JERMYN AND MAYFIELD.

The house of Mrs. Charles Quinn, of Mayfield, was destroyed by fire yesterday about 11.30 o'clock. It is supposed that the fire originated in the kitchen while Mrs. Quinn was up stairs doing some work. A man by the name of Luke Laven was passing by at the time and saw flames issuing through the rooms. On entering the building he learned that Mrs. Quinn was up stairs and with great difficulty he was successful in bringing her to the open air. The fire alarm brought the William Walker Hose company to the scene, but despite their efforts the house was totally demolished. Some of the goods were saved. The amount of insurance is

about \$1,260. The Rev. Francis Gendail, pastor of the Methodist Episcopal church, suf-fered a loss of about \$25.00 and a coat and pair of pants during Monday night and Tuesday morning. Mr. Gendall on Monday was transacting some business in Scranton, and returned home with the above amount in his book. He entertained some guests at his home on Monday even-ing and retired, leaving the \$25 in other gifts. A bountiful dinner was packet. The following morning the clothes could not be found, and an ed. All the members answered to roll call but Joseph Dempsey, After adopting the minutes of the previous meeting a committee from the Holy Name society of the Sacred Heart parish asked council to pass an ordinance making it a misdemeanor to cut or mark indecent figures or representations on the sidewalks, fences, depots r public buildings. It was referred to the law and ordinance committee with instructions to draft an ordinance as per request of the society. A committee of Hungarians from the hill here made their appearance and wanted the council to put in a sewer for them to carry off their slops and waste water. Their cause was urged by the Hungarian councilman and William Ednunds. After it had been explained to him that the only way they could get a sewer was by presenting a petition to council, signed by people owning a majority of the feet frontage on the street and bearing all the expense except the cross streets, which expense would be sorne by the borough, he still insisted that the rest of the people ought to be taxed to oblige this element.

NEW PASSENGER COACHES.

The Schenectady Locomotive works are making composite passenger coaches and steam locomotives for the New England and Eric railroads, to be used on their short lines, which run through thinks populated portions of the country. They are regularly equipped passenger coaches, with a steam engine in one end to sup-

ply the motive power. The management of the two roads are trying this plan with a view to reducing the cost per mile of operation. It takes but two men run the composite-the engineer and the conductor-while it takes at least five men to handle a regular train.
