## FIREMAN'S QUEER NOTION

Alleged to Have Fired a Barn in Order to Make a Record by Putting the Fire Out.

Wilkes-Barre, Aug. 5 .- Edward Moran, a young man 23 years old and residing on South Fell street, was arrested last night, charged with being the firebug who set fire to the Finklestein barn yesterday afternoon. The case, says the Times, is more sensationtl when it is known that Moran is a member of No.2 Engine and Hose company and has been a hard working member of the fire department.

He comes of a good family and the only reason that can be assigned for his strange action is that his mind is unbalanced on fire department matters, as the prosecution showed that he was trying to be appointed on the new chemical engine and that he started the fires in order to rescue horses and make a name for himself by his bravery, thereby securing his wished-for position with the chemical engine,

He was aged 63 years, and is survived by his wife, one daughter, Miss Ger-trude, one son, Harry A. Deceased was a cousin of Hon. W. F. Cody, commonly known as "Buffalo Bill." Colonel Laycock was one of the most genial of men, one who enjoyed the confidence and respect of a wide circle of friends. During the war he was a brave soldier, and his bravery was rewarded by fre quent promotion. Had the conflict lasted a few weeks longer Colonel Laycock would have been mustered out with the title of general, for the papers necessary to his promotion were being prepared when Lee surrendered which signalized the end of the war Colonel Laycock was a member of the Loyal Legion of the United States, the Grand Army of the Republic and Dieu le Veut Commandery Knights Temp-

## ATTEMPTED JAIL BREAKING.

Warden Boland Discovered Another Plan Wednesday Night.

Wilkes-Barre, Aug. 5 .-- Says Times: Warden James Boland and his which will cause almost as much of a sensation as the "Terrible Pete" jail his body was visible. conspiracy. The men who attempted to escape show by their method that they are slick and daring criminals and but for the eagle eyes of the watchman would have succeeded in cutting a hole through the roof of the jail and effecting their escape. The boldness and daring of the attempt and the almost successful issue has caused a feeling of anxiety to the warden and his deputies.

The men, Charles Womelsdorg, a horse thief, and James Pollock, a slick burglar, who were confined together in double cell No. 2, upper tier, left wing of the county jail, cut through the three inch stone slab on the roof of their cell and had almost sufficient cut to .emove a piece of stone 8x12 inches when their work was detected. The men must have worked on the stone for some time and would have effected their escape in a few days. They very cleverly covered The Rending Iron Works at Danville up their work and the attempted escape was discovered only by accident.

The men used for tools, the iron supports which they removed from the wash basin in their cell, and a spoon. They sharpened these on the floor of their cell and used them in cutting the flagstone on the roof. They would stick the iron supports back under the wash basin each morning, plastering them with soap to prevent detection. The celling of their cell where they were cutting the stone slab was also carefully covered with a white cloth and held in place with soap. A hole in the side of the cell was used as a place of leverage for their crude tools and this was also deftly concealed. Themen succeeded in cutting through the stone slab 12 inches on one side, 8

inches across and 4 inches down the other side before being detected. If they had succeeded in removing the slab they could easily have cut through the tin roof and thus made their es-

Wilkes-Barre, Aug. 5.-About 10 o'clock last night, when the storm was at its height and while a West Pittston car was going toward West Pittston, there was a blinding flash of lightning, followed by a deafening peal of thunder as the car was passing Maltby. unable to tell daylight from dark. Although his general health is now good he is unable to discern even a faint ray of light. The physician pronounces his affliction due to degeneration of the optic nerve, and it is thought there is little if any hope of his ever being able to see again.

It will pay you to read the ad. and notice the money you can save by buying your Shoes and Oxfords for less than the cost of making. We sell shoes cheaper than any other house for the reason that we sell for cash only, and buy for spot cash from manufacturers in need of ready cash, and we are satisfied with a small profit and we are doing the shoe business of the town today and are compelled to enlarge our store and engage extra salespeople, so you will have no trouble to get waited on. We have inaugurated a CLEARING SALE of Men's, Women's and Children's Shoes and Oxfords, in Tan and Black, at prices less than cost of making, not mentioning the material. We are determined to clear our entire stock, so we can begin our fall business with new goods, regardless of what the loss will be. We expect to lose money this month, as this is the only way we can dispose of odds and ends.
