

JAY'S DOINGS IN NORTH SCRANTON

A Movement is Afoot to Form an Auxiliary Company H.

OWNERS OF THE ARMORY ARE TO BUILD A THREE-STORY BRICK FRONT FOR STORES AND OFFICES. FURNAL OF BENJAMIN MORRIS, ENTERTAINMENT OF MERIT GIVEN IN THE PROVIDENCE M. E. CHURCH—MORTIMER CHRISTMAS HAS LEFT TO ENLIST IN THE NAVY.

It is predicted that an auxiliary Company H will be organized as soon as arrangements can be completed. Already more than the necessary number have signified their willingness to enlist.

Many former members of the company were sadly disappointed when it was made known that it was impossible for them to accompany the regiment to Mt. Gretna.

INTERESTED PEOPLE.

Advertising a patent medicine in the peculiar way in which the proprietor of Kemp's Balsam for Coughs and Colds does it, is indeed wonderful. He authorizes all druggists to give to those who call for it, a sample bottle free, that they may try it before purchasing. The bottles are 25 and 50c. We certainly would advise a trial. It may save you from consumption.

ious was close upon the sublime, to say the least. Rings were formed like skeletons, tiny coffins of gold were worn as ornaments and they contained enameled figures of death, but the most striking products of the hour were the watches, which dangled from fair ladies' belts and which represented grinning skulls, the tops of which lifted to disclose the dial plate. Of course the eyes were brilliant jewels and small fortunes were spent in the elaborate ornamentation of these funeral trinkets. But the watches, the trinkets and the people who wore them have all passed away, and since 1820, or thereabouts, the flat oval or round timepiece has been the general favorite.

Time does not go so fantastically with us as it did with those untutored geniuses of earlier times, and perhaps our plain substantial watches tell us much of our character as did those bizarre inventions of earlier days about the men and women who wore them.

Capacity of Niagara.

From the Times-Herald. If the falls were situated in the center of a city of manufacturing plants 20 miles square, and there was a factory upon each acre of land within its limits, and each consumed 1,000 horse power, there would only be used 1,000,000 horse power, or a little more than one-tenth of the probable energy of this great water power. If the size of our city were increased from 50 to 100 miles square—all the other conditions remaining the same—its factories would consume 4,000,000 horse power, which is no doubt a moderate estimate of the energy exerted by the Falls of Niagara. When we take into consideration that one acre of ground is a small allotment for the average manufacturing plant and that 1,000 horse power is perhaps quite a liberal allowance for each establishment, we can get some conception of the possibilities of Niagara Falls as a great power plant. Of course all the energy exerted by the fall of water cannot be utilized as work, as there is always a loss by transformation. But if the falls represent an energy of 8,000,000 to 10,000,000 horse power, we have a liberal margin left for losses of all kinds.

His Possessions.

Cincinnati Enquirer. Judge Ermonston told a good story about a man he was questioning as to his being good to go on a 999 bond.

"What property have you to the amount of 999?" asked the judge.

"I have \$300 in a building association," replied the witness.

"Well, and what more?"

"I have stock in trade to the amount of \$300."

"I have household furniture worth \$300."

"Well, we still want \$100."

"I have your note, judge, for that amount, which you gave me seven years ago at College corner."
