However one may differ in general from the extreme sentiments found within its chocolate-hued covers, Mr. Hubbard said one thing in the February issue that I endorse fully. Here

it is: "On the subject of travel there is one remark that is heard in America very often, and the man' who makes it always prides himself on having said something original and very bright. Here is the moss-covered remark: 'Before I see Europe I want to see all of my own country.' It sounds patriotic and fine, doesn't it? But the man who remarks this remark has been cheated

cet of his trip to Europe, and his remark is only sour grapes; but the people who listen often believe it wise. The truth is that a three-months' tour of Europe is worth more to a young man or woman than three years of steady travel in America.
