Press dispatch boat Wands, via Port Antonio, Jamaica, June 28 (forencen), via Kingston, Jamiaca (12.35 p. m.)-The American front has been advanced beyond the first crossing of the Rio Guamo, about a mile, and a tug lies three and a half miles from the Spanish intrenchments. General Lawton's brigade rests on the road to Santiago de Cuba. The Third brigade, under General Chaffee, the Seventeenth, Twelfth and Seventh regiments hold the trench, with his command lying across the road and river. The First brigade, the Eighth, Twenty-second and Second Massachussetts under General Evan Clarke, des on the left flank, slightly in the rear, and the second brigade, the First, Fourth and Twentyfifth occupies the opposite position on the right flank. General Wheeler with the cavalry, is in the rear, between Sevilla hills and Rio Guama. A strong line of outposts is maintained ahead.

SKIRMISH WORK.

General Chaffee's brigade, with threthousand Cubans under General Auirra and several hundred under Colonel Gonzales, was skirmishing towards the city this morning.

The Cubans had slight skirmished with the Spaniards stattoned on the hills on the American right flank, and our auxiliary occupies the blockhouses in that vicinity which were evacuated before daylight by the Spaniards. The latter retreated towards Santiago de Cuba. No fatalities are reported.

General Lawton, General Chaffee and General Wheeler have thoroughly reconnoitered the Spanish position and with the aid furnished by the Cubans have very good maps of the roads and defences.

Much information has also been obtained from Spanish pacificos, who have slipped that city and give themselves up in the hope of getting food. They report great starvation and distress in Santiago, They say the Spanish troops are on short rations and that all the supplies are being held for their use. The sick in the hospitals, the pacificos say, are suffering for lack of food, and they say 77 Spaniards were killed and 89 were wounded as the result of the engagement on Friday last with Colonel Wood's and Young's com-

THE SPANISH STRENGTH.

The most startling information obtained from the pacificos is that since the advance began, almost 20,000 Spanish soldiers have arrived at Santiago. This statement is made on the authority of General Lawton, and he is also of the opinion that General Pando has been unable to effect a functure with General Linares at Santiago de Cuba.

There are two forts of considerable importance within the Spanish lines, Punta Blanco, at the southern end of the bay, and Santa Prsula, at the southeast corner. On the road to Caney, on the north, is another fort There are about 450 men in each of these fortifications and stretching around the marine barbed wire fences, fifty yards apart, while just inside these are lines of rifle pits. Outside this, to the eastward, about two miles beyond the American outposts, is a line of entrenchments, extending from the northern extremity of the city to Morro castle. A little west of south, at a distance of about seven miles from General Lawton's headquarters, lies Morro castle. The road to within a few hundred yards of the batteries at rear of Morro was reconnollered of age, ****************

San Francisco, June 28.-General Wesley Merritt, who will sail from this port tomorrow and assume his duties as governor general of the Philip pine Islands, has prepared a proclamation which will be issued immediately after his arrival at Manila. It will (unounce to the people of the islands that General Merritt, as the representative of the United States, has egtab ished a provisional government, And his authority must be respected. At the same time he will assure the inhabitants that he comes not to oppress but to free them. They are to be granted the fullest liberty computible with the preservance of law and order, and all personal and property

rights are to be respected. In an interview tonight General Merritt expressed the most complete confidence in the success of the United States in the Philippines. He has instructions from Washington to conferwith Admiral Dewey on his arrival at Manila and the two commanders are to act in concert in anything that may be necessary to insure the occupation of the islands by this government,

VERY WELL PLEASED WITH ARMY'S WORK

War Department Is Delighted With Shafter's Steady Progress.

IT IS RUSHING REINFORCEMENTS TO HIM SO AS TO PROVIDE FOR ANY UNFORESERN DIFFICULTIES. LINE OF THE BLOCKADE MATE-RIALLY TIGHTENED - CAMARA YET AT PORT SAID.

Washington, June 28,-It was very ate in the day when the first dispatch within two days came to the war department from General Shafter, but the news was regarded as so good that there was no disposition to complain. disclosed a very satisfactory rate of progress on the part of General Shaftr towards the town of Santiago itself and apparently he has gained all this ground and has come within three niles of Santiago, without suffering any losses since the bloody skirmish of Friday last. Altogether the performince is regarded as very gratifying by the department officials here.

As near as can be gathered from the brief dispatch the American army is now at the fork in the road, one branch of which leads to Santiago and the other to Morro Castle at the entrance to the harbor. General Shafter is thus free to move in either direction according to the demands of the campaign. With the 1,300 men who reinforced him yesterday on the Yale and the additional brigade that will reach him by tomorrow it may be postible to make even more rapid progress in the advance upon Santiago as these men can relieve the main body of troops from the necessity of keeping open the line of communication be tween Shafter and his base at Baiquiri.

MORE REINFORCEMENTS. Meanwhile further reinforcements ere being prepared and despatched as rapidly as the best energies of the department can direct, and it is believed several thousand men sailed from Tampa today directly for Santiago, The department has had in mind the difficulties of the campaign that are just developing to the public eye, such as the use for the first time in civilized warfare of barbed-wire fencing as a means of defence, and acting upon fleers who were in Cuba while the fighting was confined to the Spaniards and the insurgents a certain number of men in each regiment have been provided with wire cutters and charged with the duty of cutting down these fences so as to permit the advance of

It will probably be necessary to shell out the force defending these wire chevaux de friese before they can be cut unless the men in charge of that duty are to be unduly exposed to danger. This will involve a larger use of field artiflery than would be required in ordinary warfare. The officials here tails, and in fact have provided for the having sent about 150 tons of this wire with General Merritt's expedition,

THE BLOCKADE INCREASED.

President Takes Additional Steps to Isolate Binneo.

Washington, June 28 .- The president has issued a proclamation extending the blockade of Cuba to the southern oast from Cape Frances to Cape Cruz nclusive, and also blockading San Juan, Porto Rico.

The president's proclamation increases the extent of the blockade fully fourfold, it having been confined, heretofore, to a stretch of a little more than one hundred miles on the north, and the single port of Cientuegos on the south coast of the island. The denands upon the navy in the way of ships to patrol the coast, however, will not be nearly so heavy in proportion to the territory to be covered as in the case of the initial blockade for the reason that the new blockade coast line les entirely within the great bight on the south Cuban coast in which the water is generally very shallow and the ports are few into which a vessel of any draft could enter. The most important of these ports are Manza-nillo, Trinidad and Tunas.

The vessels for the additional block ade service will be supplied almost entirely from the patrol fleet which, unde Commodore Howell, has been guarding the North Atlantic coast from Maine to South Carolina. The service has been abandoned because the only available Spanish warships are with Admiral Camara, thousands of miles

WATSON'S JAUNT ACROSS THE SEA

The general belief in the continent is that nothing serious is intended by the threat, though there are reports from Vienna that the powers are exchanging notes on the subject.

Washington, June 28.-When the navy department announced yesterday that Commedore Watson's squadron would leave "immediately" for the coast of Spain, it meant that the fleet ould leave as soon as possible. As matter of fact, it may be a week, and possibly longer, before the Eastern squadron can depart on its long ruise. In the first place, it will be necessary for the fleet to coal. The three colliers of the squadron are or their way to Newport News for that purpose and it will take several days for them to take on the full supply which is intended. The auxiliary Tuisers Dixie, Yosemite and Yanke must also fill their bunkers. Finally it is intimated at the department that the armored ships are not in the condition they ought to be in for a long cleaned since her long trip around the Horn, and it is months since the Iowa had her bottom scrubbed.
