MAY CREATE NEW CABINET OFFICE

ONE MAY BE ESTABLISHED FOR COLONIAL CONTROL.

The President Considering the Proposal—It May Be Feasible to Combine with It a Department of Commerce-The Tariff and Our New Dependencies.

New York, Sept. 23.—The Washington correspondent of the Commercial Advertiser says:

To administer the affairs of the enlarged foreign policy of the United States, it is not unlikely that a new cabinet office will be created. As yet the proposal has not crystallized, but the president has given the subject serious consideration, and after the peace commission has determined the final disposition of the Philippines it is probable that he will recommend the creation of a secretary of the colonies. in accordance with the practice of European governments having colonia possessions. The manifold duties which would devolve on members of the administration in case the United States become the governors not only of Porto Rico and the Hawaiian Islands, but of Cuba, the Philippines and one of the Ladrones, would make imperative a senarate department for the colonies. It has been suggested that these duties could be combined with the office of a department of commerce, the establishment of which has been agitated in congress for several years: but even without the collaboration of the duties of the two departments, our foreign possessions are expected to furnish ample work to warrant the establishment of a separate cabinet office. An effort will be made it is said to maintain natives in the minor offices of our new possessions wherever practicable. At first it would probably be

office in question. It is apparent, from the adoption of special tariff regulations in Cuba and Porto Rico, that the effort will not be seriously made to extend the protective tariff of the United States over the new dependencies. It is probable that the policy inaugurated of establishing uniform duties against all countries, including the governing country, will be continued. This is the only policy with which the United States can face Russia and Germany with any degree of consistency and self-respect and ask that the new territory opened in China be free to the commerce of the world.

States, but even in this matter preference would be given to local officers in

case they proved their capacity for the

WONDERFUL ACTIVITY IN WESTERN CENTERS

Business in the West Excels That of the Eastern Markets-Boom in

New York, Sept. 23 .- R. G. Dun & Co.'s Review of Trade will say tomor-

Europe will have to consider possible American demands for money much more anxiously in the future. Doubtless there has been for many years a feeling that the new continent could be put off with promises. But the control of this country over money marthat of a master. Our banks lend over there heavily when it is the most convenient market for them, but they draw on Europe whenever they want money and no longer have occasion to limit

their drafts. This country is not drawing on Europe as largely to pay for breadstuffs as it did a year ago and yet wheat exports for the week, flour included, have been 3,963,204 bushels from Atlantic ports against 3.667,868 last year, and 543,417 from Pacific ports against 1,-094,893 last year, making for eight weeks 10,203,941 from both coasts, flour included, against 19,569,129 last year. Prices have risen sharply about four cents for the week and the exports of corn, though not as large as last year been heavy in comparison with any other year. The price slightly ad-

The reports from different cities disclose a wonderful activity at the chief centers of western trade, the dispatches from Chicago, St. Paul and St. Louis being especially significant. To eastern dealers it may be hard to realize that such extraordinary activity exists at the west, although their own trade is excellent. Even in eastern markets it is commonly said that no larger trade has ever been known unless in 892, but the western cities are running things much after their own taste this year, having greater advantages than ever before in heavy bank balances and while the exchanges for the week fall below those of last year 3.5 per cent. they are 13.1 per cent. larger than in changed. the same week in 1892. The iron and steel trade expands with a rapidity which throws into the shade all expectations with a steel famine in Ger many and Great Britain in the market for ten thousand tons of plates, and the American works are crowded for months ahead. New orders at Chicago cover 30,000 tons tin plate bars, besides 7,000 tons sold at Philadelphia. Rails are in such demand that the makers

are to meet with expectation of advancing prices, some sales having been made from Chicago below agreed quotations for delivery at the far west. Plates are strong everywhere, but on account of car construction, especially strong at Chicago, and the demand for bars on the same account is heavy, with one order at Chicago for 1,000 and several others for 500 cars each. Prices have slightly advanced for plates, bars and for wire nails, which are in much

better demand than heretofore. The textile industries are not sharing the general improvement to a full extent, in part because the heavy decline in cotton with large stocks of goods accumulating, makes the mills disposed to wait for future developments and in part because the price of wool is higher than the mills are at present disposed to pay.

Print cloths are a shade lower and

also brown drills and in some wooler goods, and ladies' cloths, prices are slightly raised. Failures for the week have been 173

in the United States against 209 last year and 16 in Canada against 28 last year.

Miss Herndon's valuable wardrobe, which consists of the most beautiful dresses ever seen on the stage, cost \$4,000 and will be exhibited on the stage after the matinees, for the benefit of the ladies. Her dresses are all from Worth of Paris and several will be worn Monday evening. Special ladies' tickets will be distributed for Monday evening and can be exchanged at the box office up to 6 p. m.
