SPAIN'S MINISTER IS INTERVIEWED

Senor Polo y Bernabe Talks with Newspaper Men.

HE FREELY DISCUSSES AUTONOMY

Regarding the Present Strained Re-Intions Between the United States and Spain He Is Reserved -- Is Sure That His Country Doer Not Desire

Washington, March 11.-Senor Luis Polo y Bernabe, the new Spanish minister, was seen at the Spanish legation today by an Associated Press reporter, and for the first time since his arrival consented to speak concerning Spanish affairs, observing such reti-cence on certain phases as diplomatic propriety required. Since the minister's arrival he has received a cable gram from Captain General Blance stating that the Cuban cabinet had designated Senors Sevilios, of New York, and Barilla, secretary of the Havana chamber of commerce to act with Senor Angulo in negotiating commercial treaty between the United States and Cuba. The minister referred incidentally to this fact as he regarded it as another evidence of the complete autonomy which Spain had granted to Cuba. Although Senor Polo will be the plenipotentiary in arranging a Cuban treaty, the Cuban delegates above named, chosen by the Cuban cabinet will have entire control of the terms of such a treaty.

Speaking of the present policy of Spain in giving autonomy to Cuba, the

"The government has granted autonomy on the broadest and most liberal lines. It is designed to give to the Cuban people the complete direction of their internal affairs, thus gratifying the honorable ambition of the Cubane, while at the same time maintaining the historic allegiance of Cuba as a col-ony of Spain. The government is not executing this plan grudgingly or with any technical restrictions, on the con-trary it appreciates that the largest degree of prosperity for the island may be expected from such a measure of reform as will meet the cherished ex-

pectations of Cubans loyal to Spain. When Senor Polo's attention was drawn to recent critical phases of the Spanish situation, he spoke with much reserve. The Lee incident happened while he was on the ocean and he knew nothing, he said, of the circumstances, although he felt confident a misunderstanding had grown out of some casual allusions to General Lee not meant as any intimation that his recall was

The minister was then asked if he viewed the present condition of affairs between the United States and Spain as indicating war. After a moment's hesitation, he answered gravely;

I am sure that the United States does not want war, just as I am sure that the Spanish government does not want war and will do everything honorable in its power to avert such a

Senor Polo was formally received in his official capacity by Secretary Sherman and Assistant Secretary Day at introduced to the secretary and assist-ant secretary of state. Their arrival ersation was purely perfunctory, being devoted almost entirely to the consideration of the arrangements for the minister's formal call upon the presi- ly chosen. dent for the presentation of his cre-

This ceremony would have been observed today but for the fact that the president was engaged with his cabinet at the time usually alloted to such functions. It was therefore arranged that Minister Polo should be given an audience by the president at the white house tomorrow morning at 11 o'clock. He will meet the secretary of state at the state department a few minutes bewith the president and will accompany him to the white house. In view of the strained relations now existing between the United States and Spain, more than usual interest attaches to the addresses which will be exchanged between the chief executive and the Spanish minister on this occasion. These addresses will be prepared and will be watched with interest inasmuch as they may be to some extent significant of the sentiments of the representatives of the two governments on the vital questions now at issue between them.

The Matter Has Not Yet Been Definitely Settled .- False Reports Are Denied.

Washington, March 11.-It is said at the state department that the Ottawa reports to the effect that the United States and Great Britain had signed a treaty for the settlement of the Alaskan boundary disputes are incorrect, no treaty having been signed as yet and the matter still being a subject of negotiation. The department will say nothing regarding the details from Ottawa as to an agreement that the boundary line shall be computed from the shore line, following it in all its sinuosities, and that the tops of mountain peaks shall mark the limits of American territory, but it is intimated

Sir Julian Pauncefote, the British ambassador, through his secretary, Mr. O'Beirne, also authorized a complete and special denial of the reported perfection of a treaty. No convention of any character, he said, had been made, and the details given, he said, therefore, were erroneous as a whole and in detail

On April 18, 1896, Kornewski took out his first papers, averring that he had arrived in this country Sept. 12, 1895. On Dec. 1, 1897, eight months after declaring his intention of becoming a citizen he goes before court, and, on the strength of an affidavit that he landed in this country Sept. 12, 1881, secures naturalization papers. In this second affidavit the "doctor" says that he was born in 1857 and came to the

country under 18 years of age. "Leon F. Olchefski" is signed to the affidavit as the witness who knew that Kornewski had been a resident of this ountry for over five years.

Wheat exports have been 4,171,497 bush is, flour included, against 1,268,171 last year from Atlantic and Pacific ports and for two weeks 7,462,730 bushels against 3,916,546 last year. The weekly output of ptg iron was 228,338 tons February 1, but 234,439 March 1, and the increase of unsold stocks in February was only 5,852 tons veekly, leaving 225,532 tons weekly for export or consumption, against 218,457 in January and 215,249 in November, 1895, the month of greatest consump-tion before this year. For four months production has gained a little but consumption still more, and if preparations for war last only a few weeks, they will add much to the demand. Other consumption, for railroad cars of which two roads have ordered 2,300, for vessels on the lakes and elevators and cil pipe lines, for agricultural implement works and for sheets, is beyond precedent and structural and rail works are crowded with orders, though now receiving few. Iron bar works are depressing prices because some are not fully employed, while the steel bar nulls at Milwaukee have to put on three eight-hour turns daily to keep with orders. Prices are very strong except for wire nails which dropped because the great wire combination
