## SHERIFF MARTIN'S **DEFENSE CLOSED**

Deputy Hess on the Witness Stand--- He Did Not Shoot.

SHOWING EVIDENCE

10

Several Witnesses Testify to the Treatment That Sheriff Martin Received from the Mob--Deputies Did Not Shoot to Kill--Tipstave

Wilkes-Barre, March 3 .- When court Whether this work is intended to meopened this morning in the Martin trial, Deputy Hess was placed on the stand and his cross-examination was continued. Witness said he heard no command to fire, and dld not fire a shot, nor did he know what men of the company he commanded did shoot. Deputy Hees said that Sheriff Martin's life was in great peril from the shooting, as he was in a group of the

formerly of Hazleton, said he was acting as deputy for four days. He corroborated the testimony of other witnesses as to Sheriff Martin being roughly handled by the strikers and saw their main body make a rush toward the deputies. He said no shots were fired after the voney, and that to twenty-six feet. he did not fire at all. At the time the firing began he was overcome by the heat and was leaning against the fence

Lawyer George A. Coxe, of Philadelphia, representing the Austrian government, was here today for the first time since the trial began. He said his visit was unofficial.

As soon as all the witnesses have been heard the defense, so Attorney Lenahan says, will ask Judge Woodward to give binding instructions to the jury to bring in a verdict of not guilty for all the defendants.

"I fired one shot," said Charles J. Haenst this afternoon. He was the first of the deputies to admit that he had shot. He told what he had seen at West Hazleton. Deputy Platt leveled his gun at a striker who was picking up a stone. He also rode in the car with Thomas Hall and did not hear him making any threats against the strikers. "At Lattimer," he said. "I saw the sheriff hold up both hands stop the strikers. In one hand he held a paper. I saw him grab for a man and also saw two strikers with revolvers thrust them at the sheriff. while another made a dig at him with a knife. Then they rushed upon us and when they got within ten or fifteen prey to bad weather. feet of us I raised my gun and fired. I thought my life was in danger and felt if they got at us they would kill amount of casualties. During that time THE MARKETS.

Wall Street Review. New York, March 2.-Some of the bull traders bid up prices of specialties this morning and carried the general list with them in an effort to renew the bull cam-paign. But there was no outside interest and the efforts of the leaders were not and the endra of the headers were not seconded. The market drifted initiessity for the rest of the day, sometimes up and sometimes down and some part of the early gains remained for most stocks at the close. Buying of New York Central in the last half hour on the receipt of the

New York Produce Market.

news from Albany that the assembly had passed a measure assuring the legality of the bond issue for the consolidation with the Lake Shore caused a stiffening of the market in the closing dealings. There were long periods during the day when business was almost stagnant and prices move very sluggishly The mar-ket was in the hands of small traders and reflected no conditon of general bus-iness beyond the feeling of uncertainty scheme should now be on the high road toward being fully and successfully carried out, although the idea was regarding the Cuban question. Large op-erators and the general public are evi-dently out of the market by reason of mooted for the first time in the Russian press somewhere about three years ago. We may now await an extension of the this same uncertainty and the room trad-ers seek to move prices by all sorts of Russian fleet. In case of need, Russia will be able to remove her entire Balrumors and surmises many of which orig-inate in the board room and are denied before they get beyond its doors. There tic fleet to the Murman coast and defend the Baltic ports by means of gunwas a serene disregard of attempts to precipitate a new phase of the Cuban question in advance of the formal report As Cronstadt does not meet the re-quirements of the Russian navy in the of the Maine board of inquiry which is looked to to definitely fix the status of Baltic, the port of Libau, on the Courland province coast, is slowly but sure-ly being converted into a first-class the question. Total sales were 294,100 shares.

Conniff the Last Witness.

strikers.

James A. Salem, of Harrisburg, but

DID NOT SHOOT TO KILL.

On cross-examination the witness said he did not fire at any particular point of the men's bodies, that he did not take aim, and that he did not desire to kill and did not think he shot to take life.

Thomas Hall, who organized the posse for Sheriff Martin, was the next witness. He told how the sheriff had told him to get together a lot of men. He had done so and they had been Sheriff Martin who had sworn In inclucted them not to shoot unless their lives were in danger, and said that he would tell them to disperse, that if they refused he would make an arrest and if they then resisted the deputies should shoot.

"I heard two shots before the volley," said the witness, "they sounded like revolver shots. When I saw the sheriff surrounded I thought he was gone and when the strikers charged on us I thought they would at least disarm us. I did not shoot."

On cross-examination witness said that he had organized a posse of coal and iron policemen on the Saturday before the sheriff reached Hazleton. This was at the request of Superintendent Zerbe, of the Lehigh Valley Coal company, whose colliery had been attacked and the men driven out. The cross-examination was very lengthy but brought out nothing particularly new.

Sheriff Martin was recalled at this point and asked if he observed any weapons on the strikers at West Hazleton. He answered that he saw three men with revolvers in their hip pockets. On cross-examination he said he did not converse with any of them nor did he arrest them. Asked if any of the men in line at Lattimer had not been sworn in as deputies he said: "Well there were not many who had not been sworn in."

He could not tell how many. T. M. Coniff, a tipstave, said that on the night of the shooting he met Sherif! Martin in the court house about S o'clock. The sheriff had a bruise on his cheek and a scratch on his neck. This was the last witness for the defense and when he left the stand Attorney Lenahan announced the clos-

District Attorney Martin said he had six or eight witnesses in rebuttal whom he would have in court in the morning. Court then adjourned.

RUSSIA'S NEW ATLANTIC PORT.

Ecatherinsk in Lapland -- Ice Free in Winter-- Threatens England from the North.

From the London Globe.

While the attention of Europe has been centred mainly on the progress of events in the Far East, Russia has been silently laying the foundations of an ice-free naval base on her northwest-This long-talked-of naval station in the north of Russia is to be connected with the railway system of the empire by railway running from the harbor of Ecatherinsk to Kimi, with a branch line to Kandalask on the White Sea in Russian Lapland. This new line will be 580 versts in length. will probably be connected with Finnish line at Joinsun, in the

north of Finland, or with the St. Peters. and Petrazavodsk Railway. In a few years, Russia will pos-a naval station in the far north, a will be open all the year round.

176 vessels, or 137,286 tons, were re moved from the register in various vays. This compares favorably with the same period in 1896, when 211 yessels, or 162,724 tons, were removed. It s, however, slightly over the average for the past decade. There is improvement under every heading, as compared with the same quarter of last cear, except under "Wrecked," and this increase seems to be due to the larger

size of the vessels, and not to an augmented number of casualties. In the third quarter of 1890 there were 6 vessels, or 62,763 tons, wrecked. against 80 vessels, or 68,882 tons, in 1897. Of vessels owned in the United Kingdom, there were 21 lost in this way in each quarter, but in 1896 33,000 tons, There were 42 vessels, or 35,325 tons,

broken up, condemned, etc., in the period under review, against 39 vessels, or 47,640 tons, last year. The versels which foundered seemed to have been generally of small size, and only two, totaling 454 tons, were owned in the United Kingdom.

When we begin to discriminate between steam and sailing craft we find that it is the former that account for the major portion of the tonnage lost, while the latter swell the number of vessels lost, the vessels being: Steam, 57, vessels of 84,681 tons gross; sail g, 119 vessels of 52,606 tons net. During the quarter there was not a single steamer posted as "Furned," "Lost," or "Missing," and only two were abandoned at sea. As against this, there

were 11 sailing ships abandoned, six burned, one lost, and four missing. Of vessels owned in the United Kingdom, .044 per cent. of steam were removed, and .057 per cent. of sailing vessels, a fact that a timid voyager may well note. The disparity of these figures would be increased still further if yessels broken up were not included. If we were to judge by the tables, the safest ship to go to sea in is a Swedish

steamer, since only .018 per cent, of the vessels under that flag were lost in the quarter. This high figure of safety is not always maintained, but, nevertheless, Swedish steam vessels have an excellent record. Their sailing craft do not do so well, but then many of them are engaged in the timber trade, and any leaky tub is considered good

## WINE FROM LEAVES.

enough for that.

A French chemist has conceived the idea of making wine from the leaves of fruit trees. He thinks that the flavor of the fruit of shrubbery is generated in the leaves and passes from them into the fruits. Also that the pleasant taste of the apple, pear or grape is prepared in the leaves of these respective plants, al-though it may be less noticeable than in though it may be less noticeable than in smaller shrubbery, such as the black cur-rant and other low bushes. To make the wine he crushes the leaves

To make the wine he crushes the leaves and places them in water containing fif-teen per cent. of sugar and the necessary yeast for a fermentative. Grape and ap-ple leaves have been used, the work be-ing accomplished in a fermenting vat. When apple leaves are used there is a strong odor of apples as the process ad-vances, and when the fermentation is fin-ished and it has settied a straw-colored liquid is obtained, which smells and tastes like the best wine. When vine leaves are like the best wine. When vine leaves are used the results are even better .- New Ideas.

One Way to Fix It.

From Pearson's Weekly. "Bridget, you've broken as much china this morning as your wages amount to. Now, how can we prevent this occuring again?" "Of don't know, mum, unless yez raises
