PROPER SEASON FOR PLANTING

Hints for Gardeners from an Astrological Standpoint.

OPHIUCUS, THE DUNMORE ASTROLOGER, TREATS OF THE INFLUENCE OF THE SIGNS OF ZODIAC UPON VEGETATION—RULES FOR PLANTING SEEDS IN THE MONTH OF JUNE—THE BEAUTIES OF THE EVENING STAR.

Written for The Tribune.

From the earliest periods on record, the tilling of the ground and sowing of seed was done in an astrological favorable time; but at this late period there are a few difficulties to contend with. When the seeds or plants are planted at a favorable time, the ground should be just as well worked and fertilized as if they were planted in a bad time, with just as much care taken of them; then the frugiferous plants will fructify abundantly, and the flowers bloom in their splendour. As the rules for obtaining the correct time are always the same, a few simple rules may be of great benefit to florists and husbandmen. In astrology there should be nothing mystical, for philosophy should be free to those who are willing to attain it, and should be fully explained. There should be no underhand and mystifying prophecies, and everything stated should have a solid foundation.

Let all flower seeds be sown when a movable sign (Aries, Cancer, Libra or Capricorn) ascends, and its lord in a movable sign. This rule can safely be used all the year. With care, and in warm weather, common signs (Gemini, Virgo, Sagittarius, or Pisces) can ascend, and their lords be in either movable or common signs. Let the moon be in any of the above signs, especially Cancer; but if in Aries, let it be in favorable aspect to some planet in a watery sign (Cancer, Scorpio or Pisces) or to Saturn. Let the ascendant be free from affliction, and the moon increasing in light(from the new to the full). Here, a little judgment is necessary, for all the aforesaid cannot happen at once; but a little consideration will well repay those who seek it.

RULES FOR PLANTING.

For leguminous plants the above rules are applicable, but to obtain their fullest nature, let them be planted at full moon or a day after, if possible.

For cabbage and lettuce, at full moon or a day or two before offer good advantage.

For potatoes, radishes, onions, or anything that grows underground (except beet), let movable or common signs ascend (except Libra or Aries), and let the moon be in one of them, and decreasing in light (from the full to the new).

For cucumbers, melons, pumpkins, tomatoes, etc., or beet; let the moon be in Cancer or Pisces, and let movable signs ascend, and the moon increasing in light, if possible. In all the above rules reasoning must be used.

Work your garden during the decrease of the moon, for weeds and insects have less vitality at that period, and if disturbed they immediately perish.

For budding trees, the moon should be in either Taurus, Leo, Virgo, Aquarius, or Pisces—Taurus is the best—and in good aspect to Venus. Let not Saturn be retrograde, and let it be in either the 1, 2, 5, or all houses. If this cannot be done, let the moon be in aspect to Jupiter. If neither, then let the moon be in one of the houses, and unafflicted. Let not Mars be strong and aspect the moon. Those who possess a nautical almanac or an astronomical ephemeris, can calculate these dates with ease.

FOR THE MONTH OF JUNE.

In June all planting can be done with safety, and the following dates will prove beneficial:

For flower seeds: 1, 4, 5, 6, 7, from 6 to 8 a. m., and 2 to 3, and 6.30 to 7 p. m. 10, 11, from 5 to 7.15 a. m., and 1 to 3.15, and 6 to 7 p. m. 19, 20, 21, from 4.30 to 6.50 a. m., and from noon to 2.30 p. m., and 6 to 7 p. m., 27 and 28, 4.20 to 6.30 a. m., and from 11.30 a. m. to 2 p. m. For leguminous plants: 4, 5, 6, 7, (same hours as for flower seeds) are the best days, though the 19, 20, 21, 27, 28, may be used with safety. For potatoes, radishes, onions, etc., 4, 5, 6, 7, 19, 20, 21, (same hours as for flower seeds) offer good advantage, the first four especially. For cucumbers, melons, tomatoes, etc., or beet: the 19, 20, 21, 27, 28, (same hours as for flower seeds). In June, the planet Saturn is retrograde, and all trees budded, will not be of long duration.

Work your garden and destroy all weeds and insects from the 4th to the 19th. The aforesaid rules are extracted (and improved) from the ancient and modern writers, and should be preserved for reference. It would be a good thing if all authors and editors would use proper methods, and select proper dates, as it would be a good thing for the science, and prove a blessing to mankind.

The month of June will be a fine time to view the most brilliant planet of the solar system—Venus. It is often called the evening star. Look for it almost directly in the west, and you cannot mistake it for any other on account of its size and brilliancy; but it will not obtain its greatest brilliancy until October 27, of this year. As Venus cannot get more than 48 degrees from the sun, it can only be seen, therefore, just after sunset, or before sunrise. Jupiter is still visible on the ecliptic and is nearly direct above you at 9 p. m. To find the line of the ecliptic, run your finger along the course which the sun takes, commencing in the east, and in that track, all the planets, which are visible to our view, may be seen. The planets have a steady light, while the stars twinkle; and consequently cannot be mistaken for each other.

COLORADO TOURS

Is the title of a new book on Colorado, America's great health and pleasure resort. The book is beautifully illustrated and contains a valuable map of the State. A copy can be had without charge upon application to P. S. Eustis, Gen'l Pass'r Agt., C. B. & Q. R. R., Chicago, Ill.

CLARK'S SUMMIT.

The Eastern Stars held a social on Tuesday evening last and had a very enjoyable time.

The American Protective association held a clam bake Monday night. A large crowd enjoyed the clams, ice cream, cake, etc. Speaking, singing and music by the band were features of the evening's pleasure.

George Rice is convelescent from a long illness, and has just returned from a week's visit with his sisters in Union and Binghamton, N. Y.

The party who took the dress from Maggie Best's house a short time ago is known and will do well to return it and save trouble.

Miss Rose Lynch is pending as couple of weeks with Nicholson friends.

Mr. and Mrs. J. B. Riker and son, Earl, of East Lemon, visited friends here this week.

Mrs. Bratton, who has ben visiting her daughter, Mrs. Frank Myers, suffered the third stroke on Wednesday night and died on Thursday morning.

THE MARKETS.

Wall Street Review

New York, May 27.—The stock market enjoyed a period of strength this morning, but the early gains were practically all wiped out before the day ended, except in the few special stocks which had sustained the list all day. Even some of these closed at prices as low or lower than last night's close. An advance in People's Gas was due to very confident buying on the part of inside interests. Its net gain was nearly 2½ points. Rock Island, in which the predominant financial interest is the same as in the People's Gas, was the most conspicuous figure in the railroad list and was advanced almost 2 points in the early trading but saved only a little over a point for its net gain. The Grangers as a group shared in the early strength and there was good buying also in the Vanderbilts. The later weakness in the market was undoubtedly due to a growing doubt as to the whereabouts of the Spanish fleet. The marked falling off in the foreign demand for grain on account of the declining apprehension of a future short supply is also having its effect on stocks. Activity today was very largely confined to the few stocks indicated above. Total sales of stocks were 336,500 shares.
