and Poor Appetite. "Our youngest child was in a bad condition. One physician said the trouble was malaria and another thought it came from the stomach and liver. Meantime the child kept growing weaker. He had night sweats, poor appetite and various other troubles. We worried along for two years, and then we determined to try Hood's Sarsaparilla, and from the first day we noticed a change in our little boy. We kept on until he had taken about three bottles. Today he is a strong, hearty child. We have always

had to keep him indoors in winter, but last winter he was out with other children and we found no trace of the old trouble returning." ALFEED HARSHBERGER, 70 Washington Avenue, Altoona, Pa.
