**Important News From Camp Chickamauga**

**THE EFFECT OF WATER AND CLIMATE ON THE SOLDIERS.**

**DANGERS FROM CLIMATIC CHANGES CAN BE OVERCOME.**

**THE OFFICERS RELATE THEIR INVALUABLE EXPERIENCE.**

Many mothers, fathers, wives and sweethearts are anxiously looking for news from the great military camp at Chickamauga Park, where nearly 60,000 of our stalwart boys are preparing for the great conflict. Climatic changes, the hazard of great change in drinking water and the general exposure in camp are fraught with considerable danger. That these dangers can be overcome is a matter of general gratification. We have found means to better insure the health of our troops. It is a happy incident that the staff of an Ohio regiment should make this valuable observation, since the discoverer is a resident of the capital of that state.

Camp Thomas, Chickamauga Park, Ga., May 24, '98.  
Dear Sir—Col. A. B. Coit, commanding the 1st Reg. Inf., O. V., begs to convey to you his thanks for your consideration in furnishing the staff of his command with a case of your most excellent Per-ru-na. It has been found invaluable as a tonic in this climate and the various sicknesses usually attending a radical change in drinking water.

Sincerely, A. B. Coit, Per J. C. Schindler, Chaplain Reg. To Dr. S. B. Hartman, Columbus, O.

Per-ru-na is a specific for climatic diseases. Climatic affections find their way into the system through the mucous membranes. A healthy mucous membrane protects the system from climatic diseases. No disease germ or bacteria can enter the system through a healthy mucous membrane. Per-ru-na acts directly upon the mucous membrane of the whole body and thus protects the system from these diseases.

A valuable work on climatic diseases, entitled "Summer Catarrh," Dr. Hartman's latest book, will be sent free on a request by The Per-ru-na Drug Manufacturing Company, Columbus, O.
