken in two and that the second accident had placed the broken bones in a dangerous position. The young man is now confined to his bed and his condition is serious.

CURED BY FAITH.

Young Woman Long Bedridden Sud-

denly Begins to Walk. Hazleton, July 19 .- The Standard says: Lizzie Brown, a young and comely miss who resides with her parents on North Locust street, claims to have been cured of a disease of long standing through faith. The girl has en confined to her bed for months, suffering from what the physicians diagnosed as heart disease. In fact, the attending physician gave her up as incurable, and predicted that she could only live a few months at best. Several days ago the presiding elder of the Holiness Association, learned Lithia Springs yesterday. of her case and at once began to was anointed a second time and at five o'clock, to the surprise of every one, she arose from her bed and was able to walk. She claims to have

INDUSTRIAL NEWS.

The successful working on the Dela-ware of the steam tug White Rose, built not long since on the North river for the Standard Oil company for har-bor towing, leads to the belief among those engaged in that line of work, says the Philadelphia Press, that the time is not far distant when petroleum will be used to generate steam to drive all such craft. It has not been generally known outside of tugboat circles that this tug's steam is all generated through the burning of petroleum, and while thus far the cost has been a trifle in excess of what her coal bills would have been, this is said to be accounted for by the claims that sufficient experience in the use of oil as fuel has not yet been attained. It has long been the idea of the Standard Oil company to perfect this idea to such an extent as to render possible the use of oil as fuel on all their ocean tankers. Just what a saving this would be is well known to those familiar with the shipping trade. In the single item of time that would be saved, aside from all other advantages, this undertaking, if carried out successfully, would mean the saving of large sums of money.

Notices were posted yesterday at the Lance No. 11 colliery at Plymouth and the No. 18 colliery at Wanamie stating that the collieries would be shut down on July 22 for repairs. The collieries on July 22 for repairs. The collieries are operated by the Lehigh and Wilkes-Barre Coal company. A Wilkes-Barre Times reporter interviewed Superintendent Lawaii relative to the shut down. Mr. Lawaii said the shut down at the collieries was for an indefinite period. until the coal trade improves or until the people at Washington finish monkey-ing with the tariff. Referring to the statements made in the papers as to the ther coal companies working better, Mr. awall says it is not true and that the Delaware, Lackawanna and Western de. nied the rumors that the company would work full time. The closing of the No. 11 and No. 18 collieries will throw about 1,000 men and boys out of employment.

The Lehigh Valley Coal company now has a double force of men employed in slope No. 40, or what is known as the new shaft near Old Sugarloaf, boring through rock to tap the body of water stored up in the old and abandoned Sugarloaf mines. This water has been stored there for a number of years and was a con-stant menace to the men employed in the adjoining slopes. The first hole will be finished within the next few days. The company has made every preparation to handle this immense body of water.

Morris Williams, the able and popular superintendent of the Mineral company, of Shamokin, was called to Wilkes-Barre the other day, and it is reported that he will succeed Irvin Stearns as general manager of the Pennsylvania company. Mr. Stearns, it is said, will succeed Albert-Walter as president of the Delaware

The pea coal screens at the Yorktown colliery will be lengthened four or five oen coal may be produced. A large shaft has been already received for the change. The carpenters are still busily engaged retimbering that ponderous structure.

The Lofty powder mill has during the past few days passed into new management in the persons of Messrs. Kline and Faust, of Ringtown, who have succeeded Mr. Smith. Many improvements are contemplated.

Extensive improvements are under way at the Star washery, near Hazleton. Two new Clark Jigs are being arranged be-sides a line of elevators and a new shak-

THE MARKETS.

New York, July 19.—The stock market was almost unparalleled for a July day's

trading, both in activity and strength. Nothing was talked of but speedy action on the tariff, ideal weather for excellent crops and foreign demand for our securities as well as grain. Enormous dealings in bonds at advancing prices was a fit acompaniment for a broadening stock market. Sugar was the great feature, the traders realizing that the refining interest had secured the reporting of a sugar schedule that if adopted by congress would mean a profitable business for the Sugar company for the ensuing four years at least. Sugar scored an extreme advance for the day of 10%, touching 140%, breaking previous high record prices. Tremendous blocks of stock continued to change hands at uniformly rising prices. Six thousand shares were taken by a brokerage house reputed to represent a most powerful interest which is credited with having recently acquired large quan-tities of that security. The argument that the new sugar schedule would resuit in some increase in protection over that provided in the present law, stimulated extensive covering on the part of the shorts, who temporarily at least, lost faith in their previous position. The tunultuous scene at the sugar post continued well through the day, 116,000 shares having been bought and sold. In the clos-ing hours the stock eased off a triffe, recedling 2% below the best, but loaned at 14 per cent. premium for use over night. The railway list was generally influenced by a further report of foreign crop short-ages and prediction of improved earnings due to excellent progress of American crops. A number of prominent railway shares made new record prices, especially the Granger roads. The total sales of stock today were 482,990 shares.
