At the conclusion of the work compiling the vote Saturday morn the court said it was prepared to ta up the motion of Cornelius Smith the effect that court refuse to con for one person 'he vote in b Democratic columns for F. W. Gunst James Mahor appeared for Mr. Sm and Joseph O'Brien and George Horn for Judge Gunster. Judge 1 wards said:

is a matter we cannot inou into here. Our duties are only misterial. We shall not combine columns or certify that Fred W. G ster has had so many votes except it appears on the returns. We simsign the certificate that this is a creet copy of the returns as made h That does not go into the merits of question at all. I am very clear t we have nothing to do with the qu tion which is now raised. Judge Gunster has the right to appear in two columns as the candidate of two separate political parties or wheth only one column could be counted him is not before us and canno be before us. It is not within our jur Isdiction.

was under the impression that when the matter vas first brought up and after having made a cursory ex amination of the question that it was our duty, when a candidate was running on two separate tickets to com-tine the total votes in the two col-umns, giving the total of both column, but we have no power to do that.

JUDGE ARCHBALD SENT FOR.

The matter was argued at some length and as it was of great importnnce Judge Archbald was sent for and the argument was resumed. Judge Archbald outlined his ideas in the case in the following manner:

is our duty to say that he not only received so many votes. Demo-eratic and Republican, but to put the total in. It is as much our duty to do this as it is for us to ray that he re-ceived so many votes in Benton, so many votes in Blakely and so many votes in Carbondale. How are we to say that the names represent the same party? Because the names are identical and because of the knowledge we possers, necessarily. Fred W. Garrster had so many Republican yotes and so many Democratic votes and as a total computing the whole thing, he received so many yotes. he received so many votes, it does not seem to me that this is of very great importance, but it might be very in portant, in establishing a preced-ent, in some other case.

There was some further argument and then court adjourned for the noon recess. When it reconvened Judge Archbald announced that he and his colleague had had a conference and agreed upon an order which would be in the nature of instructions to the clerks engaged in tabulating the vote. This order, the court thought, would not harm any one and would hold all rights inviolate. The order made read

As to the method of computing election returns we make the following order: Each column to be computed and the total entered at the foot of said column. Wherever the same name appears in more than one column, or under more than one party designa-tion, the clerks shall make a memorandum, giving the total of eitch col-umn and add the same together. This memorandum to be entered at the foot of the columns belonging to each par-

Long Breaths Will Drive Away a Cold When it First Begins. From Pearson's Weekly.

A cold, as nearly every intelligent person knows, is the result of a stoppage somewhere of the free circulation of the blood, to which one is first censitive through a feeling of chili. So slight is the chill oftentimes that not until the preliminary sneeze comes s the victim aware he or she has been in the track of a draught, or that the temperature has changed.

The usual notion that by going tnloors, changing to heavier clothing or retreating from the moist atmosphere the danger is averted. These precautions are well enough, but the first and most efficacious measure should be to restore the quick flow of warm blood through every vein, and so by
