#### SWEENEY CASE IS NON-SUITED

Recent Decision of the Supreme Court Effectually Invoked.

DID NOT STOP, LOOK AND LISTEN

Judge McPherson Sustains the Contention That Mrs. Sweeney Was and That No Negligence on the Part of the Company Was Shown--Juror Snee Was Fined -- Stanton Case Now on Trial.

A compulsory non-suit was yesterday granted by Judge McPherson in the case of Catherine Sweeney against the Scranton Traction company. Jessup & Jessup, attorneys for the defense, contended that the plaintiff's own evidence showed her to be guilty of contribuof the Supreme court, that a person crossing a street car track must observe the same caution as if crossing a steam railroad track, that is, stop, ook and listen. It was also held that there was no negligence on the part of the company; that Mrs. Sweeney came suddenly from behind a large covered ce wagon in the middle of a block and darted directly in the path of an oncoming car; that, in a word, she ran Into the car, rather than that the car ran into her.

Judge McPherson sustained these contentions and directed a compulsory non-sult to enter. In doing so, he said: "It is impossible to not feel a very sincere sympathy for this unfortunate severely injured by this deplorable occurrence. As I understand the decisions of the Supreme court there is no choice left to me except to enter a compulsory non-suit in this case upon the ground of contributory negligence, It is possible, of course, that a more critical examination of the testimony after it comes to be written out might lead to a different conclusion, and we will entertain a motion to take it off, and we will then be able to consider it

with more care." The motion to strike off the non-suit was made by the plaintiff's attorneys and a rule to show cause why it should not be stricken off was allowed.

MR. SNEE LOST HIS FEE. One of the jurors, James Snee, of Simpson, was not on hand when court opened and a delay of nearly an hour was caused. After waiting this length of time and there being no signs of Snee, it was agreed that the case should proceed with eleven men. The missing juror arrived about noon and when called before the court explained that he went to Pittston last night and was not able to catch a train that would get him back here in time, Judge McPherson lectured him for his negligence, telling him his first duty was towards the court, and then directed the clerk to knock off a day's wages from Mr. Snee's jury fee.

The city and the Scranton Traction company were co-defendants in the next suit called, that in which Giles Stanton, of South Abington, sues for \$10,000 damages for a broken leg, sustained by his wagon being overturned on a snow bank on Capouse avenue in February, 1895.

It appears that there was a heavy fall of snow about a week before the accident. The street car company's sweeper made a sort of ditch through the center of the road and the city in clearing its gutters and sidewalks piled more snow on that thrown up by the sweeper and in consequence there was a high rounded mound on the roadway.

WAGON UPSET.

The plaintiff, in attempting to drive across the street on a load of hay, had an upset and falling violently upon the cleared space between the tracks, susuined a fracture of the thigh bone of the left leg. Various witnesses told of the condition of the street at the time of the accident and Dr. N. C. Mackey, of Waverly, testified that Stanton's injury would have permanent ill effects. The plaintiff was still engaged in showing the dangerous condition of the road when court ad-

The defense will ask for a compulsory non-suit on the grounds that Stanton tipped over at this very same place only a few days before he was injured and under the law was guilty of contributory negligence by his performance if an act that he know was

I. H. Burns and C. R. Pitcher are attorneys for the plaintiff. Ex-Judge Knapp and Hon, C. P. O'Malley, of Willard, Warren & Knapp, and P. W. Gallagher represent the company. City Solicitor M. A. McGinley looks after the city's side of the defense.

Arbitrators, before whom the case was first tried, gave Mr. Stanton a verdict of \$800 and from this finding the company appealed.

#### MINOR COURT MATTERS.

Arguments Heard of a Number of Small Cases.

In argument court yesterday arguments were heard on the rules for a new trial in the cases of E. H. Ehrgood against the Moscow Water company, and Mary Wheeler against the Lackawanna Coal Company Beneficial

Judgment was entered for the plaintiff in the case of J. G. Bortree against McCarthy and others. In the case of Frank S. Smith, receiver, against M. T. Keller arguments were heard on the exceptions to the affidavit of de-In the divorce case of Anna T. Rich-

ardson against J. Richardson, a decree was forthwith made upon the conclusion of the arguments for the

The hearing on the exceptions to the incorporation of the borough Moosic was continued until the next

term of argument court. The hearing of arguments on the rule for a new trial in the Van Horn murder case will take place today.

#### BIG ASSUMPSIT SUIT.

R. W. Williams Demands \$11,700

from the Dolph Estate. Richard R. Williams began a suit in assumpsit yesterday against Isaac P. Hand and Edward Dolph, executors of the estate of Edward Dolph, deceased, to recover \$11,760 on a contract in connection with the opening and developing of the Anna Bell coal tract, owned

He alleges that he entered into an agreement with the deceased to open and develop the tract and was to receive five cents for every ton of mar-ketable coal mined. There have been 234.000 tons mined during the two and ried by Alderman Howe.

a half years that the tract has been opened and there is now owing to him, according to the terms of the agreement, the sum sued for, \$11,700. The defendants, he says, totally ignore his claim. Vosburg & Dawson are his at-

NEW TIME TABLE FOR VALLEY ROAD.

Services of Twenty-Seven Crews Will Be Dispensed With.

Sunday a new time-table will go into effect on the Lehigh Valley railroad, which will make some radical changes along the line of that road, particular-Guilty of Contributory Negligence | ly in the Hazleton region. On that day the lease of the Pottsville and Shenandoah division from the Pennsylvania Railroad company will be abandoned and the Valley trains taken off

between these points. Ever since President Walter took hold his policy has been retrenchment, which was confined first to a reduction in the force of clerks and agents, but which will now extend to the railroaders themselves, many of whom will be out of work after the abandonment of their trains. When this new timetable goes into effect twenty-seven tory negligence under the new ruling crews on the whole system will be suspended. This means at least the suspension of 150 trainmen, including engineers, conductors, baggagemasters and brakemen.

The reason for a number of these changes is attributed to the introduction of the trolley lines, many of which have been recently built and parallel the railroad for a long distance. is especially so in the coal regions. The different towns are now connected with a trolley line, and as the fare is generally cheaper than it is by the steam railroad the trolley lines secure

the bulk of the business. It is not the intention of President Walter to cripple the passenger service of the railroad, for whenever there who has undoubtedly been is a demand for a train and it can be shown that it will be to the advantage of the railroad company to put it into service it will be done. But the running of a large number of trains to acommodate a few, and at a loss, is to be done away with.

#### EDWARDSVILLE EISTEDDFOD.

It Will Be Held in the Welsh Baptist Church Feb. 22.

The Welsh Baptist church of Edwardsville will have an elsteddfod on Washington's birthday, Feb. 22, and the

#### KANE A CRACK BOXER.

He's the Pacific Coast Champion Will Meet Bobby Dobbs.

Although not generally known to Scranton's sporting fraternity, Bob Kane, of San Francisco, who is to meet Bobby Dobbs in a 20-round boxing contest at Music Hall next Wednesday night, is one of the most promising oxers who ever came east from the Pacific coast. He reached New York city last August with the Pacific coast lightweight championship. He had several matches closed and others in prospect, but a broken ankle prevented him from meeting any of his engagements except with Billy Steffers, of Troy, who was defeated by Kane in

ight rounds. Kane's confidence in his own ability s attested in his willingness to go as any as twenty rounds against as invincible a man as Dobbs. Dobbs hardly knows what defeat means and the ame applies to Kane, so a rattling contest may be expected. style of fighting like McAuliffe, Dixon, Lavigne and other good ones who are always working and always on the offensive. He will be here tomorrow with his trainer and will show

Scrantonians what he can do. What ought to be a good curtainaiser will be the 6-round preliminary between Reddy Connolly and "Jack Livingston." As recently as a year ago a large crowd paid regular admission prices to see Connolly get put out in a main bout with Jim Judge. Next week Connolly will be a side attrac-tion. "Livingston" is Judge's brothe::

#### THIS MAY INTEREST YOU.

Saven-Thousand-Dollar Estate in Missouri Awaiting a Claimant.

Attorney W. D. Isenberg, whose office 8 812 Union Trust Building, St. Louis, Mo., writes as follows to The Tribune "Samuel B. Beall, bachelor, carpenter by trade, died intestate in state, leaving no known heirs and an estate of \$7,000. He claimed to be from Pennsylvania, was five feet, ten blue eyes, about 76 years old. Eccentric, never spoke of his kin folks. Probably some of your readers are interested in his estate.

Married by Alderman Howe. Charles Riehl, 22 years old, of Scranton, and Maggie Butler, 21 years old, of Binghamton, were yesterday mar-

#### MR. BARKER FOR THE PRESIDENCY

He Is Slated for Chief Executive of the Board of Control.

CHOICE OF REPUBLICAN CONTROLLERS

Six of Them Caucussed Last Night Member from the Seventeenth -- Mr. Schrieter, Who Did Not Attend the Conference, Also an Aspirant -- The Barker Faction Has the One Necessary Democratic Vote.

Six Republican members of the new board of control caucussed last night in the board rooms and agreed upon Frank S. Barker, of the Seventeenth ward, for the presidency. The board meets for organization Tuesday night. Mr. Barker's candidacy is not unopposed. The presidency is sought by O. B. Shriefer, of the Sixteenth ward, who was not present at last night's conference. Although there will be a Republican representation of only ten members out of twenty-one on the new board, the Barker faction claims the possession of the one Democratic vote necessary to control the organization.

Although he is the choice of a majority of the Republican members, Mr. Barker is willing to retire in favor of Mr. Schriefer if no other agreement can be reached. Such an arrangement would not, however, insure the control of the prospective Democratic vote. The vote in question is unequivocally pledged to Mr. Barker and conditionly to any other Republican.

Last night's caucus was attended by Messrs. Barker, Shires, May, Evans, Phillips and Neuls. They were not at all disconcerted over the non-appearance of the four other Republican members, two at least of whom could not attend on account of other engagements, the notices of the gathering having been issued as recently as the evening previous. Those present were of the opinion that Mr. Schriefer would willingly withdraw in favor of the person suggested by the majority.

Mr. Barker has never been president of the board. Mr. Schriefer was recently honored with an election to the chair to fill the unexpired term of President George F. Mitchell, who lost his seat in the board by moving to Dunmore, and who was the predecessor of President Jennings

#### WORK OF THE CHURCHES. Figures Which Tend to Shed Light on the Subject.

From the Chicago Record. Of the 1,429,682,129 persons constituting the world's population in 1892, according to the estimates of M. Fournier de Flaix, 447,080,158 were Chris-The Roman Catholics aggretians. gated 230,866,533, the Protestants 143,-237,625, and the Orthodox Creek church 98,016,000. In the United States of America, at the census of 1890, the number of communicants (including 138,500 Jews and some small denominations of partly Christian character) was 23,205,901, with 177,363 churches and church property valued at \$678,245,844. Catholic bodies numbered 7,501,439; Methodists, 5,121,636; Baptists, 3,785,740; Presbyterians, 1.416,264; Lutherans, 1,-327,134; Disciples of Christ, 871,017; Protestant Episcopalians, 600,764; Congregationalists, 580,000; Reformed Bod-335,953; United Brethren, 245,718, and Mormons, 223,587. For January, 1897. the Independent published the latest accessible statistics of the same religious bodies as follows: Roman Catholics, 8.271,309; Methodists, 5,653,-289; Baptists, 4,153,857; Presbyterians, 1,460,345; Lutherans, 1,420,905; Disciples of Christ, 1,003,672; Protestant Episcopallans, 636,773; Congregationalists. 622,557; Reformed Bodies,348,471; United Brethren, 271,035, and Mormons, 234,000. Accepting these data, the net gain of | ful fire, can give no conception of the | greatly to the stock of human knolwedge.

Acknowledged

the entire church in six year has been about 10 per cent, on its well number in 1890. The aforementioned eleven churches show an aggregate increase of 2,067,021 members, of whim the Ro-man Catholic received 59,870, the Methodist 531,653, and the Eaptist 368, 117. Of the English-speading raigious communities of the world about 107, 000,000 are professedly Cristian, and

about 17,000,000 are of no particular religious profession. The modern Sunday school, o whose culture the brightest genius a assiduously devoted, is that desatment of and Were Unanimously for the the church in which the pairipal part of preparatory work is dore Many of its students become devoty members of the church and effectiveworkers in its ranks. The latest statics of its numbers are those compile by the statistical secretaries of theseventh international Sunday school convention, held at St. Louis, Mo., Ir September, 1893. In them the numbe of Sunday schools in the different giutries of the world is given at 224,562, c teachers at 2,239,728 and of pupils at 20,268,933, Forty-seven thousand ad sixty of these Sunday schools, 67,391 teacher and 6,979,913 pupils are it the united kingdom of Great Britainand Ireland; 134,653 Sunday schools, 1,38,708 teachers and 10,442,705 pupils are n the United States, Canada, Newfoundland and Labrador, the West Iniles, Central America and Mexico, Roman Catholic schools, with a membeship estimated by clerics at 800,600, and non-evangelical Protestant schools, with a probable membership of 200,000, are rot embraced in the returns.

#### COLD WINTERS.

Some Remarkable Records of Low Temperature.

the Spokane Spokesian. The man who leaves this section for the Klondike with a notion that it is not much colder on the Yukon than on the Columbia, will know more after he has passed one wints in Alaska. A few years ago the United States coast and geodetic surve; took a series of weather observations in the Yukon, near the Klondike. The average for December was 11 below ero; for January, 17 below, and for February, 15 below. For five days in February, the average was 47 degrees below zero. For 168 days that winter the temperature remained below the freezing point

This would be trying in a land of more sunshine. In Alaska, where, in midwinter there are about twenty hours of darkness to four of daylight, it is most depressing. After a while gas and electric lights may be twinkling on the Klondike, dispelling a part of the darkness, but for the present when coal oil and caniles must be counted as luxuries only within reach of the rich, the long, dark winters will be full of gloom.

However, there are points in the United States which car make an appreach to the Yukon re-ord for low temperature. At Poplar River, Montana, the weather bureas has a record of 63.7 degrees below zero; at Fort Benton, 59 below; Fort Aminibeine, 55.4 below; Fort Custer, 47.5 below; Fort Shaw, 44.5 below: Fort Maginuis, 42 below: Helena, 46.5 below, and Port Buford, North Dakota, 18.2 below.

One of the coldest and vindiest places in the United States is the summit of Mount Washington, in New Hamp-The government observatory shire. there has some startling records: In November, 1884 the wind blew 128 miles an hour. On December 19, 1884, with the temperature 42.2 degrees beow zero, the wind blew 96 miles an hour. On January 22, 1885, with the temperature 50 below, it blew 110 railes an hour, when frost stopped the wind gauge. In March, 1881, the wind attained a velocity of 132 miles an hour, and in December the same yest, of 170 miles an hour.

The coldest inhabited point on the globe is thought to be Werehojansk, Siberia, with a record of 90.4 degrees below zero. In the winter of 1885 the temperature fell to \$4.3 below zero in February, to 77.4 below in March, and to 78.2 below in December.

real meaning of these figures. On the 40 or 50 below zero a man's breath in cutting the frozen atmosphere creates a roaring sound that is startling when first experienced.

VIRTUES OF THE TURQUOISE. A Number of Precious Stones Nov Unknown.

From Table Talk.

The turquoise is especially rich in cirtues. The Germans claim that by its varying shades it turns tell-tale on the caprices and moods of its wearer. Cardau, the renowned Italian physician and philosopher, asserted that turquoise mounted and worn as a finger ring secured a horseman from all in jury, and added with commendable caution that he had "a beautiful turquoise given him as a keepsake, but never tested its virtues, not caring for the sake of the experiment to risk his life." Shakespeare also gives these lines to Shylock: "He would not have lost his turquoise ring for a whole wilderness of monkeys." An old book written by Camilius Leonardus tells much of interest about jewels, and nan es a number of stones that either are no longer found, else were creations of the author's imagination. This is most probable when we read Leonardus' description of the alecoria, which, he says, not alone renders a man invisible, but "being held in the mouth illays thirst." The alecoria, he further states, is to be found only in the intestines of a capon that has lived seven years. "When the stone has become perfect," to quote this authority, "the capon does not drink." However, it is never larger than a large bean. Again, he tells of the bozoar, a 'red, dusty, brittle and light stone,' which is taken from the body of some animal, and is infallible against melancholy. He credits Queen Elizabeth with wearing a bozoar, and Charles V had four of them. The four rings however, of most historical interest were those presented by Pope innocent to King John. The monarch was urged to note with extreme care the shape of the rings, their number, color and matter. The number four, being a square, typified firmness of mind, fixed steadfastly on the four cardinal virtues. The blue color of the sapphire denoted faith; the green of the emerald, hope; the crimson of the ruby, charity, and the splendor of the topaz, good works. The rings themselves ren-
