REMODELING OF MILL.

Project to Have Structural Iron Mannfactured in This City.

There is liable to be something of a tir in connection with the board of trade's intention to ask the Lackawanna Iron and Steel company to equip one of its plants or build a new one so that it may compete with other iron and steel concerns in the manufacture of structural iron and government army and navy supplies.

A meeting of the manufacturers' committee of the board was held yesterday afternoon and a report outlined presentation at Monday hight's regular monthly meeting. The report will urge the appointment of a special committee of five to confer with the officials of the company and urge the quipment mentioned in the foregoing.

Members of the manufacturers' comnittee declined to reveal the particulars of the meeting. It is believed, however, that from among the wealthiest or most influential men in the city five were selected whose appointment will be recommended to President Keller next Monday night. The five are said to be Hon. William Connell, John Jermyn. Colonel H. M. Boles, E. B. Sturges and C. H. Zehnder, probably the most substantial committee ever named for a similar purpose in Scranton. The movement is suggested by the

laxity of the iron and steel trade here at a time when the mills and furnaces at Pittsburg, Harrisburg, Bethlehem and other cities are cunning night and day, six days in the week, and, in many instances, on Sundays as well.
