FOREST CITY.

Night school opened this week in the graded school building and will continue for a term of three months. The school is run at the expense of the district and seems to be appreciated, as it started out with a good attendance. There is a large number of boys in the borough who work days that should take advantage of this opportunity and where they are too careless or indifferent to do so, their parents should see to it that they do not neglect the chance offered.

Trades. New York, Nov. 5.-R. G. Dun & Co.'s Weekly Review of Trade will say tomorrow

Stronger proof of the great change n the condition of business could not e given than is found in the detailed report of failures by branches of business for the month of October. Though swelled by a few large speculative or brokerage failures, the aggregate was smaller than in any other month for more than four years, except in July and August, and one month in 1894. The manufacturing and trading fail-

ures, \$7,823,199, against \$7,830,811 in September, and \$7,760,835, in August, include one for \$1,000,000, having no ing, rooms 705-706. relation to the present state of business. During the four years iron

manufacturing failures have not been maller except in one month; wool nanufacturing except in two months; leather and shoes and unclassified manufacturing excepting in four nonths, and cotton manufacturing exept in six months. Of trading classes, failures have never been smaller in groceries, jewelry and books except in one month, in clothing, furniture and unclassified trading except in two months, and ten manufacturing and eleven trading classes out of fourteen each have never reported smaller failures in a third of the past forty-eight months. Improvement so general, with a remarkably low average of liabil-

ties in most classes, has a meaning which cannot be mistaken. The quiet following the great rush of Nat. Lead orders and purchases for over two months is still increased in many branches by unseasonably mild weathr, and yet the mills are obliged to refuse many orders, being unable to finish previous engagements soon enough. It is every way fortunate for Imaha . the industries and the would-be buyers, since speculative purchases would otherwise advance prices so fast as to make reaction probable. More works have joined the active list, including some long idle, and the production in Wabash, Pr West, Union iron manufacturing is the greatest ever known. The output of pig again exceeds the demand, which naturally

Wall Street Review

New York, Nov. 5 .- The stock marke inderwent a course of very drastic liqui-lation today as a result of which prices BUSINESS STABILITY are from one to four points lower than they were jast night. That this course of things was helped along by profesdonal bear pressure was made evident by the very urgent covering movement which developed in the final half hour of rading and which rallied the prices of great many stocks over a point from he lowest point touched, reducing by so such the losses which would otherwise e shown by the day's trading. But this ecovery at the close was on a greatly infinished volume of bushness, and was opparently effected by the temporary vithholding of liquidating offerings, as vas done once or twice previously Juring the day, only to be succeeded by re-newed liquidation and decline. BRADSTREET'S VIEWS.

New York, Nov. 5 .- Bradstreet's to acrrow will say:

Killing frosts south, the raising of juarantine embargoes at nearly all oints in states invaded by yelloy ever, the resumption of traffic and a prospective revival in demand fo staple merchandise constitute the trade features of the week.

Rains in central-western and west ern states, followed by colder weath er, have favored farmers and stimulated demand from interior storekeep ers. Larger eastern cities report n increase in the general merchandise movement. New England centers re port that orders from the West exceed those from the South or East. Lead-

ing manufacturing industries continue fairly well employed. While there has been a moderate reaction in iron and steel, furnaces and mills continue well

employed, and the outlook for higher quotations next year is unchanged, There are 223 business failures reported throughout the United States this week, compared with 218 last week and 223 in the week a year ago.
