Length of the Ultimatum

The disposition to criticise the presient because he gave Spain until Sat

from a paper contributed by ex-Secretary Richard Olney to the Atlantic Monthly, Mr. Olney, the pugnacious, says: "Family quarrels have been heretofore and doubtless will be again. and the two peoples, at the safe distance which the broad Atlantic inter-

poses, take with each other libertics of speech which only the fondest and dearest relatives can indulge in, Nevertheless, that they would be found standing together against any allen for by whom either was menaced with denot permissible to doubt. Nothing less could be expected of the close community between them in origin, speech

thought, literature, institutions, ideals -in the kind and degree of the civilization enjoyed by both. In that same community, and in that co-operation in good works which should result from It, it is not too much to say, lies the best hope for the future not only of the two kindred peoples, but of the human race itself."

We believe that the American people, whatever their former prejudices may have been, are prepared to recognize the obligation under which England and English kinsmen are now placing them as an international debt of honor--a debt to be repaid with interest, in kind. It should mark the beginning of a new era in civilization.

It would not take a foreign war to elect William Connell governor of Pennsylvania.

The Franklin of Cuba.

An effective answer to the slanders put in circulation against him by the peace at-any-price crowd during their recent, fight against Cuban independence has been made by the Cuban delegate, Tomas Estrada Palma. After publicly returning thanks to the American people and press for their invaluable co-operation in Cuba's behalf during the hours of her crisis at Washington, he says that just as soon as the new government in Cuba shall become firmly established he intends to retire from the field of active politics in Cuban matters and resume his residence in Central Valley, N. Y., there to pass the remainder of his days in peace and quiet with his family General Palma has shown by his conduct during the past three years that he is a statesman and diplomatist of the first rank. Called to the diplomatic endership of the Cuban cause by the death of Marti, after having fought for that cause during the Tcn Years' war and sacrificed to it his mother, his princely estates and seven years in a Spanish prison, he took hold of the work with the skill of a Franklin, the sagacity of an Adams and the indom-Itable will of a Washington. During

the few years prior he was only a quiet school teacher at Central Valley, known to few outside the circle of his fellowcountrymen. From that peaceful vocation he went to New York, organized the junta, perfected the vast systen; of revenue collection among the Cuban exiles in this country, France and Italy which has supplied most of the financial support of the insurrection, superintended the complicated net-

work of filibustering activities and, without recognition by any government on earth and in the face of a

projudice sedulously fostered by the Spanish agents in this country, set out polished diplomats o leked out months ago. Madrid in their campaign of deception It is possible that France will live and intricue at Washington.

The main point to be considered is mering at the gates of Richmond. A generation has passed away since that day and a new generation has come on to raise sufficient revenue at the very eginning of the hostilities to equip and the stage. Youths who recollect the war for the Union only as a distant echo they could searcely define are now apoperate an army capable of crushing the enemy in short order. With Spain struction or irreparable calamity it is bankrupt and at the end of her rope this ought not to be as difficult as it Sectors.

> It is very unsafe to take without disount the estimates of a prominent man's character supplied by that man's

political opponents. Perhaps no man in gress and acquainting Spain with their character and contents. Decently and in Pennsylvania has been more flagrantly abused and slandered than Senator C. L. Magee; yet on the occasion of his

order, without haste and without delay, the president will take the next step in the great drama which closes in blood-shed and war four centuries of Spanish rule in the New World. Rocking with the tiftieth birthday a few days ago the best citizens of Pittsburg turned out to do him honor and spoke so well of him rule in the New World. Rocking with the excitement of opening war, the country may well remember and regard the mo-mentous and difficult task before the president in executing the will of con-gress and the country. The Spanish army has to be expelled from an Island which needs a large land force to hold and to occupy. Our good name must not be dis-graced by massacre during a military inthat political slander must hereafter fall harmless. In fact it is almost safe to honor a public man in exact proportion as he is assailed, on the principle that the more virulent the detraction the loftler the target. graced by massacre during a military in-ter-regnum. The starving must be re-lieved and fed. Order must be restored

The war department displays good judgment in deciding to offer every possible facility to war correspondents. The vocation of the war correspondent is as legitimate and useful as is that of the soldler, and in a popular gov-

ernment it is due from rulers to people that the people should not be handicapped in their quest of information.

Munitions and supplies for Gomes should be the first step. One experienced and acclimated Cuban properly armed would be worth for immediate results half a dozen tender American volunteers.

Inviting a licking from Uncle Sam in preference to taking one from the Carlist hotheads at home may prove to the Spanish government to be a case of jumping from the frying pan into the open fire.

depend largely upon the skill with which Spain can evade Uncle Sam's clutches. It is hard to whip an enemy you cannot get hold of.

Senor Polo took hold too late. Perhaps if Spain had had a gentleman as her minister at Washington earlier in have been averted.

> Perhaps Mr. Wanamaker shouldn't say much about a muzzled press, considering his own control over the Philadelphia dailles that carry his advertisements.

Five thousand American Cubans have already proffered their services to the government. They evidently have no desire to be deadhead patriots.

The queen regent is correct in calling Spain's future "dark and gloomy." But it is a future strictly in line with Spain's past. It is self-made.

urday noon to make reply is petulant and unworthy. The president, not the mob, is now responsible for the handling of this nutter and he is entitled to have his way. The citizer who snaps at chances to cavil at him is lacking in that sense of discipline which is essontial in time of war and is moreover deficient in common sense. The president knows the status of all the factors in the problem, and his curbstone assallant doesn't for certain know a thing about one of them.

As a matter of fact the president wanted to give Spain only 48 hours in which to make reply, but he was pursuaded to extend the time by the representations of Secretary Alger, the mosaggressive member of the cabines, that not before Saturday noon would the army be in condition to make that ef fective movement upon the enemy? works which must follow immediately the receipt of Spain's expected refusal to evacuate Cuba.
