VOLUME OF BUSINESS IS STILL INCREASING

Foreign Possibilities, However, Have Placed a Check on Speculation.

No Abatement in Foreign Demand for Wheat.

New York, Feb. 25.—R. G. Dun & Co.'s Weekly Review of Trade will say tomorrow:

Foreign possibilities have much affected speculation and caused hesitation in some large business operations, possibly accounting in part for a check in the rapid advance of wheat, but industrial production continues larger than ever, a few more words being added to the active list with a decrease in the number of hands on strike, and renewed evidence that the volume of business is larger than in February of any previous year. Nor is there any symptom of a senseless craze based on rising prices. The legitimate export and domestic demand presses closer to the capacity of works, and though there is no slight advance in any line, and in all narrowness of profit is a matter of complaint, new business for this dull season is unprecedented.

Wheat continues its progress upward until 10.75 was reached on Monday, but falling 2½ cents, as if there were fear that Spain would somehow stop British vessels from taking wheat across the water. Any yielding based on foreign possibilities deserved little notice, but the price has advanced about the same Chicago speculators last took occasion to shake off wheat followers and the opportunity for a reaction was inviting. There is no abatement of foreign demand. Atlantic exports were 1,965,814 bushels, flour included, against 1,828,444 last year, and Pacific exports 1,576,378, against 1,364,642 last year, and in view of current excitement these figures are more important than the aggregate for four weeks 10,496,912 bushels, against 9,588,415 last year from Atlantic ports, and 4,052,028 against 3,611,246 from Pacific ports. Corn exports for the week were 14.5 per cent less than last year but the cash price declined but slightly. The spot price of cotton was not affected.

It is not so much a matter of much improvement in textile manufacture, but the cotton branch has gained by the closing of the strike in one Fall River mill and by addition of some works at the south. The woolen manufacture meets many cancellations, especially in goods sold early with definite price, but is doing more than ever at this season, though new business in the higher grades or worsteds and woolsens is not particularly encouraging. Sales of wool are slow, with weakness in clothing, amounting to about two cents decline from the highest point, indicating that mills have at present abundant stocks, but some are selling foreign wool in order to take supplies of other qualities.

In iron manufacture there has more demand for products and slightly better prices for Bessemer pig, which has advanced to \$18.40 at Pittsburg, with Grey Forge unchanged there, local coke strong at Chicago in spite of some southern weakness, and eastern anthracite really unchanged, though some grades at a shade lower. No finished products have changed in price, and all are strong in demand, excepting bar, which a combination has failed to advance. Some large contracts are reported, especially in car and bridge building, ship and structural work, and the demand for sheets is heavy. Minor metals change but little, tin weakening a shade to 1½c, with larger receipts.

Failures for the week have been 25 in the United States against 296 last year and 30 in Canada against 59 last year.

Oh, How Thankful

Pain Was Maddening and Hope Had Been Abandoned—Wonderful Results of Purifying the Blood.

"A very severe pain came in my left knee, which grew worse and worse, and finally a sore broke out above the knee. It discharged a great deal and the pain from my thigh down was maddening. Large, hard, purple spots appeared on my leg. I suffered in this way for years, and gave up all hope of ever being cured. My wife was reading of a case like mine cured by Hood's Sarsaparilla, and she advised me to try it. I began taking it and when I had used a few bottles I found relief from my suffering. Oh, how thankful I am for this relief! I am stronger than I have ever been in my life. I am in the best of health, have a good appetite and am a new man altogether."

J. P. MOORS, Lisbon Falls, Maine.

THE MARKETS.

Wall Street Review.

New York, Feb. 25.—There was a recovery in the prices of stocks today, in which the engagement of gold for import was the predominant influence. The course of the exchange market yesterday foreshadowed the early importation of gold, which is the direct outcome of the stiffening in the rates for call money. The amount of sterling exchanges held in New York is variously estimated at from \$40,000,000 upwards. A large part of it has been used as collateral for loans, and the large liquidation of loans has released a quantity of this exchange and brought it upon the market. In other words, the rise in the money rate makes it more profitable to bring home funds which have been left abroad on account of the higher rate left to prevailing there. The import of gold is likely to continue unless there should be a sharp advance in the money market in London and Paris. The calling in of this country's gold credits abroad is likely to put a stop for the present to foreign buying of our securities, which has been large of late, and which continued even today. The bears made an effort to retain control of the stock market, but they were unable to wipe out the gains shown in sympathy with London. Trading was nervous during the first hour, but after that the upward tendency became fairly settled and continued throughout the day with occasional slight reactions. The day's highest level of prices was not fully maintained, but net gains generally were from 1 to 2 points. Total sales were 467,600 shares.
