DANGERS IN SODA. Serious Results Sometimes Follow its

Excessive Use. Common soda is all right in its place and indispensable in the kitchen and

for cooking and washing purposes, but it was never intended for a medicine and people who use it as such will some day regret it. We refer to the common use of soda to relieve heartburn or sour stomach,

a habit which thousands of people practice almost daily, and one which is fraught with danger; moreover the soda only gives temporary relief and in the end the stomach trouble gets worse and worse. The soda acts as a mechanical irritant to the walls of the stomach and bowels and cases are on record where it accumulated in the intestines, caus-

ing death by inflammation or peritonitis Dr. Harlandson recommends as the safest and surest cure for sour stom-ach (acid dyspepsia) an excellent prepby druggists under the name of Stuart's Dyspepsia Tablets. These tablets are large 20 grain logenges, very pleasant to taste and contain the natural acids, peptones and digestive elements essential to good digestion, and when taken after meals they digest the food perfectly and promptly before it has time to ferment,

sour and poison the blood and nervou Dr. Wuerth states that he invariably uses Stuart's Dyspesia Tablets in all

cases of stomach derangements and finds them a certain cure not only for sour stomach, but by promptly digest ing the food they create a healthy appetite, increase flesh and strengthen the action of the heart and liver. They are not a cathartic, but intended only for stomach diseases and weakness and will be ound reliable in any stomach trouble except cancer of the stomach. All druggists sell Stuart's Dyspesia Tablets at 50 cts, per package.
