JERMYN. The school directors met in regular ession last evening. After the reading of the minutes and the payment of a few small bills, an application from two widows for the exoneration of their

property taxes was considered and laid over for future action. Considerable time was taken up in hearing and investigating a complaint from the mother of one of the pupils against a teacher. From the tone of the remarks of the directors it was evident that their sympathy was with

the teacher and were convinced that the pupil was at fault. It was reported that there had been a considerable falling off in the attendance at night school and it was decided to do without one of the two teachers. Miss McChrone's services will therefore for the present be dispensed with. County Superintendent Taylor was present and stated he had spent most of the day in going through the schools and reviewing the work, He highly prized the system of specialization recently adopted, and said that he was convinced that when it became known that Jermyn had adopted such a system and how successful it was working, other schools in the county

would also adopt it. Messrs, Loughney, Mellow and Shields were appointed visiting com-mittee for the present month, and the

board afterwards adjourned. Last evening Select Commander George H.
