Or if he prefer, I will race him for fun, just to show his Carbondale admirers that I can defeat him with ease. If Mr. Pugliano does not accept my challenge immediately I will be compelled to thing that he is simply a bluffer and does not want to race It is getting below my class to enter a contest with a rider of his standing, but seeing that he has expressed anxiety through the newspapers to meet me. PROF. COLES FOR OCTOBER.

From Storms and Signs, Our predictions last month that 'riots, panies, religious wars and masacres would astonish the natives, and that the excess of High Flood days would cause exciting scenes in the so-cial, political and business world," vere fulfilled to the letter. This month the Planets are in a still more dangerous position than they were last month, and are under the rule of Low Ebb Vital Forces. We can very plainly see just what the outcome of this predicment will be, but our own discretion forbids us to forecast it, as we are now all sailing through the House of Evil, and anger will spring up into the hearts of the oppressed at the least provocation. Cool heads and kind learts can do much to save life and property this month, if they will (?)

DISEASE MICROBES.

Our predictions in February last, that the great shadow funnel of the sun's eclipse would open wide the gateray of the Atlantic coast through which the Plague germs would enter," has also proved true; and yellow fever courge is now here! the seed germs of this awful plague will be carried into different parts of the United States by fleeing refugees and there form a new combination,-a cross beween the yellow fever and la-grippeand which will produce an awful epidemic, that will sweep over the country like mad, attacking the head, throat, heart, lungs or bowels of both man and beast, (attacking the organs that represents the true "Sign" under which they were born.) Great swarms f flies will appear in many localities, and they will suddenly disappear from owns and cities when the yellow fever microbes put in their appearance!

THE STORMS AND SIGNS. Unprecedented storms and floods will sweep over many sections of the land and sea. Earthquake shocks will be felt in America, as well as in the old country, and strange phenomena will astonish the world. Awe-inspiring sun rise and aun set scenes will be numerous, and strange electrical storms will cause the nervous to tremble. Tidal waves will sweep the coasts, and a destructive terrifying storm will jump up cut of the ocean, so to speak and give us a huge surprise. Watch out for high gales on or about the 10th inst., especially in northern sections. Tornadoes, cyclones, cloudbursts, etc., will visit the southern and western states. and blizzards to the northwest. Beautiful days will predominate in the middle and eastern states. In the early morning of the 9th instant, Venus and Jupiter will be close together; get up and see them. Do not fail to see our planetary chart for November: the planets will then be in a very peculiar position, and no one should miss see-

THE VITAL FORCES. The Low Ebb Vital Forces rule the menth of October, having full control over the 2d, 3d, 6th, 7th, 11th, 12th, 15th, 16th, 20th, 21st, 22d, 23d, 24th, 25th, 26th, 29th and 30th; this will cause a feeling of unrest in the social, political and business world, and will give us many surprises. Let those dealing in stocks look well to their own interests; let those dealing in merchandise watch out for a sharp and sudden turn in prices. Fruits picked on any of the above named days will have a tendency to spoil. On the 4th, 5th, 11th and 12th will be the best days to sow rye for spring pasture; and on the 8th, 27th and 28th, will be the best days for the late sowing of wheat and rye for grain.—Pota-toes dug on Low Ebb days will be de-stroyed by the "dry rot" microbe. Our High Flood and Low Ebb Vital Force Theory is now ready for mailing. Price, 10 cents. Unless grain is sowed on the High Flood days in October it will be diable to freeze out this winter or be troubled with microbes next summer, During the High Flood days of this month, will be the time to transplant

trees, berry bushes, vines, etc. GREAT DANGER COMING.

Our predictions are being fulfilled so accurately, you will of course be interested in the following special prediction; The Planets are all nearing each other, and will all (except Neptune) be on one side of the earth in two months hence and nearly all in the same "House or Sign." Just what the outcome will be, when all these planets concentrate their opposing forces and fire them at poor old mother Earth, only the months of November and December will tell! Let all Rulers be well guarded during this month and

A chart showing the position of the planets at the present time, will be sent free for postage, to any address Those who live to see the closing of this year 1897, will see some terrible and unprecedented disasters wrought

"wind and wave," For full explanation as to grain sowng, potting flowers, picking fruit, transplanting trees, berry bushes, vines, etc., see our High Flood and Low Ebb Vital Force Theory.

THE MARKETS.

Wall Street Review

New York, Oct. 1 .- The bulls made their first aggressive stand in over two weeks, and after a heavy decline in the earlier part of the day they came forward to the support of the market and checked the decline, and brought the closing prices very generally above last night's level. There was nothing in the news of the day that could be counted more favorable than that of the preceding day or two, and a sharp stiffening in the rates for call money during the afternoon might be called a distinctly unfavorable factor; but it had no effect in preventing the recovery and the close was at practically the highest point of the day. The market was irregular, prices of some stocks moving up and down by wide jumps. In the usual trading the raids of bears on special stocks was successful in depressing the whole list by sympathy.
