

GREAT ACTIVITY IN NAVAL CIRCLES

The Spanish Torpedo Fleet Sails from the Canaries.

EFFECT OF THE ANNOUNCEMENT

The Most Energetic and Warlike Preparations Follow One Another in Rapid Succession—Important Naval Appointments—Admiral Sicaud's Leave of Absence.

Washington, March 24.—The last day before the arrival of the report of the Maine court of inquiry was one of unexampled activity in all official quarters. Advice came early that the Spanish torpedo fleet had sailed from the Canaries for Porto Rico and from this moment the most energetic warlike measures followed one another in constant succession. The movement of this fleet had been watched with the keenest interest, as it was felt to involve serious possibilities which might compel the United States government to protest against the movement as of a hostile character. Immediately on the receipt of the official dispatch from one of our naval attaches abroad briefly announced the sailing of the fleet, the fact was made known to the president and an emergency conference was held between him and Secretary Long and Assistant Secretary Roosevelt. The seriousness of the movement was fully considered and the president was advised that naval strategists regarded it as essential that the torpedo fleet should not be allowed to reach western waters. What, if any conclusion was reached is not known. Later in the day the Spanish minister, Senor Polo de Bernabe, called at the state department and spent some time with Judge Fay. It was naturally inferred that the approach of the Spanish flotilla was one of the subjects referred to. Whether, however, there was any suggestion against the move was not disclosed by either Judge Fay or the Spanish minister, of whom maintained the strictest reticence regarding their conference and refused to speak concerning it.

FLEET ON WAR FOOTING.

Following the flotilla announcement, important news followed rapidly. The first was this announcement by Secretary Long, indicating the placing of our squadron and fleet on a war footing. "Admiral Sicaud has been granted leave, very much to the regret of the navy department, although on account of his health.

"Captain Sampson has been made commander of the fleet at Key West. Captain Evans has been ordered to take command of the battleship Iowa."

The orders to the squadron in Hampton Roads have not yet been issued. Although the announcement did not state, it soon became known that Commodore W. W. C. S. I. L. C. I. was to command the "flying squadron."

This announcement was recognized at once as of unusual importance at this juncture. Admiral Sicaud has been in command of the fleet at Key West throughout the critical period of the Maine disaster. Captain Sampson has been in command of the Iowa, but more recently has been conspicuous before the public as president of the Maine court of inquiry. Captain Robley Evans is known as "Fighting Bob." The most important move was a determination to create a joint committee from the war and navy departments so as to bring them into harmonious action on all measures. Captain Barker, the naval aide of Secretary Long, was designated to represent the navy department in this common plan of action. The representative of the war department has not yet been named. It will not be necessary for these two officers to leave Washington as they can best arrange a joint plan of action in conference with the bureau chiefs of the two departments here.

NEW BOATS PURCHASED.

Then at the close of day came an announcement that the navy department has succeeded in purchasing eight steam yachts and four steam tug boats, and near New York, for use in the auxiliary naval fleet.

The boats are about 400 tons each and are torpedo boats. The yachts purchased are among the fleets along the Atlantic coast and are said to be somewhat similar to the Mayflower recently purchased of the Ogden Goeliet estate. This acquisition to the navy is regarded as an exceptionally valuable one at the present time, as the greatest need is felt for small craft suitable as torpedo boats and dispatch boats. There was additional satisfaction at the navy department at the large number secured in a single purchase. The names of the yachts purchased for the various yachts and tugs are not disclosed as it is said this would prove an embarrassment to the government in promoting speculation on other craft for which negotiations are now proceeding.

AMERICAN HANDICAP.

Scranton Man Among Those Who Finished With 24 Straights.

New York, March 24.—The grand American handicap, which is the blue ribbon contest annually brought off under the auspices of the Interstate association, was brought to a successful issue late this afternoon at Elkwood Park, N. J. Nine men finished with twenty-five straight kills, the highest possible score, and divided the first nine monies, which amounted to \$775. Twenty-two killed 24 birds each and divided the remainder of the stakes, the entire amount of the entry money being \$5,075. As the light was poor, and a drizzling rain was falling when the twenty-fifth round was completed, the rain shooter who divided the first money decided to postpone the shooting off of the ties until tomorrow morning. This year the Interstate association has offered a special prize, a very handsome silver cup, and this will go to the winner.

The conditions of the shoot-off will be "miss and out." Mrs. William P. Shattuck, who killed nine out of twelve birds yesterday, continued today and was even more successful. Of the thirteen birds which she shot at today she missed twelve and one fell dead out of bounds.

The men who finished straight with 25 kills, were T. P. Laffin, of Rock Island, Ill.; J. R. Elliott, of Kansas City, Mo.; R. O. Heikes, of Dayton, O.; W. Wagner, of Washington, D. C.; W. Loomis, of Omaha; "Jim Jones," of Philadelphia; E. D. Fulford, of Utica; "Walters," of Long Branch, N. J., and U. F. Bender, of this city. Of those who finished with 24 straight W. A. Wiedbusch, of Scranton, Pa., and John E. Fanning, of San Francisco, made an excellent showing. Both of these men

missed the first bird they shot at in the opening round yesterday morning, but after that they shot steadily and brought down the remainder of their birds in faultless style.

Captain Jack Brewer, the world's champion, and Fred Gilbert, the champion of America, did not get into the money. Each killed 23. These two rivals were matched today and the contest will take place in Chicago within the next few weeks.

DR. POWELL IS A CRACK SHOT.

Can Hit Pinheads and a Spaniard Would Be an Easy Mark.

La Crosse, Wis., March 24.—Dr. George E. Powell, the man who is anxious to take Senator Mason's place in a duel with the Spanish Baron El Cardo, can shoot so well with a pistol that he can hit the head of a pin as far off as he can see it. He is considered one of the best shots in the country. Many times he has had a man hold a penny between his fingers and shot at it without missing. In one instance he had a person hold a hair with both hands, which he shot at, cutting it as with a knife. He has made it a practice to shoot at small objects, such as pinheads and coins.

It is the general opinion that with his record as a champion shot he could do very scientific shooting at a Spaniard with a 44-calibre gun. The doctor is a brother of White Beaver, former mayor of this city. He was born in Kentucky. His mother was the daughter of a full-blooded Indian medicine chief of the Seneca tribe. His father was of Scotch descent. After his father's death George moved with his mother to New York, where they lived on a farm. Later he moved with his mother and two brothers to the western frontier, where they had many thrilling experiences with the Indians. While there George attracted the attention of such kindred spirits as Buffalo Bill, California Joe, Wild Bill, Peon Paddock and Texas Jack. During his stay on the frontier he became very popular among the Indians, and soon obtained a reputation as a marksman. Since living at La Crosse he has practiced continually with his revolver. The announcement that Dr. Powell sent the baron a challenge caused much talk about town today. He is now out of the city, having gone to Milwaukee to take a degree in masonry.

ATLANTIC LEAGUE.

The Season Will Open April 25 and Close September 11.

Philadelphia, March 24.—The Atlantic Coast League met in this city today, and after two sessions lasting eight hours, adopted a schedule for this season and entered a protest against rowdy ball playing. According to the schedule, Newark and Paterson are the only towns where Sunday games will be played, but all the other clubs, except Richmond, will visit those towns to play Sunday games. Richmond will play no Sunday games. The season will open on April 25 and close Sept. 11.

The Brush resolution of the National League on rowdism was considered too arbitrary by the minor league, and after discussion it was decided to empower the umpire to suspend for two days a player who violates any of the rules. During suspension the player loses his salary for that time.

The Soby cup games were abolished and the cup was ordered to be returned to its owner. It was decided to fine every club forfeiting a game \$100, and the guarantee fund was raised from \$500 to \$1,000 for each club.

The umpires appointed were J. J. Kelly, W. G. Brannan, John Brennan and E. C. Tate.

PAGUE DIVORCE CASE.

The Wife of a Lieutenant in the Army Is Granted a Divorce.

Lancaster, Pa., March 24.—Sarah Gossler Pague today was granted a divorce from her husband, Lieutenant Samuel S. Pague, late of the United States army. The divorce proceedings were the result of Pague's attempt to kill Colonel Crofton at Fort Sheridan, Chicago, in 1895.

Pague on entering his home found his superior officer talking to Mrs. Pague. He accused Colonel Crofton of undue intimacy and fired two shots at him, neither of which hit him. Pague was court-martialed and dismissed from the army. At the time of the shooting Mrs. Pague said Colonel Crofton had called to inquire as to her husband's condition, who was then under arrest for drunkenness.

INQUEST IN BRAUN CASE.

Jack Smith Held Without Bail—Austin and Skelly Furnish Bondsman.

Trenton, N. J., March 24.—The coroner's inquest into the death of Henry Braun, who died on Tuesday morning as a result of injuries sustained in a contest at the Palace Athletic club on Monday night with Jack Smith, resulted in a verdict that Braun's death was due either to a blow or a fall. Smith was held without bail by Police Justice Jackson and Referee Sam Austin and Manager Jack Skelly, of the Palace Athletic club, as well as the seconds of both Braun and Smith, have been held under \$500 bail as witnesses.

LOVER THREW LIQUID FIRE.

Vitrol in His Sweetheart's Face for Rejecting Him.

Chicago, Ill., March 24.—Her rejected suitor, Charles F. Lang, met Miss Mabel Hobart, aged 19, when she was returning from a drug store with medicine for her invalid mother, at 1 o'clock this morning, and again asked her to marry him. When she said "No," he threw a pint of vitriol in her face, blinding her for life and inflicting possibly fatal injuries. Her face was horribly burned. Lang, who fled, was arrested.

NOMINATED BY THE PRESIDENT.

Washington, March 24.—The President today sent these nominations to the senate: Mahlon M. Garland, to be surveyor of customs port of Pittsburg, Pa.; Judson W. Lyons, of Georgia, to be register of the treasury; Leslie Combs, to be pension agent at Louisville, Ky.; Arthur Elwood Gregory, of New York, to be a civil engineer in the navy. War—First Lieutenants to be captains: Herbert C. Van Vleet, Tennessee infantry; Eaton A. Edwards, Twenty-fifth infantry.

Hood's Pills. Stimulate the stomach, rouse the liver, cure biliousness, headache, dizziness, sour stomach, constipation, etc. Price 25 cents. Sold by all druggists. The only Pills so labeled with Hood's Esplanade.

BATTLESHIPS ARE LAUNCHED

The Kentucky and Kearsarge Are Now Afloat.

VERY INTERESTING CEREMONIES

Mrs. Winslow, Wife of a Son of the Commander of the Famous Frigate, Christens the Kearsarge, and Miss Bradley, the Kentucky—Bagnets of Bourbon Fired at the Latter Vessel.

Newport News, Va., March 24.—The battleships Kentucky and Kearsarge were launched in the yards of the Newport News dry dock and ship building company today in the presence of an immense crowd. There was not a hitch in the programme and cheers from thirty thousand throats greeted the latest additions to the United States navy as they slid from the ways, the prow of one sprinkled with foaming champagne, the other christened with pure water from the home of Abraham Lincoln. Early in the day the throngs began to gather, while an army of workmen swarmed around the grim hulls preparing them for their maiden dip.

Among the distinguished persons who occupied positions on the platform were: Governor W. O. Bradley, Governor B. Hoge Tyler and their respective staffs; General Nelson A. Miles, commander-in-chief of the United States army; Admiral Matthews, U. S. N., and Commodore McNeil and Wallace.

Mrs. Winslow, wife of Lieutenant-Commander Winslow, son of the commander of the famous old frigate that first bore the name, christened the Kearsarge, and Miss Christine Bradley the Kentucky. As the latter vessel started down the ways, several bottles of old Bourbon whiskey were hurled against her sides by Kentuckians who were opposed to the water christening. Water from the spring on the Jefferson Davis farm in Kentucky was also smashed on the vessel's sides. Both launchings were successful in every particular.

The invited guests and distinguished visitors then boarded the steamer Newport News and proceeded to Old Point, where the ship yard officials tendered a magnificent banquet. Covers were laid for six hundred persons. It was entirely informal. Among the toasts responded to were "Kentucky," by Governor Bradley, and "Virginia," by Governor Tyler.

WEDDED AFTER MANY YEARS.

Youthful Sweethearts United at Rippe Old Ages.

Cape May Court House, N. J., March 24.—One of the most notable weddings that has occurred in South Jersey in many years was solemnized here this afternoon, the groom being Return Babcock Swain, aged 72 years, and the bride Mrs. Roxana Hand, just past 70. The ceremony was performed by Rev. Frank H. Sherman, of the Baptist church, in the presence of a score of the relatives of the bride and groom, and was followed by a wedding breakfast.

Mr. Swain was for many years one of the best known business men in Philadelphia, being the largest manufacturer of bath tubs in the Middle States. Almost seven years ago he retired from business a very wealthy man, and settled on a farm near here, where he recently renewed the acquaintance of Mrs. Hand, the sweetheart of his youth on whom he called from 1839 to 1841. His wife died eleven years ago and Mrs. Hand's husband nine years ago. The bride and groom left on the evening train for a ten-day tour.

HOT FIGHTING IN THE SOUDAN.

Derivishes' Attacks Met by Anglo-Egyptian Cavalry.

Athara (on the Nile), March 24.—An Anglo-Egyptian cavalry patrol was in conflict with a large party of Derivish horsemen on Monday, eleven miles up the river. A smart engagement took place, in which hand-to-hand encounters were frequent, and the Derivishes were driven back. The horse artillery went to the support of the Anglo-Egyptian cavalry and shelled the Derivishes at 1,500 yards, doing considerable execution.

The Anglo-Egyptian loss was seven men killed and eight wounded. The patrol returned to Rashidi before midnight, bringing the wounded. A force of 400 Derivish cavalry appeared a few miles from here on Tuesday, and was met by a squadron of cavalry from Washington this morning, having been summoned thither by telegrams from General Montgomery Moore, commander of the forces in British North America, who is visiting Sir Julian Pauncefote, the British ambassador at Washington.

PERIL OF 85 GOLD SEEKERS.

On a Helpless Schooner and Drifting Around the Gulf.

Victoria, B. C., March 24.—The steamer Princess Louise has arrived from Wrangell. She brings news that there has been a freeze-up on the Stickeen, and men started to move up-river. Among the passengers were Purser Simpson, of the steam schooner Townsend, and "The Townsend" was going north, and had reached Albert, when it was found that her boilers were giving out, and she turned back. Simpson left the Townsend off Comox to telegraph for a tug, as the boilers were getting worse. The schooner was drifting around the Gulf. She has eighty-five passengers on board.

TREASURY FILLED WITH GOLD.

The Reserve Made Another Gain Yesterday: \$228,304. Washington, D. C., March 24.—The treasury is still reveling in a supply of gold which goes far beyond any immediate needs. The reserve gained \$228,304 today, and stood at \$79,044,355. The principal source of gain is the deposit of bullion at the assay offices, for which currency is accepted in exchange. The reports today showed that there were still outstanding \$5,671,225 in assay office checks. These checks

GREAT MEN'S WORDS

How Discoveries Are Helping Us.

PROF. ROENTGEN'S X RAYS

What They Can Do and the Strong Statements Some Great Scientists Voluntarily Make.

Few people ever stop to think what wonders modern science and discovery are doing for us. Just consider for a moment! The telegraph, the telephone, the electric light, or red or brick-dust urine, chilliness and feverishness are pretty certain to indicate that you are on the road to Bright's disease. And you may not realize it.

Why? Because kidney diseases are the most mysterious of all known troubles, and they are the hardest of all things to detect.

If you were asked to put your hand directly over the kidneys, would you know just where to place it?

Few people would. The fact is that the kidneys have few symptoms of their own, but possess nearly all the symptoms known to suffering humanity. "All roads lead to Rome," and it is equally true that the cause of nearly every physical trouble can be traced to one source, namely, the kidneys. As a great physician once said:

covers and improvements of modern times for preserving your health and prolonging both your lives and your happiness. Remember that invention and discovery are at work constantly, and that you are entitled to the best of its place within your reach. You cannot have the Roentgen X Rays thrown upon you all the while, but by watching your symptoms carefully, and guarding against the first approach of disease by a faithful use of the best of all known remedies, you may certainly live in health to a good old age.

entire the holder to gold coin in return for bullion deposited and assayed, and it is highly probable that currency will be accepted for a large part of them, and that the gold reserve will gain two or three millions more within a short time by this process.

Kaiser Fighting for a Navy. Berlin, March 24.—In the Reichstag today during the discussion of the navy bill only the Socialists, Guelphs, Poles and the German People's party and a minority of the Centrist party opposed the measure.

Count Radzwill justified the attitude of the Poles on the ground that it was a protest against that of the Prussian government, which had declared war against the Poles.

Count Posadowsky, minister of the interior, defended the policy of the government, which, he said, was not directed toward Germanizing the Poles. It was the duty of the government, the minister said, to maintain and strengthen the economic and political position of the Germans and the German language. The Poles, he continued, would always receive the same treatment as the Germans.

'Captain Ken's Visit. Halifax, N. S., March 24.—Captain Kent, of the Royal Engineers, who for years has been at the head of submarine mining operations in Halifax harbor, left for Washington this morning, having been summoned thither by telegrams from General Montgomery Moore, commander of the forces in British North America, who is visiting Sir Julian Pauncefote, the British ambassador at Washington.

wonders, not only in locating the cause of all these troubles, but also in discovering the way to cure them. "Strike at the root of the tree" is a good motto, and it is equally true with disease. Go right to the cause! Don't waste time in experimenting, for you may be growing worse all the while. Get the best—something that will put you in perfect health quickly and certainly. There is but one thing that will do this.

Here is what some great scientists of the world have to say: Dr. William Edward Robson, M. R. C. S. I. L. C. I., of England, writing upon this subject, declares: "I emphatically state that I have been able to give more relief and effect more cures by the use of Warner's Safe Cure than by all the medicines in the British Pharmacopoeia."

And here is what the great Doctor Beyer, of Germany, says: "I use Warner's Safe Cure for patients who suffer from kidney and liver diseases, and it restores them to complete health. I recommend it most cordially in all circles of my acquaintance."

There is in all these great discoveries of science one grand lesson for everyone. That lesson is this: Do not hesitate to avail yourself of the best dis-

covered and improvements of modern times for preserving your health and prolonging both your lives and your happiness. Remember that invention and discovery are at work constantly, and that you are entitled to the best of its place within your reach. You cannot have the Roentgen X Rays thrown upon you all the while, but by watching your symptoms carefully, and guarding against the first approach of disease by a faithful use of the best of all known remedies, you may certainly live in health to a good old age.
