Presence of a Squadron of United States Warships at Hong Kong Arouses Much Feeling at Madrid-Spaniards Threaten New York-Opinions of the Spanish Press-U. S. Naval Officers Go Into Active Service as Their Presence Is Required.

Madrid, March 3 .- The news of the | body buried last week was that of presence of a squadron of United Charles A. Scott, of Orange, N. J., States warships at Hong Kong has aroused much feeling here. It is presumed that the vessels intend to threaten Manilla, the capital of the Phillippine Islands, in the event of war with Spain.

A "high personage" is quoted by onot the newspapers as saying: "If the yankees go to the Phillippines the Spaniards will go to New York." The Globe says that the government is silently preparing for the worst.

THE ANTI-SAGASTA PRESS,

Fumings Against His Pacific Attitude to This Government. Madrid, Feb. 17 .- Fierce indignation characterizes the Spanish papers that are not supporters of the government at its weakness in replying in gentle terms to the American demand for extions about the Depuy de Lome

he Imparcial remarks: "It is the eight of weakness to suppose we are going to disarm the Yankees oy means of patience. From them we shall gain nothing by it, and, on the other hand, we shall lose the esteem, the dignity and bravery of Spain, obtained from the other nations. Paraphrasing the never-to-be-forgotten Spartan words of Mendez Nunes at Callat, 'Suffer it to be said Spain loves honor more without Cuba than Cuba without honor.' We have sacrificed our youth, we have sacrificed our millions. Must we also sacrifice our national honor? Not the great Antilla, not a hundred Antilles, would be worth so great a sacrifice."

It then argues that all Spain's conessions will be useless if the United States really seeks to break off friendly relations, adding: "If a pretext is sought it will be found, for instance, a hostile demonstration against the Spanish warships visiting American ports or a demand for a pension for has not been made known, the whow of the dentist, Ruiz"

"In Europe," it continues, "everyone has already perceived this. The universal conscience is with us, and it is Members Are Waiting Orders from really a shameful fact that the action the United States rouses more indignation in foreign minds than in some Spanish. We believe we inter pret better the spirit of the Spanish people and we energetically protest against what has been done in order that outside Spain it may be known that her rulers do not reflect the feelings of the Spanish people in such acts as the explanations to McKinley and also that this nation of brave men has not become a flock of lambs." The Correo Espanol, after recapitulating all the injuries it alleges Spain has suffered at the hands of the United States, remarks: "The last affair-that of Dupuy-has given the measure of our decay and sufferings. Any other government than that we endure-ancient mummies and she-men-when drawing up the note in yesterday's council in reply to the inadmissible, uncalled for, and ruffianly demands of the president of the republic of the United States, would have r companied it with Mr. Woodford's Jassports. For it is clear that neithe. concessions nor the humiliations of the Span ish government change in the slightest degree the plan drawn up by the American government and people. They want war, and war will come."

One of the features of the discussion was a speech delivered by Mr. Vest (Mo.), in which he ridiculed the idea carpenter's mate. The Mikado Requests a List of Hi Subjects Killed on the Maine.

Washington, March 3 .- The Japanese minister today requested the state department to furnish him with a list of the names of the Mikado's subjects lost in the Maine. Nine Japanese were in the ship, and only two of them were saved.

The minister says that he desires the information to transmit to the families of the deceased, but it is thought by naval officers and state department officials that Japan may have a deeper

purpose in view. Japan has had her eye on the Philippine Islands for a long time, and they think it possible that she may seize on the killing of her subjects as an excuse for active interference in case trouble should arise between Spain and the United States, believing that with all the Spanish sea power engaged actively on the Atlantic it would be an easy matter for her

In the course of the inquiry into the naval resources of the United States an order has been issued to make a test of the machinery of the old war monitors at the League Island navy yard. These are single turretted craft that are armed with big smooth bore guns in turrets that could likely be pierced by the modern high powered rifles on the battleships, but they would still be of service in an emergency. There are eight of these moniin the morning, at which General Gobin tors at League Island and the govern nent owns several others that are now loaned to the naval militia organizations of some of the states. Those at League Island are the following: Canonicus, Mahopac, Manhattan, Catskill, Jason, Lehigh, Montauk and Nahant. They are all between 1,800 and 2,100 tons displacement and draw very little water so that they can take up advantageous positions on shoals commanding channel approaches. The intention is to turn over the old engines and work the machinery that is made to turn the turrets if it can be made to work at all.

### INQUIRY FROM JAPAN.

During the course of the day similar nguiries to that made by the Japanese egation as to the number of her subjects aboard the Maine came to the navy department from the German and the Swedish legations, and it is expected that others will follow. Nearly every nationality was represented n the Maine's big crew.

There was a conference today be tween Secretary Long and Representative Boutelle, chairman of the house naval committee, in reference to the regular naval bill. It had no connection with emergency measures. Mr Long said they had gone over the question of docks, equipment, etc., as

Atlanta, Ga., March 3.-General Wesey Merritt, of the United States army, Lieutenant Strother, his aide, and Major James B. Quinn, of the United States engineers' service, passed through Atlanta yesterday on their way to Washington, General Merritt said that he was on his annual tour of inspection and that he came here to investigate the fortifications and report upon any needed improvements. "The Gulf coast is fairly well fortified." he added. "There is still some work to be done, but on the whole I am pleased with my annual inspection and I think that in the event of war we could give a good account of our-

selves." **REVOLUTION IN VENEZUELA.**

Miles from Carneas. Washington, March 3 .- The state department has been informed that a mall revolution has broken out at Valencia, about two hundred miles rom Caracas, capital of Venezuela. No details are given.

This is evidently directed against President Andrade, who was only a few days ago inaugurated as the suc cessor to President Crespo.

### TONS OF MERCHANDISE.

Portland, Ore., March 3 .- The steamship George W. Elder has sailed for Skaguay and Dyea with four hundred passengers. Her freight space was occupied by miners' outfits. Several hundred tons of merchandise had to be

held over until another vessel. Seattle, Wash., March 3 .- A letter has been received by the owners of the illfated steamship Clara Nevada, from Sanderson Reed, of Portland, who was sent north to search for the body of his friend, Purser George Foster Beck, and for the bodies of other members of the crew and passengers. Reed says in his letter that he has visited the scene of the wreck in the steamer Rustler and has made a careful examination. The wreck has slipped off the rock and at high tide is about twentyfour feet under water. The masts of the steamship are still standing. As far as Reed could ascertain, there is a big hole in the vessel's side. The boilers are intact apparently. Reed learns that a terrible gale was blowing at the time the fire on the Clara Nevada was observed. Suddenly there was a flash and all was dark. Heretofore it has been supposed that the flash marked the explosion of the bollers. Reed says that it probably came from the oil stores. His theory is that the bollers did not explode, but that the vessel was blown on Eldred Rock and that the fire was caused by the lamps being upset by the shock. Many of the bodies

of those who went down with the vessel are, it is thought, likely to be found near the wreck. Divers will be sent north to search for them.
