The teachers of the graded and high lar monthly institute yesterday. Miss "Supplementary Reading," dwelt at length on the purposes of such reading and said that our schools need some thing to take the place of the usual text books on reading, much of the matter of which is absolutely useless. Supplementary reading should present such styles of reading as will cultivate a love for the elevating in literature, for the tastes cultivated during school life will govern and influence us in more mature years. Miss Osborne, in speaking of "Penmanship," gave many useful points and good suggestions. In part she said: "One great aim of the teacher should be to show how easily one letter may be formed from another, how closely the letters of our alphabet are related. We should dispel the er roneous idea that writing is difficult. This may be done by grouping letters. Lead the pupil to detect their own er cors in form, slant, etc. Do not look
