IN FAIRNESS TO DR. O'BRIEN.

An Erroncous Impression Corrected Relative to a Case.

In the report in Saturday's Tribune of the proceedings in the trial of Kelly vs. the Scranton Railway company it was said that Dr. J. E. O'Brien, an expert witness for the defense, had shown unwillingness to testify as to the amount of his fee, and that the court had to compel him to testify on this point. Dr. O'Brien assures us that this is untrue and calculated to put him in a false position before the community. "There was an effort," he says, "on the part of the counsel to show that I might be biased by a salary, or by being regularly employed by the Traction company: and your report gives this contention plausibility, whereas, I am sure that a correct report would have shown the contrary. I testified that I vas not regularly employed by the Traction company and received no sal- the distance to the ground but, courcharge for these medical cases was fifteen dollars a day in court, and I asked counsel what his fees were. FIERCE FIRE AT DICKSON CITY

Mrs. Gallagher and Her Child Had a Narrow Escape.

RESCUED BY MEANS OF LADDERS

Fire Broke Out at 4.30 in the Lloyd Home, It Is Supposed from an Overheated Stove -- Loss Will Be Close to Seven Thousand Dollars. W. H. Richmond's Breaker Had Fire Brands Blown Upon It, but

The "Lloyd house," a hotel in Dickson City on the main road, erected in 1858, was totally destroyed by fire at an early hour yesterday morning. Two adjoining houses, occupied by the families of Peter McGinley and Mathew McPherson, were partially destroyed, the large plate glass windows in the Richmond company store nearby, cracked by the heat, other dwelling houses were scorched and a breaker, owned and operated by W. H. Richmond, located within fifty yards of the burning hotel building, narrowly es-

caped the flames. Snow on the roof of the breaker where the flying embers rested, was all that saved the building from destruction. The hotel, a four-story was burned to the ground. structure. Patrick Gallagher, who conducted the place for Mrs. Alice Lloyd, of this city, owner of the building, was in New York city at the time. His wife and young son and the sole boarder of the hotel, escaped from the building, mother and son by way of ladders and the boarder by jumping ten feet from a window in the second floor to the ground. All the furniture was lost.

The fire was discovered at about 4.30 o'clock by Mrs. Gallagher, who was awakened by the smell of smoke. Quickly arousing her son, Mrs. Gallagher called the boarder, James Gerrity, and opening a window in her bedom in the second floor the mother

DISCOVERY OF FIRE.

with her son in her arms, went out on the narrow porch over the front entrance to the hotel. Here she stood in a two-inch depth of snow, in her barefeet with only a light night dress upon her, holding her son and screaming "Help! Fire! The building was rapidly filling with

smoke, which came pouring through the open window. The fire seemed to be raging in the basement, as later proved to be the case. The large structure seemed ready to burst from the

Mrs. Gallagher stood on the roof of the porch crying out in the cold morn-

ing air for assistance. Gerrity, the boarder, in the meanwhile, had opened the window in his bedroom and had jumped out. Mrs. Gallagher saw him. Hugging her boy closer in her arms she looked down ary or retainer from them; that my age failing, she shrank back and continued her cries. Ten minutes elapsed before Boarder Gerrity succeeded in was across the way, and with Mr. Mc-

BURNED RAPIDLY.

wenty minutes after the fire was discovered the big building was a mass of flames. The people of the neighborhood had been aroused by Mrs. Gallagher's cries for help and the excitement following but no means was at hand to stay the sway of the flames. The wind at first was directly west and toward the Richmond breaker. Between the burning building and the reaker stood a low squat house, occupied by four families of foreigners. That it still stands is a miracle. The ouses north and south of the fire were farther distant and these were touchd by the flames but the low squat escaped.

The trees in the rear of the hotel lot the study of the law, and was admitted vere burned and when the flames burst out the flying embers, some it is said as big as a hat, arose in the air over he house in the rear and were carried by the wind toward the breaker, a few yards on the other side.

The scene in the duliness of the early morning was beautiful but ominous. The embers, flying in the air, struck squarely against the massive breaker delphia office of the Pennsylvania railbuilding and were either quenched in he snow on the roof or fell back to the ground. Time and again a flame ity until his death. ourned for a second or so on the roof, out finally died out.

After a time the wind changed from eward the breaker to the southwest and the crowd turned their attention Kingsbury, mother of H. A. and E. P. from the breaker to assisting McPherson and McGinley, who were taking their household furniture from the dwelling houses on the south and north respectively. Everything was saved from the flames, but thieves carried off most of the furniture. Mrs. McPherson was ill and had to be carried from the house.

FIGHTING THE FIRE.

The goods had hardly been removed then both houses became ignited. At about the same time fire companies Nos. 1 and 2 having been sent for arrived from Olyphant. The hose wa connected on the water main and two streams applied, one on each house No attempt was made to save the hotel At 7.39 o'clock it had been completely destroyed.
