

CARBONDALE.

[The Carbondale correspondence of The Tribune has been placed in the hands of Mr. J. M. Forbes. All complaints as to irregular delivery, etc., also news items, should be addressed to Roberts & Reynolds, news agents.]

PAINFULLY HURT.

A Young Lad Struck by a Passenger Train. Thomas Kerins, a 12-year-old boy, who resides with his mother on Brook-ly street, was painfully injured yesterday afternoon. He was on the way home from the Erie breaker and just as he came to Lee's crossing the train which leaves this city at 12:45 o'clock struck him. The lad stopped to let the train pass and turned his back to it. When he thought the train had gone by, he wheeled about and started to dash across the tracks, but the step on the last car struck him on the right arm and threw him to the rails. He cried out in pain and brought some passersby to the spot where he lay. They picked him up and removed him to his home on Brooklyn street. Dr. Mark Bailey and Dr. J. S. Miles were summoned and found that the two bones of the right arm had been fractured just above the wrist. They succeeded in setting them, and if nothing unforeseen sets in no fear for the patient's recovery need be entertained. The boy was bruised about the body but not seriously. He is badly near-sighted and it is probably due to this that he did not see the end of the last car. It is fortunate that he was not thrown under the wheels.

PROPERTY CHANGES HANDS.

The ownership of the property on Belmont street, formerly owned by J. G. Thompson, has been transferred to Frank Hollenback. Mr. Thompson received for his land a plot of ground on Water street in Waymart, which place he will immediately begin the erection of a slightly structure, in which he will take up his residence. His departure will be greatly regretted by his many friends.

AN ACCIDENT.

Frederick Ross met with a painful accident while engaged at his duties in the Northwest breaker yesterday morning. His hand became caught between two cog wheels and the result was that the ends of two of the fingers of his right hand were so badly crushed that amputation was imperative. Dr. Malson dressed the wounds which will incapacitate the young man from duty for some time.

ERIE OFFICIALS.

A number of prominent Erie officials were in this city yesterday on a tour of inspection. Among them were Messrs. Merrill, Buckholz, Fitch, Derr and Von Kuren. The latter two gentlemen are well known in this city, having at one time been superintendents of the Jefferson division. They shook hands with many old friends before their departure.

MINSTRELS AT THE GRAND.

Arthur Deming played to a large house at the Grand Opera house last night. The audience, judging from the applause, was well pleased. Deming has a company of about forty persons, each of whom is a star in his own particular line. The specialties were especially well received, and interesting. Deming himself is the same old man of yore.

LOCAL AND PERSONAL.

Miss Hazel Dubois entertained a number of young people on Wednesday evening in honor of her birthday. She was the recipient of many pretty presents from her admiring friends. Frank H. Jeffers will leave today for Philadelphia where he will matriculate at the University of Pennsylvania. Mrs. J. R. Shephard has returned from Danville where she was called by the serious sickness of her sister, Mrs. Ireland. Louis Abbot will leave today for Lehigh University. R. J. Brownwell, of Greenville, N. J., and son, are visiting relatives in this city. Mr. and Mrs. Jonah Van Demark have returned from Camp Meade. Private William Kambeck, of company B, Thirtieth regiment, and his sister are the guests of Mr. and Mrs. N. Mohr, of Park street. P. A. Carroll was among the many from this city who attended the races at Pittston yesterday. A. H. Van Demark is ill at Camp Meade. He is a member of the Thirtieth regiment. Mrs. Fred Rupert, of Honesdale, is visiting friends in this city. Mrs. Ella Scott, of Scranton, is the guest of friends in this city. Rev. W. F. Cleveland, of Susquehanna, was a visitor in this city yesterday. Miss Jennie Doud, of Scranton, is the guest of Carbondale friends. E. W. Farror, of Nicholson, is visiting friends in this city. Mr. and Mrs. W. G. Scurry have returned from Ocean Grove. Walter Carey called on Scranton friends yesterday. S. P. Hine, of Brooklyn, Susquehanna county, is the guest of relatives in this place. D. W. Humphrey spent yesterday in Binghamton. Charles Smith, of Tunkhannock, is the guest of W. Carey, at Reynhanhurst. Mrs. Cos Durland, of Honesdale, who has been the guest of Mrs. Thomas

PECULIAR POISONS.

GENERATED IN THE HUMAN BODY. The Result of Imperfect Digestion of Food. Every living thing, plant or animal, contains within itself the germs of certain decay and death. In the human body these germs of disease and death (called by scientists ptomaines) are usually the result of imperfect digestion of food; the result of indigestion or dyspepsia. The stomach, from abuse, weakness, does not promptly and thoroughly digest the food. The result is a heavy, sodden mass which ferments (the first process of decay), poisoning the blood, making it thin, weak, and lacking in red corpuscles; poisoning the brain, causing headaches and pain in the eyes. Bad digestion irritates the heart, causing palpitation and finally bringing on disease of this very important organ. Poor digestion poisons the kidneys, causing Bright's disease and diabetes. And this is so because every organ, every nerve depends upon the stomach alone for nourishment and renewal, and weak digestion shows itself not only in loss of appetite and flesh, but in weak nerves and muddled complexion. The great English scientist, Huxley, said the best start in life is a sound stomach. Weak stomachs fail to digest food properly, because they lack the proper quantity of digestive acids (gastric and hydrochloric) and peptogenic products; the most sensible remedy in all cases of indigestion is to take after each meal one or two of Stuart's Dyspepsia Tablets, because they take, on a pleasant, harmless form all the elements that weak stomachs lack. The regular use of Stuart's Dyspepsia Tablets will cure every form of stomach trouble except cancer of the stomach. They increase flesh, insure pure blood, strengthen nerves, a bright eye and clear complexion, because all these result only from wholesome food well digested. Nearly all druggists sell Stuart's Dyspepsia Tablets, 50 cents a full size package or by mail by enclosing price to Stuart Co., Marshall, Mich., but ask your druggist first. A little book on stomach diseases mailed free. Address Stuart Co., Marshall, Mich.

TAYLOR NEWS.

Social Success—Red Men Nominating Officers—Personal Mention. The social and drawing which was held at Weber's rink on Wednesday evening under the auspices of the St. Joseph society, Irish Catholic Benevolent union, of Minooka and this place, was a grand success, both socially and financially. The rink was well filled and everything was conducted in a most pleasant manner. The drawing was for a purse of \$10 which was won by Miss Martin Nallen, of Minooka. Following this drawing a grand social was held, which was continued until a seasonable hour. The music for dancing was furnished by Miss Mamie Sheerins of Scranton. Minooka tribe, No. 247, Improved Order of Red Men, nominated officers on Wednesday evening. The following officers were nominated: Prophet, Tallie Jones; sachem, David Becham; senior sagamore, William White; junior sagamore, Thomas Samuels. The attention of our school directors is once more called to the condition of Old Glory which partly floats over No. 2 school. Miss Priscilla Scrivens, of Main avenue, left yesterday for an extended trip to Maryland, where she will visit her mother. Mr. and Mrs. J. Milford Morgans, of Main avenue, presented to their daughter, Mary, a beautiful upright piano on Wednesday. Private Henry Evans left yesterday to join his company at Camp Meade. Mr. John Davis, of the DeFoe, and Rachel, attended the Lewis-Price nuptials at Monroe on Wednesday evening. Mrs. William Webber is visiting friends in Dunmore. The marriage of James Scott, of this place, to Miss Mary Ann, of DeFoe, was solemnized in St. Mary's church on Wednesday evening. Rev. M. F. Crane performed the ceremony. PECKVILLE. Mr. and Mrs. Hulvies, of Main street, entertained a number of young folks at their home last Wednesday evening, the occasion being a surprise party for their daughter Ruth. Refreshments were served. Those in attendance were: Misses Milledge, Freda Briggs, Maggie Goyno, Edna Dewey, Tillie Wisenbaur, Ethel Snyder, Nellie Shore, Florence White, Edna Brundage, Grace Hughes, Ruth Hughes, Edith Rooker, Lenora Hughes, Myrtle Evans, Plymouth, Messrs. Willie Bell, Walter Rogers, Frank Hoyt, Eddie Tinklebaugh, Harvey Bronk, Hayden Hughes, Frank Warne, Frank English, Arnold Hughes, Robert Depew, Peckville; Gordon Evans, of Plymouth. M. D. Bitter, of the West Side, is interested in the Harrison hotel and the place is now in charge of the chief clerk, Walter Lloyd. Mrs. Luke Rubery, of Dorra-entown, called on her brother, John Warne, last Wednesday. Alex. Prater, of the West Side, has been very sick for the past few days. Mrs. Henry Jones, of the West Side, who has been indisposed for the past three weeks, is convalescent. Mrs. James Nines, of Wyoming, is visiting her parents, Mr. and Mrs. Isaac Cheney. Mrs. W. R. Baker and daughter, of Carbondale, were the guests of Mr. and Mrs. E. H. Barber, last Wednesday. DALTON. There will be an "Old Folks Concert" in the Dalton Methodist Episcopal church this (Friday) evening, for the benefit of the Ladies' Aid society. EARLY USES OF GLASS. Known First to the Egyptians, But Perfected by the Romans. In an interesting article on "Ornamental Glass in All Ages" in the Woman's Home Companion, Oriena L. Shackelford has this to say of the antiquity of glass: "The Egyptians used glass ornaments largely for personal decoration. Necklaces, bracelets, beads, scarabaei, etc., of exquisite beauty have been discovered in their tombs. It also served to bedeck clothing, and innumerable domestic objects were made of it for daily use. Indeed, this accommodating medium was adapted by them to an infinity of purposes, being blown, cast, rolled, wrought or cut, as the waker willed, whether into statues of their gods or as glass eyes for the sightless sockets of their nummies, to express the wish of the soul to arrive safely at the end of its journey. The Romans excelled the Egyptians as extensive users of glass. It served them for decoration to walls and floors for all sort of domestic vessels, cinerary urns and coffins (the Egyptians buried their whole at the end of a glass coffin), for ornaments, toys, dice, draughts, chessmen and water-clocks. We read of a table of solid emerald that was carried off by the cloths when they sacked the Eternal City, but it is now considered not to have been of precious stone—only fine green glass or jasper—yet deemed sufficiently valuable to be set with pearls and mounted in gold. These great builders—the most practical of antiquity—were not slow to realize the value of this transparent medium as a means for transmitting

PECULIAR POISONS.

light into their palaces and temples; but their window-panes were only from seven to ten inches square, and the glass was more green than white, lacking the crystal clearness of our modern productions. Glass mirrors were known to the Egyptians and Romans. Specimens have been found in the tombs of the former, and documentary evidence from the latter. The glass and others undoubtedly proves their possession by the latter. Glass was used for lamps in Pompeii, but we have no evidence of its being applied to such a purpose in Egypt, where it was appropriated to the largely ornamental and decorative rather than domestic purposes." MYSTERIES OF THE MACKEREL. Appear at But Few Points and Nobody Knows Whence They Come. From the Fishing Gazette. The keenest interest now centers in the needs of consumption. Prices of the season was landed at the Fulton fish market slip on Tuesday of last week, ten days in advance of the first cargo last year, and only five days behind the earliest catch on record. Nor for reasons from thirty to forty miles from the coast. The mackerel fishery is now so widely discussed as now. There are reasons for it, of course. They are to be found in the fact that of late years the supply of salt mackerel has been inadequate for the needs of consumption. Prices, owing to the scarcity of the fish, have gradually risen to a point above the means of the poorer classes—the largest consumers of salt mackerel—and fish have become a luxury, almost, on the tables of the well-to-do. Year after year since the season of 1889, the year when the fishery first began to show signs of a decline, fishermen and fish dealers have watched the movement of the fish as they approached the coast have been carefully observed, and signs that in the seasons of greatest success foreshadowed or attended the coming of the schools have been noted with evidence. Old fishermen who have followed the schools up and down the coast until their hair has grown white as the foam-capped waves have gravely read the riddle of these signs and have fitted out their boats and pursued their capricious fish throughout each season with only a vague sort of intuition which they cannot impart. Its movements are to them a mystery. They know something of its habits, when it may be expected to appear off the coast, and that is about all. In this respect the fishery department is no better off. It is known that the fish have a migration along the coast, northward in the spring and southward in the autumn. It is believed that their appearance each year is due to the marvelous instinct of reproduction which they possess in common with other fishes; but what has caused the alarming diminution in the size of the schools that annually visit contain upwards of a million barrels of fish, and fishermen are mute. It is not a little disappointing to know that, with the much-vaunted power of our nineteenth century scientific knowledge that apparent mystery of the mackerel has not been solved. The banner year of the fish is greater or less numbers strike the southern coast in the vicinity of Cape Henry; by the middle of April the schools reach the capes of Delaware and slowly advance northward, and by the middle of May the middle of May according to the movement of fish in past years, a school will arrive at Yarmouth N. S., but when it comes is buried in a mystery. From the size and general character of the fish composing the school, it is apparent that they do not belong to the great littoral schools which advance from the south. Therefore it is presumed that they come from somewhere to the eastward in the deep sea. Simultaneously with the appearance of this latter school the host of southern visitors, having by that time gone as far as Nantucket will vanish with a suddenness quite as mysterious as the appearance of the school off Yarmouth, only to reappear again in the bay-indented shores of Massachusetts. Thenceforth until well into the month of August the waters will be more or less frequented by the fish. The roving habits of this fish are well known. They appear in and disappear in certain localities and leave no sign, so that it is impossible to say with any degree of certainty that the roving schools which first visit the bays of New England are identical with those that remain throughout the season. Of this much we are positive. The movements of the fish are practically the same now as they were during the period when the mackerel fishery first assumed any degree of importance, about the year 1820. While certain details and important data concerning the early years of the fishery is lacking, enough is known of the business to establish the fact that between the years 1825—perhaps earlier—and 1870 the method of capturing was largely by "rigs," little hooks, with heavily loaded shanks. It is known, too, that for many years that fishery was carried on almost exclusively by New England fishermen. From the hamlets and fishing villages around and about Cape Cod from 600 to 900 craft of various sizes engaged in the capture of fish. In those days, and well down to within a few years, the boats rarely went further south than Absecon light. Rich harvests of the fish were found abreast of Sandy Hook and about the shores of Block Island. The darting fins of gleaming millions of fish rippled the waters for miles along the coast. One ignorant

Calvey, yesterday morning was a shock to the community, as she was in perfect health only a few days before. On Wednesday afternoon she complained of a severe pain in the head and Dr. G. B. Seaman was called in. He administered to her sufferings but did not anticipate serious results. Through the night her symptoms became alarming and after intense suffering she fell into a peaceful sleep and passed away in the same manner that characterized her gentleness on earth. She was a beautiful girl and had many friends all of whom regret her sudden departure. The Blessed Virgin Sodality and the L. C. B. A. will attend the funeral, which will take place with a requiem mass in St. Mary's church tomorrow morning. Mr. John Davis and sisters, Mary and Rachel, attended the Lewis-Price nuptials at Monroe on Wednesday evening. Mrs. William Webber is visiting friends in Dunmore. The marriage of James Scott, of this place, to Miss Mary Ann, of DeFoe, was solemnized in St. Mary's church on Wednesday evening. Rev. M. F. Crane performed the ceremony.

PECKVILLE.

Mr. and Mrs. Hulvies, of Main street, entertained a number of young folks at their home last Wednesday evening, the occasion being a surprise party for their daughter Ruth. Refreshments were served. Those in attendance were: Misses Milledge, Freda Briggs, Maggie Goyno, Edna Dewey, Tillie Wisenbaur, Ethel Snyder, Nellie Shore, Florence White, Edna Brundage, Grace Hughes, Ruth Hughes, Edith Rooker, Lenora Hughes, Myrtle Evans, Plymouth, Messrs. Willie Bell, Walter Rogers, Frank Hoyt, Eddie Tinklebaugh, Harvey Bronk, Hayden Hughes, Frank Warne, Frank English, Arnold Hughes, Robert Depew, Peckville; Gordon Evans, of Plymouth. M. D. Bitter, of the West Side, is interested in the Harrison hotel and the place is now in charge of the chief clerk, Walter Lloyd. Mrs. Luke Rubery, of Dorra-entown, called on her brother, John Warne, last Wednesday. Alex. Prater, of the West Side, has been very sick for the past few days. Mrs. Henry Jones, of the West Side, who has been indisposed for the past three weeks, is convalescent. Mrs. James Nines, of Wyoming, is visiting her parents, Mr. and Mrs. Isaac Cheney. Mrs. W. R. Baker and daughter, of Carbondale, were the guests of Mr. and Mrs. E. H. Barber, last Wednesday. DALTON. There will be an "Old Folks Concert" in the Dalton Methodist Episcopal church this (Friday) evening, for the benefit of the Ladies' Aid society. EARLY USES OF GLASS. Our Unexcelled Dinner, ready to serve every day at 11.30 for 25 cents. Best in the city, without a doubt.

Jonas Long's Sons

of the immensity of the sea's vast resources and the wonderful fecundity of the fishes therein would doubtless listen with incredulous amazement if told of the number of fish one of the large schools contains. Mackerel fishermen of less than a generation ago describe the schools as seen by them being "windrows of fish hundreds of yards wide and miles long." And one school seen off Block Island in the '70s was estimated to contain upwards of a million barrels of fish. It is idle to remark, perhaps, that schools like these are never seen nowadays. The mighty multitude coming in from the sea is broken up into countless small detachments long before the fish strike the coast. The banner year of the mackerel fishery, all accounts agree, was the season of 1831. In that year the total amount of mackerel sailed in New England was 430,000 barrels. Since then the decline has been more or less steady, and of late years most marked. Last year the combined landing of salt mackerel of the New England fleet aggregated only 13,154 barrels. These figures speak with marked emphasis of the fishery's decay. Distinctly Marked. "Were there any marks about him by which you would know him again?" asked the policeman, who had arrived at the scene too late to be of any service. "Yes, sir," said the indignant young woman, whose pocketbook had been wrenched out of her hand by the daring scoundrel. "I left two long finger-nail marks on his face. I'd know him all right enough."—New York Evening Journal. Two Views of It. "When I hyahs a 'man sayin' he 'woudn't steal a pin,' said Uncle Eben. I sometimes takes it as an evidence of great honesty. An' den agin, it simply calls 'tention to de fact dat de malikot porce foh pine ain' very big, now."—Washington Star.

A Perfect Infant Food. Gail Borden Eagle Brand Condensed Milk. A PERFECT SUBSTITUTE FOR MOTHERS MILK. FOR 40 YEARS THE LEADING BRAND. INFANT HEALTH SOFT FREE. ALL CONDENSED MILK CO. NEW YORK.

AVOCA. The funeral of Miss Margaret McIntyre will take place this afternoon. The Langcliffe coal company will pay its employees today. The game of ball between the Moose and Avoca teams resulted in another victory for the home team. The game was interesting and the Moose team played hard in the hopes of winning the prize, which was a gold medal, presented by the Scranton Cracker bakery. An animatopoe entertainment will be given in the Starfield opera house on Monday evening for the benefit of the P. M. church. Admission 35, 25 and 15 cents. The members of the Y. M. I. will tender the soldiers of this town a smoker in their rooms on Tuesday evening. Rev. M. F. Crane has returned home after a few weeks visit at the seashore. Mrs. D. J. Morton and Mrs. James Morton are attending the Allentown fair. Mrs. P. Hollister is attending the veterinary reunion at Allentown. Mrs. John Biense, of the North End, is critically ill of paralysis. Mrs. John McCormack, of Grove street, is seriously ill. Miss Jennie Brennan has returned home after a several days visit with friends in Jersey and Carbondale. Misses Marion Gillespie and Jennie Nesbit, of Petersburg, are guests of the former's parents, Mr. and Mrs. Gillespie, of the North End. The sudden death of Miss Nellie Calvey, which occurred at the residence of her parents, Mr. and Mrs. Michael

Calvey, yesterday morning was a shock to the community, as she was in perfect health only a few days before. On Wednesday afternoon she complained of a severe pain in the head and Dr. G. B. Seaman was called in. He administered to her sufferings but did not anticipate serious results. Through the night her symptoms became alarming and after intense suffering she fell into a peaceful sleep and passed away in the same manner that characterized her gentleness on earth. She was a beautiful girl and had many friends all of whom regret her sudden departure. The Blessed Virgin Sodality and the L. C. B. A. will attend the funeral, which will take place with a requiem mass in St. Mary's church tomorrow morning. Mr. John Davis and sisters, Mary and Rachel, attended the Lewis-Price nuptials at Monroe on Wednesday evening. Mrs. William Webber is visiting friends in Dunmore. The marriage of James Scott, of this place, to Miss Mary Ann, of DeFoe, was solemnized in St. Mary's church on Wednesday evening. Rev. M. F. Crane performed the ceremony.
