Enormous Sums Paid in Wages to to Railway Employes--Reduction in Wages Certain to Follow Adverse Legislation -- Necessity of Union. The report of the Interstate Commerce commission just issued contains for the first time some facts in relation to the total amount of money the French exposition of 1889 and none paid out by our railways in wages and but its original owners know where it salaries to labor. These figures, embracing 99 per cent. of all employes, show that for every \$100 paid out as operating expenses of railways more than \$60 is paid over directly to labor. Of the remaining \$40 probably an equal, if not a greater, proportion is indirectly paid out for labor.

The interest of labor in the railway question is far greater than the interest of capital, and yet, for some unknown reason, says Robert P. Porter in the New York Sun, the defense of these properties has been left to capital, while labor has, until a comparatively recent time, taken little interest in the conflict.
