ASSAULT ON WATCHMAN.

William Gannon and James Thomas were the defendants and the charge against them was assault and battery and threats. The defendants swore held in \$200 bail each.

The hearing brought out the following facts: About twelve o'clock Saturday night the two men came to the brewery and asked for a keg of beer. Watchman Stearns refused upon their stating they had no pass book. The argument followed and twelve o'clock passed. Then they could not get beer with either pass book or money, though the defendants claim they were willing to pay.

Mr. Stearns ordered them away from the place and turned to walk away. He was pushed and in falling was severely injured. Gannon, he claims, also threatened him.

ANTHRACITE COAL.

Not only in the East, but at Buffalo and at the anthracite and bituminous mines in Pennsylvania, the shortage of coal is becoming quite a factor in demand and supply of coal. All-rail anthracite is becoming scarce in Ohio, Michigan and Indiana on account of the stringency in the car situation at Buffalo and at the mines. Many of the roads have placed embargoes on their coal cars and will permit none to leave the main lines. Of course it must be quite clearly understood that there is as yet no actual famine, yet the shortage, despite the fact that during the present summer orders for many thousands of new cars have been placed, of which only a little have been delivered, is becoming more serious each week, and if real cold weather should develop early in October, considerable inconvenience and annoyance might be entailed by dealers in outside towns, who usually refrain from buying until the last moment.—Black Diamond.

The Delaware and Hudson Canal company at Buffalo, N. Y., now has 1,500 additional feet of improved dockage at the foot of Louisiana street, as the result of work just completed by the Buffalo Dredging company. The work consisted of building a solid mammoth dock and dredging the river so as to give a depth of 19 feet of water below mean low water level for a width of 200 feet. Much of the dredging was done in solid rock. The entire dock is now accessible to lake boats of the largest class.

Dr. Roberts, chief sanitary superintendent of New York city, submitted a report on the soft coal smoke nuisance to the board of health last week to the effect that the city be divided into inspection districts in order that the nuisance might be located. The suggestion was adopted unanimously and twenty-seven inspection districts were created. It is proposed that when a case is reported by one of these inspectors, a visit will be served on the owner of the building, and that the nuisance, if the order is not obeyed, criminal proceedings will follow. What effect this will have upon the soft coal trade is yet to be seen. No doubt a test case will have to be made before there will be any real change in the use of soft coal in the city limits.

At a meeting of the junior class held today, Harry Lathrop, of Scranton, was elected president. Lathrop was president of his class in the freshman year. PAVING RESOLUTION SIGNED.

Contract with the Barber Company is Now Being Signed. Mayor Bailey yesterday signed the resolution awarding the contract of paving Quincy avenue from Pine to Gibson street to the Barber Asphalt company, and City Solicitor McGinley proceeded to draw up the contract for the signatures of the parties concerned. The ordinance was in the mayor's hands since Sept. 27.

Mr. McGinley will have the papers ready this forenoon, and Mayor Bailey will be prepared to sign the contract for the city, and C. W. McKinley, the agent of the Barber company, is ready at any time, also anxious to get the work started before the frost gets into the ground. The outlook is that the work will be started next week.

There was a fear that a slight tangle in the legislation of councils might postpone the work till spring. The property owners signed a petition asking for asphalt paving at a rate of \$2 to a yard, and when the bids were opened and the contract awarded the amount of the Barber company's bid was \$2.37. But the property owners came forward and accepted the contract at the \$2.37 rate.

The evidence at the hearing last night excuplated him. The wagon was quite heavily laden and was not going at a rate of speed more than ordinary, according to the weight of the evidence, and the accident was more directly the result of the boy's own carelessness in running ahead of the team and getting knocked down and trampled upon.

The witnesses called by Dr. McGrath were: Dr. Charles Thompson, Fred Snyder, Miss Nellie Maloney and Miss Beesie Jones, teachers in the school attended by young Harrison and eye witnesses to some extent of the accident. Grace Shatto, Emeline Lanyon, Jennie Lewis, Flora Simrell, Ada Williams, Oscar Fish, Daniel Blackmore and Norman Fish are pupils who saw the wagon and the boy just prior to the accident. All of them gave evidence warranting the verdict of the jury, though there was some testimony that Gardner had been drinking.
