BRUTALLY ASSAULTED.

Mathew Lukus was held up and brutally beaten on Breaker street Wednesday night by Peter Lowkowsky, so it is alleged by the former. Lukus stated before Alderman Roberts yesterday in furnishing information for a warrant that he was returning to his boarding house about midnight. In a dark, desolate spot he was pounced upon by Lowkowsky and brutally beaten with a stone upon the head.

His cries brought assistance from the immediate neighborhood and his

assailant took to his heels on the approach of help. Lukus was bleeding profusely from a number of wounds which had to be subsequently dressed by a physician. At the hearing last night Lukus ex-

hibited his damaged countenance and a coat, vest and shirt covered with blood. Lowkowsky, who was arrested last night by Constable Davis, in giving his testimony in broken English, partly denied the accusation, but in séveral instances made statements which pointed him out as guilty. The alderman decided to hold him in \$909

bail for his appearance at court. He failed to furnish the necessary amount and was committed. NARROW ESCAPE.

John Lloyd, a miner, had a narrow escape from instant death in the Cayuga mine yesterday. While at work loading a car a fall of rock occurred. The weighty mass struck him and buried him beneath it. Workmen who hastened to his assistance anticipated his life being crushed out from the tons of coal that fell upon him. After he was extricated an examination revealed a bad scalp wound and a bruised and lacerated right leg. His injuries will confine him to his home

Since the new process of heating has been put in place at the South mill the average output of rails at the works has decreased greatly and the present state of affairs there will not admit of their reaching the standard. In other to meet the demands of orders received some additions had to be made. Yesterday morning a gang of men were placed at work making excavations for four new soaking pits, the eight recently built being unable to keep pace with the melting department. After the work on the new pits is completed the vulcan cranes will be constantly carrying the ingots from the pits and will eventually increase the output at the works. The first set of pits which were put in place have been overtaxed with work and the material composing the pits has consequently given way to the strain, causing an idleness in the near Mrs. William A.
